Postmodernism of Resistance in Roberto Bolaño's Fiction and Poetry

J. Agustín Pastén B., 2020-12-01

Postmodernism of Resistance in Roberto Bolaño's Fiction and Poetry examines the ways in which Bolaño employs a type of literary aesthetics that subverts traits traditionally associated with postmodernism. Pastén B. coins these aesthetics "postmodernism of resistance" and argues that this resistance stands in direct opposition to critical discourses that construe the presence of hopeless characters and marginal settings in Bolaño's works as signs of the writer's disillusionment with the political as a consequence of the defeat of the Left in Latin America. Rather, he contends, Bolaño creates a fictional world comprised of characters and situations that paradoxically refuse to accept defeat—even while displaying the scars of terrible historical events. In this work Pastén B. challenges some critical assumptions about Bolaño's fiction and poetry that led to decontextualized interpretations of his work and offers a singularly comprehensive investigation that synthesizes multiple perspectives of a complicated author into one text.

Oral History and Qualitative Methodologies Thalia M.

Mulvihill,Raji Swaminathan,2022-02-24 Oral History and Qualitative Methodologies: Educational Research for Social Justice examines oral history methodological processes involved in the doing of oral history as well as the theoretical, historical, and knowledge implications of using oral history for social justice projects. Oral history in qualitative research is an umbrella term that integrates history, life history, and testimony accounts. Oral history draws from various social science disciplines, including educational studies, history, indigenous studies, sociology, anthropology, ethnic studies, women's studies, and youth studies. The book argues for the further development of a pedagogical culture related to oral history for educational research as part of the effort to diversify the range of human experiences educators, community members, and policy makers incorporate into knowledge-making and knowledge-using processes. Early career researchers, novice researchers, as well as experienced researchers are invited to join social science educational researchers in developing their own oral history projects using all of the tools, dispositions, and epistemologies affiliated with qualitative inquiry. The book will be of use in courses on qualitative research methods, history, anthropology, women's studies, and education disciplines as well as by community organizations who want to use oral history to preserve the history of communities and advance social justice projects.

Child Development Daevion Mcclain, 2019-11-07 The study of child development is of immense importance to those dealing with children, either as parents or teachers. Starting from the prenatal embryonic stage, the book traces the development of a child not only in physical field but in intellectual (cognitive), emotional (co-native), social and moral fields too, as they all make the important aspects of a child's personality. Besides, the role of nature and nurture has been highlighted since the prenatal stage to that of adolescence. Child development refers to the sequence of physical, language, thought and emotional changes that occur in a child from birth to the beginning of adulthood. During this process a child progresses from dependency on their parents/guardians to increasing independence. Child development is strongly influenced by genetic factors (genes passed on from their parents) and events during prenatal life. It is also influenced by environmental facts and the child's learning capacity. Child development can be actively enhanced through targeted therapeutic intervention and the 'just right' home based

practice, recommended by Occupational Therapists and Speech Therapists. Child development refers to the biological and psychological changes that occur in human beings between birth and the end of adolescence, as the individual progresses from dependency to increasing autonomy. Because these developmental changes may be strongly influenced by genetic factors and events during prenatal life, genetics and prenatal development are usually included as part of. The study of child development. This book is intended to ease the task faced by researchers, instructors, and students who are confronted by the vast amount of research and theoretical discussion in child development and behaviour.

Critical Issues in Early Literacy Yetta Goodman, Prisca Martens, 2020-07-24 This volume adds in important ways to understanding the power and complexity of the forces in the lives of children that impact their literacy learning. The critical issues presented emerge from interpretivist research and thinking practices that are constructivist in nature. The chapters by researchers, teacher researchers, teacher educators, and teachers are antidotes to the present political context in which political agendas are being used to define literacy, literacy teaching and learning, and literacy research in narrow ways. Providing a rich source of information about how young children come to know reading and writing as a tool of communication in a range of social and cultural contexts, this book: *presents current research and thinking in the field; *documents research that is currently being ignored by many who make decisions about children's learning; *values who children are and what they bring with them to school; *provides a useful tool for advocacy and for social action toward improving education in ways that can make a difference in the lives of young children; and *raises thoughtful issues for discussion. Critical Issues in Early Literacy is essential reading for early childhood teachers and prospective teachers, for teacher educators, for literacy researchers (including teacher

researchers), for special educators, for those working with English-language and foreign-language learners, and for early childhood education administrators, advocates, and policy makers.

Engaged Research and Practice Betty Overton, Penny A. Pasque, John C. Burkhardt, 2023-07-03 What practices can researchers use to gain a more nuanced understanding of educational issues in the community and be part of the solution to those issues? Engaged Research and Practice is about two prevailing and complementary ideas that have surfaced in the higher education arena: engaged research and higher education for the public good. Engaged research is scholarship that not only attempts to open up new knowledge, but it does so with a sense that the new knowledge, insight and directions have a direct relationship to needs and problems within our communities, institutions, and policy arenas. Engaged, actionable, or participatory research and scholarship attempts to tackle the identified issues of our communities and society. This handbook offers important insights and tangible examples of how higher education leaders may work directly with communities and in policy settings to understand the deeper meanings often lost in conversations about educational opportunity. Each chapter addresses the ways in which faculty, community and administrative leaders may connect research and practice through unique research projects. The authors offer clear explanations of how their engaged research was conducted to illustrate explicit pathways for practitioners. This book also includes short narratives where authors involved with this research reflect on their experiences and the lessons they have learned while immersed in community and policy related work.

The Corn Woman Angel Vigil, 1994-09-15 The culture, history, and spirit of the Hispanic Southwest are brought to readers through this fascinating collection of 45 cuentos (stories and legends) from the region. From ancient creation myths of the

Aztecs and traditional tales of Spanish colonialists to an eclectic sampling of the work of modern Latino storytellers, this book provides a rich tapestry of both obscure and well-loved stories—religious stories; animal tales; stories of magic, transformation, and wisdom; and chistes (short comic tales). Fifteen tales are also presented in Spanish. The origin and historical development of the stories are examined in an introductory chapter. A discussion of dichos (proverbs) and adivinanzas (riddles) illuminates the larger context of the oral tradition in which the tales have flourished. Lavishly illustrated with pictures of original paintings and sculpture by contemporary Latino artists, this fascinating collection will appeal to children and adults alike and is a must for the multicultural class.

Ethnocultural Diversity and the Home-to-School Link

Christine M. McWayne, Fabienne Doucet, Susan M.

Sheridan, 2019-05-09 This book explores family-school partnerships and how they can be most effectively leveraged to ensure academic success for students from socioculturally diverse backgrounds. It presents an innovative framework for building collaborative learning partnerships with culturally diverse families, for improved student achievement and more meaningful ties between schools and their communities. It promotes understanding of familial and communal knowledge and recognizing families' resilience in addressing academic, social, and linguistic barriers. Chapters reimagine family-school partnerships within a context of shared power and authority, examine a spectrum of interventions that support culture-based modes of learning, and emphasize the potential for transformative learning to occur when students' out-of-school lives are understood and meaningfully leveraged in school. Chapters also discuss how to foster bridges between parents and teachers, provide teachers with access to the rich cognitive and cultural resources of families, and enable all parties to begin viewing families as truly equal partners in children's education. The book concludes with a commentary chapter that identifies necessary areas for further research. Topics featured in this volume include: The contribution of racial and ethnic socialization to family-school partnerships during early childhood. Fathers and their role in family-school partnerships. The importance of Indigenous family engagement in systems of education. Home-school partnerships and mixed-status immigrant families in the United States. Family-school partnership research with the migrant and seasonal farm working community. The role of humility in working with families across international contexts. Interventions that promote home-to-school links. Ethnocultural Diversity and the Home-to-School Link is a must-have resource for researchers, professionals, and graduate students in education, child and school psychology, educational policy and politics, family studies, developmental psychology, sociology of education, and anthropology.
