*Achtung-Panzer!* Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**The Tale-tellers** Nancy Huston,2009 To be human is to have a story and to tell stories – an 'I' only comes into being thanks to the 'we's' which, through stories, we are taught to identify with and relate to.Each and every detail of our precious identities, from our names to our birthdates to our family histories to our national identities to our religions, is part of a story that was invented at a particular place and time, constructed in the same way as all stories are constructed. As opposed to the simplistic, involuntary fictions, which we absorb unwittingly from the day we are born until the day we die, novels are rich and voluntary fictions. Because they encourage us to identify and empathize with people unlike ourselves and give us access to their inner lives, novels can play an important ethical role in the world of today.

**Worlds of Bronze and Bamboo** Grant Hardy,1999-07-06 Sima Qian (c. 100 B.C.E.) was China's first historian—he was known as Grand Astrologer at the court of Emperor Wu during the Han dynasty—and, along with Confucius and the First Emperor of Qin, was one of the creators of imperial China. His Shiji (published for Columbia in a translation by Burton Watson as Records of the Grand Historian) not only became the model for the twenty-six Standard Histories that the historians of each Chinese dynasty wrote to legitimize the dynastic succession, but also has been an enormously influential resource to historians, literary scholars, philosophers, and many others seeking an understanding of early Chinese history. In Worlds of Bronze and Bamboo, Grant Hardy presents convincing evidence that the Shiji is quite unlike such Western counterparts as the histories of Herodotus and Thucydides, for, Hardy argues, Sima Qian's work seeks not only to represent but to influence the world in a manner based on Confucian concepts of sageliness and the rectification of names. Although many scholars have sought close parallels between Sima Qian and the Greek historians—either criticizing Sima's work, as if Western models of historical interpretation could serve as a template by which to read it, or overemphasizing his objectivity to

more closely align his text with these respectable Greek models—Hardy boldly contends that the Chinese historian never intended to produce a consistent, closed interpretation of the past. Instead, Hardy argues, the Shiji is a microcosm in which Sima Qian sought to represent the open-endedness and multivalence of the world around him, revealing and reinforcing the natural order. In mapping out this model of the world, Sima embodies the historian as sage rather than chronicler. Transcending mere accuracy in recording events, such a historian seeks not to present an opinion about what happened in the past, buttressed with rational arguments and pertinent evidence, but to penetrate the outer details of an incident and discover the moral truths it embodies. Thus intuiting the moral significance of events, the sage-historian delineates the Way and offers his readers a chance to become more in tune with the natural order. Illustrating his provocative theses about the Shiji by analyzing Sima Qian's handling of specific historical personages and episodes such as the First Emperor of the Qin, the hereditary house of Confucius, and the conflicts that ended with the founding of the Han dynasty, Hardy both extends and challenges existing interpretations of this crucial yet understudied text and sheds light on its puzzles and incongruities.

**The Cloudy Mirror** Stephen W. Durrant,1995-01-01 Sima Qian's writings have influenced the Chinese for over 2,000 years and still serve as a fiscal source of historical information about China.

**Between History and Philosophy** Paul van Els,Sarah A. Queen,2017-08-21 Analyzes the use of anecdotes as an essential rhetorical tool and form of persuasion in various literary genres in early China. Between History and Philosophy is the first book-length study in English to focus on the rhetorical functions and forms of anecdotal narratives in early China. Edited by Paul van Els and Sarah A. Queen, this volume advances the thesis that anecdotes—brief, freestanding accounts of single events involving historical figures, and occasionally also unnamed persons, animals, objects, or abstractions—served as an essential tool of persuasion and meaning-making within larger texts. Contributors to the volume analyze the use of anecdotes from the Warring States Period to the Han Dynasty, including their relations to other types of narrative, their circulation and reception, and their central position as a mode of argumentation in a variety of historical and philosophical literary genres. Paul van Els is University Lecturer of China Studies at Leiden University, the Netherlands, and the author of The Wenzhi: Creation, Manipulation, and Reception of a Chinese Philosophical Text. Sarah A. Queen is Professor of History at Connecticut College and the coeditor (with Michael Puett) of The Huainanzi and Textual Production in Early China.

**A Patterned Past** David Schaberg,2020-03-23 In this comprehensive study of the rhetoric, narrative patterns, and intellectual content of the Zuo zhuan and Guoyu, David Schaberg reads these two collections of historical anecdotes as traces of a historiographical practice that flourished around the fourth century BCE among the followers of Confucius. He contends that the coherent view of early China found in these texts is an effect of their origins and the habits of reading they impose. Rather than being totally accurate accounts, they represent the efforts of a group of officials and ministers to argue for a moralizing interpretation of the events of early Chinese history and for their own value as skilled interpreters of events and advisers to the rulers of the day.
