**Southern Illinois Coal** Herbert K. Russell, 2017-06-19 The coal mining photographs of C. William Horrell, taken across the southern Illinois Coal Belt over a twenty-year period from 1966 to 1986, are extraordinary examples of documentary photography--so stark and striking that captions often seem superfluous. Horrell's photographs capture the varied phenomena of twentieth-century coal mining technology: the awesome scale of surface mining machines and their impact on the land; massive machines forced into narrow passageways with inches to spare as they carry coal from the face to conveyor belts; and, more significant, the advent of continuous miners, machines that can handle four previously separate processes and which have been a fixture in underground or deep mines since the mid-1960s. Horrell was also intrigued by the related activities of mining, including coal's processing, cleaning, and transportation, as well as the daily, behind-the-scenes operations that keep mines and miners working. His photographs reflect the beauty of the commonplace--the

clothes of the miners, their dinner pails, and their tools--and reveal the picturesque remnants of closed mines: the weathered boards of company houses, the imposing iron beauty of an ancient tippie, and an abandoned building against the lowering sky of an approaching storm. Finally, his portraits of coal miners show the strength, dignity, and enduring spirit of the men and women who work the southern Illinois coal mines.

**A Coal Region Story** Sarah Jane Storm, 2008-12 Finding the saint instantly challenged the character and military career of the third member of the Schuylkill Four, Bobby Conway. After all, there were not supposed to be POW/MIAs alive in Vietnam after the war. With Conway as personal life in chaos because of his wife's infidelities and the potential overshadowing effect that would have on his leadership position with the Bakeras Dozen, Conway must make a decision about his marriage. He also must consider how that decision will impact rescuing the saint.

*Coal Mine Disasters of North Carolina* John Hairr, 2017-01-16 During the past two centuries, the central region of the Tar Heel State was populated with numerous active coal mines, many of which dealt with catastrophes such as cave-ins or gas explosions. Over fifty-three miners lost their lives in an explosion at the Carolina Mine at Coal Glen in 1925, the largest industrial disaster in state history. The Egypt Coal Mine was a key resource for Confederate forces during the Civil War despite a series of explosions that claimed scores of lives. The last efforts by the Raleigh Mining Company to continue coal mining in the state in the 1950s were marred by accidents and signaled an eventual

end to the industry. Author John Hairr chronicles the history and tragedy of coal mining in North Carolina's Deep River region.

A project has been underway which attempts to demonstrate practical means of abating pollution from coal mine mineral wastes. The site included a refuse pile occupying approximately 40 acres and a slurry lagoon complex of 50 acres. In the report, the characteristics and acid formation rate of the refuse pile are described. The average rate of acid formation for this refuse pile is 198 pounds of acidity, as  $\text{CaCO}_3$ , per acre per day. Acid contribution from the slurry lagoons was not determined but appears to be negligible. As an abatement measure, a number of experimental vegetative covers were tested. Grass was successfully established with and without the use of topsoil, weathering well for one year. The long-term effects of establishing a grass cover directly on the refuse without the use of topsoil are not known at this time.

*Daughter of the Hills* Myra Page,1986 This novel offers a powerful account of family life and labor conflicts, told through the eyes of a tough, resilient Appalachian woman who is, according to Richard Wright, one of the most impressive proletarian characters in our literature. Daughter of the

Hills exposes the economic conditions of the working class and the scarcity of opportunities for working-class women, but also tells the story of a loving marriage that endures despite severe hardships.
