**Early Visual Skills** Diana Williams, 2019-10-10 Now in a revised and updated second edition, Early Visual Skills is a practical manual for use with children and young people who have underdeveloped visual perceptual skills. Twelve clear and easy-to-follow sections, focusing on skills such as attention, discrimination, sequencing, concentration and memory, are filled with carefully designed activities to stimulate visual attention and discrimination skills in children with a range of developmental levels and abilities. Features include: A wide range of activities suited to both the early years and home settings Links to the Early Years Foundation Stage (EYFS) framework and topics reflecting the EYFS and the Key Stage 1 curriculum Photocopiable materials designed to document the child's development over time As most of the activities

are non-verbal, they are well suited for children with limited spoken language, including EAL (English as an Additional Language) learners, the deaf, sensory impaired, or those with autism or learning difficulties. Whilst primarily designed for early years practitioners, SENCOs (Special Educational Needs Coordinator), specialist teachers, therapists and other professionals, there are activity sheets and guidance for parents to provide them practical advice on how to stimulate visual perceptual skills at home, turning their child's everyday routines into opportunities to stimulate visual awareness.

Psychologists series, international experts

present career-long collections of what they judge to be their finest pieces - extracts from books, key articles, salient research findings, and their major practical theoretical contributions. Elaine Funnell has played an important role in the study of neuropsychology over the past 25 years. She has been at the forefront of groundbreaking research on individuals suffering with acquired disorders of written and/or spoken language resulting from brain damage. With commentary by Nicola Pitchford and Andrew Ellis, this volume presents Elaine's most significant contributions in her two main specialist areas: adult neuropsychology of semantic disorders, with a focus on disorders of naming in dementia, and acquired language and literacy disorders in childhood. The publications included in this volume date back to 1988, where Elaine co-authored a major review of theories regarding the representation of meanings in the mind and brain. They then bring us right up-to-date with a previously unpublished paper from 2010, which has been recently edited by the co-author, Mike Kopelman, for this edition. Through

her exceptional work, Elaine has greatly advanced our understanding of the brain processes behind written and spoken language, and this book represents an original and timely contribution to the field. Acquired Language Disorders in Adulthood and Childhood will be of great interest to researchers and postgraduate students in adult and child neuropsychology, specifically for those specialising in semantic and language disorders.

**Real Materialism** Galen Strawson, 2008-05-29 Real Materialism draws together papers written over twenty years by Galen Strawson in philosophy of mind and metaphysics. Strawson focuses on five main areas of enquiry: [1] the nature of the physical, consciousness, the 'mind-body problem', and the prospects for panpsychism; [2] the self, the subject of experience, self-consciousness, and the 'narrative' self; [3] free will and moral responsibility; [4] the nature of thought and intentionality and their connection with consciousness; [5] the problem of causation with particular reference to the philosophy of David Hume.
