**Men of Order** Touraj Atabaki,Erik J. Zürcher,2017-01-30 The authors trace the emergence of Ataturk and Reza Shah through the constitutional revolutions in Iran and the Ottoman Empire, which led to the introduction of European social models, the establishment of dictatorship and of secularist reforms. This produced in both Turkey and Iran highly authoritarian, nationalist, and quasi-westernised states, where the personality cult of the leader defined the politics of each country.

*Essays on European Literature* Ernst Robert Curtius,2015-03-08 Although the reputation of the great German scholar Ernst Robert Curtius was firmly established for English and American readers by the translation of *European Literature and the Latin Middle Ages*, much of his work is still unknown to them. These twenty-four essays, written over a period of nearly thirty years, range widely in time and scope and consider some of the greatest figures in European literature, among them Virgil, Goethe, Balzac, Joyce, Eliot, Ortega y Gasset, and Hesse. The essays show the qualities that made Curtius one of the great critics of our age: his lucid, penetrating mind, his comprehensive erudition, his cosmopolitan outlook, and above all his passionate concern for European culture. Like T. S. Eliot, the subject of one of his finest essays, Curtius believed in an ideal order, a cultural unity of the West. The unifying element in all these essays is a concern to insure the conservation and continuance of European humanistic culture. For him this culture consisted of the literary heritage of Greece and Rome, developed and enriched by the Christian civilization of the Middle Ages. Consequently he selected for discussion those poets and writers who have been conscious of the unity of these two European currents and who have striven to maintain it in our time. As he ranged freely through the languages and literatures of all Western cultures, Curtius himself did much to preserve this tradition, to demonstrate its relevance, and insure its continuity. Originally published in 1973. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

*The Complete Weather Resource: Weather phenomena* Phillis Engelbert,1997 This readable work profiles 171 explorers and discoverers for middle-school readers. It is based on the 300 entries in *Explorers and Discoverers of the World* RBB J1 93. The geographers, oceanographers, and other assorted travelers are alphabetically arranged by best-known name with an index in each volume covering the whole set. Unfortunately, pagination is not noted on the spines of volumes. There are also indexes by country of origin and area explored. Each entry begins with birth and death dates, locations, and a sentence describing the subject's achievement ('Anne Royle Taylor, an English missionary, was the first European woman to travel in Tibet, at a time when the country was forbidden to all Westerners' ). Entries range from three to five pages, usually accompanied by a drawing or photo of the explorer. Effort has been made to include women and non-Westerners, such as Cheng Ho, Annie Smith Peck, Isabella Bird, and James Chuma, along with the well-known Stanley, Mackenzie, Cabot, and Cousteau. There are even entries for Hubble, Sputnik, and Challenger that discuss their crews collectively. The introduction makes clear that a discoverer was not necessarily 'the first human ever to have been there.' World maps are included at the beginning of the book, and area maps are part of a few entries. The text is readable and interesting for upper-elementary through middle-school students. Readers may wonder whether crossing the 'Takla Makan' means a mountain range or lake (it's Taklamakan Desert on the map), but most information is clearly presented. Unusual in a book for this age level is how frankly rivalries and hostilities are described. The reader gets a feel for how competitive Speke and Burton were and how life-threatening were journeys such as Susie Rijnhart's. Although no sources are listed, this is a worthwhile purchase where students and faculty regularly look for information on explorers.-
