**A Brief Introduction to Probability and Statistics** William Mendenhall, Robert J. Beaver, Barbara M. Beaver, 2002 This brief version of the authors' classic text retains the traditional outline for the coverage of

descriptive and inferential statistics. **The Dare** Harley Laroux, 2023-10-31 Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The freak, Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? The Dare is an 18+ erotic romance novella and a prequel to the Losers Duet. Reader discretion is strongly advised. This book contains graphic sexual scenes, intense scenes of BDSM, and strong language. A full content note can be found in the front matter of the book.

The Patient's Brain Fabrizio Benedetti, 2011 Due to advances within neuroscience, we are now in a much better position to be able to describe and discuss the biological mechanisms that underlie the doctor-patient relationship. Using this knowledge, this book describes and demonstrates the power that the doctor's behaviour has on a patient's behaviour and capacity for recovery from illness.

**Mediamorphosis** Roger F. Fidler, 1997 This book is about technological change within human communication and the media. **Learning with Information Systems** Simon Bell, 2013-02-01 In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and

user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

**Hejduk's Chronotope** K. Michael Hays, 1996-09 Anyone interested in the intersection of theory and practice in architecture will appreciate the insight offered by Hejduk's Chronotope. With essays by Stan Allen, Peggy Deamer, K. Michael Hays, Catherine Ingraham, Detlef Mertins, Edward Mitchell, and Robert Somol, the volume examines today's tendency towards theoretical production, as exemplified by John Hejduk, known for his ventures outside the realm of the practical. Hejduk, the Dean of the School of Architecture at The Cooper Union, has created a unique body of theoretical work: publications such as *Mask of Medusa*; and small-scale constructions such as his compelling masques, structures that fall between architecture, scenography, sculpture, and poetry. Additionally, Hejduk has several built works to his name—housing in Berlin and a renovation of The Cooper Union—which display the same themes and tectonics as his theoretical creations.

**Architecture's Desire** K. Michael Hays, 2009-10-02 Theorizes an architectural ethos of extreme self-reflection and finality from a Lacanian perspective. While it is widely recognized that the advanced architecture of the 1970s left a legacy of experimentation and theoretical speculation as intense as any in

architecture's history, there has been no general theory of that ethos. Now, in *Architecture's Desire*, K. Michael Hays writes an account of the “late avant-garde” as an architecture systematically twisting back on itself, pondering its own historical status, and deliberately exploring architecture's representational possibilities right up to their absolute limits. In close readings of the brooding, melancholy silence of Aldo Rossi, the radically reductive “decompositions” and archaeologies of Peter Eisenman, the carnivalesque excesses of John Hejduk, and the “cinegrammatic” delirium of Bernard Tschumi, Hays narrates the story of architecture confronting its own boundaries with objects of ever more reflexivity, difficulty, and intransigence. The late avant-garde is the last architecture with philosophical aspirations, an architecture that could think philosophical problems through architecture rather than merely illustrate them. It takes architecture as the object of its own reflection, which in turn produces an unrelenting desire. Using the tools of critical theory together with the structure of Lacan's triad imaginary-symbolic-real, Hays constructs a theory of architectural desire that is historically specific and yet sets the terms and the challenges of all subsequent architectural practice, including today's.

**Aldo Van Eyck** Francis Strauven, 1998 This is a monograph on the Dutch architect van Eyck, who regarded the concept of relativity as the foundation of 20th-century culture.
