David A. Anderton

Consolidated B-24 Liberator Graham M. Simons, 2012-08-19 The Consolidated B-24 Liberator was almost certainly the most versatile Second World War Bomber. Apart from its bombing role in all theaters of operation, the B-24 hauled fuel to France during the push towards Germany, carried troops, fought U-boats in the Atlantic and, probably most important of all, made a vital contribution towards winning the war in the Pacific. Its most famous single exploit is possibly the raid on the Ploesti oil fields in August 1943. The B-24 ended World War Two as the most produced Allied heavy bomber in history, and the most produced American military aircraft at over 18,000 units, thanks in large measure to Henry Ford and the harnessing of American industry. It still holds the distinction as the most produced American military aircraft. The B-24 was used by several Allied air forces and navies, and by every branch of the American armed forces during the war, attaining a distinguished war record with its operations in the Western European, Pacific, Mediterranean and China-Burma-India theaters. This book focuses on the design, engineering, development and tactical use of the many variants throughout the bombers service life. The overall result is, as David Lee, the former Deputy Director of the Imperial War Museum at Duxford said upon reading the final manuscript, to be acquainted with ...all you never knew about the B-24! The book is enlivened by the many dramatic photographs which feature, and this coupled with the clarity of Simons' prose makes for an engaging and entertaining history of this iconic Allied bomber, a key component in several of their biggest victories and a marvel of military engineering.

The Greatest Capitalist Who Ever Lived Ralph Watson McElvenny, Marc Wortman, 2023-10-24 The

enduring story of Thomas Watson Jr.—a figure more important to the creation of the modern world than Rockefeller, Vanderbilt, and Morgan Nearly fifty years into IBM’s existence, Thomas Watson Jr. undertook the biggest gamble in business history when he “bet the farm” on the creation of the IBM System/360, the world’s first fully integrated and compatible mainframe computer. As CEO, Watson drove a revolution no other company—then or now—would dare, laying the foundation for the digital age that has transformed every society, corporation, and government. The story of Watson being “present at the creation” of the digital age is intertwined with near-Shakespearean personal drama. While he put IBM and its employees at risk, Watson also carried out a family-shattering battle over the future of the company with his brother Dick. This titanic struggle between brothers led to Dick’s death and almost killed Watson Jr. himself. Though he was eventually touted by Fortune magazine as “the greatest capitalist who ever lived,” Watson’s directionless, playboy early years made him an unlikely candidate for corporate titan. How he pulled his life together and, despite personal demons, paved the way for what became a global industry is an epic tale full of drama, inspiration, and valuable lessons in leadership, risk-taking, and social responsibility.

The Six Dimensions of Project Management Michael S. Dobson PMP, Heidi A. Feickert, 2007-06-01
Master the Six Dimensions of the Project Management Universe! Learn how to turn constraints into resources to achieve project objectives! Through case studies and practical exercises, *The Six Dimensions of Project Management* demonstrates the six possible combinations (or dimensions) of the “hierarchy of constraints (time, cost, and performance existing in a hierarchy of driver, middle and weak constraint) and

the specific set of challenges and opportunities associated with each. Project managers will learn how to recognize a project's dimension and, by understanding its set of problems and resources, get the job done on time, on budget, and to spec! You will uncover hidden flexibility, unlock valuable new resources, discover threats before they turn into problems, and win the admiration of customers and projects sponsors alike. You'll learn: •How to use the “inner purpose” of a project to empower project managers and team players •Why certain kinds of failure point the way to higher levels of success •What creates opposition to your project—and how to leverage it for your benefit •Where to look to find creative opportunities on every project

Pacific Warbird Bob Hamilton, Robert H. Hamilton, 1999 This book was written to tell a good story about one man's adventures overseas in World War II. The author, a young navigator on a ten-man B-24 bomber crew, flew with the Thirteenth Air Force (the Jungle Air Force) in the southwest Pacific during most of 1945, the final year of World War II. He flew twenty-four combat bombing missions against Japanese targets from New Guinea to Formosa (Taiwan) before we won the war. This book is his memoir of that period. **STYLE:** This book was written to read like a novel, to enhance the story-telling aspect of the memoir. The novelistic style is part of a fairly new genre called creative nonfiction or dramatic nonfiction, which adds interest to nonfiction accounts. The dialogs, of course, were created by the author, since there were no tape recorders in 1945. There are no fictional characters in this book. All the names mentioned were real people, really present at that time. **DOCUMENTATION:** It may read like a novel, but this book is not fiction. It is solidly grounded in fact, based first of all on the memories of the author and other

veterans of his bomber crew, or their squadron or bomb group, who have shared their memories with him. It is also documented by official Air Force historical records, squadron histories written at the time and classified secret until 1983, when they were declassified. The author made several trips to the Air Force Historical Research Agency at Maxwell Air Force Base, Montgomery, Alabama, and photocopied some 500 pages of relevant records from World War II. The story is further documented by the original letters written by the author to his family and friends, which are now in his files, and by photographs given him by members of his crew, many of which appear in the book.

COMING OF AGE: In a letter written to his parents on September 3, 1943, at the end of his army pre-cadet training at Knox College, the author (age 18) wrote: Its been an interesting three months Ive spent here. Ive learned a lot, not just about math and physics, but about men, and girls, and people, and life. Edgar Guest said, It takes a heap o livin to make a house a home, well, I think it takes a heap o livin to make a boy a man. Im beginning to get some of that living here. Im beginning to find out what men are really like, how they treat each other, and how they get along with each other. I think thats one of the few big rewards of army lifelearning how to get along with all sorts of people. This book tells more about the heap o livin to make a boy a man, hence its subtitle, *Coming of Age in World War II*.

PROFANITY: Since the book was written for family readership, the author tried to clean up the language by eliminating most of the casual profanity which characterized military dialog. Some profanity was retained to emphasize moments of tension or high drama, where it was needed for realism.

PLOT AND TOPICS: The story begins with an exciting bombing raid over Borneo, and flashes back to the crew flying off to war from California to the South Pacific in March 1945. It ends with

their return to California eight months later, after the war was won. During the time overseas, the narrator, Bob Hamilton, copes with adventures in the air, in the jungle, in a life raft, and in the officers club. He wrestles with the morality of war, the grief of losing friends in combat, and the need to sort out his love for three girl friends. The chapter titles tempt readers throughout the story:

Norwich in the Second World War Neil R Storey,2022-02-17 Norwich in the Second World War is the story of the city and its people, both civilian and military, from the construction of the first air raid shelters in 1938 through to VE Day in 1945 and the return of Far Eastern prisoners of war in 1946. Featuring first-hand accounts of what happened when enemy bombers raided the city, notably during the notorious Baedeker Blitz of 1942, rare photographs and documents make this book a must for anyone who knows and loves the city of Norwich.

History of the U.S. Air Force David A. Anderton,1989 Text and photographs chronicle the history of the Air Force from its earliest days as a balloon unit during the Civil War to the present.

War in the Pacific Bernard C. Nalty,1999 The collective effort of ten military historians describes World War II's Pacific campaign, describing each step of the conflict with clarity and in exhaustive detail. Color maps. Photos, many in color.

The Dakota Hunter Hans Wiesman,2015-03-19 A tale of a lifelong passion for a WWII aircraft that changed the author's life: "It is almost like an adventure novel except it is true" (Air Classics). This book tells the story of a Dutch boy who grew up during the 1950s in postwar Borneo, where he had frequent

encounters with an airplane, the Douglas DC-3, a.k.a. the C-47 Skytrain or Dakota, of World War II fame. For a young boy living in a remote jungle community, the aircraft reached the proportions of a romantic icon as the essential lifeline to a bigger world for him, the beginning of a special bond. In 1957, his family left the island and all its residual wreckage of World War II, and he attended college in The Hague. After graduation, he started a career as a corporate executive—and met the aircraft again during business trips to the Americas. His childhood passion for the Dakota flared up anew, and the fascination pulled like a magnet. As if predestined, or maybe just looking for an excuse to come closer, he began a business to salvage and convert Dakota parts, which meant first of all finding them. As the demand for these war relic parts and cockpits soared, he began to travel the world to track down surplus, crashed, or derelict Dakotas. He ventured deeper and deeper into remote mountains, jungles, savannas, and the seas where the planes are found, usually as ghostly wrecks but sometimes still in full commercial operation. In hunting the mythical Dakota, he often encountered intimidating or dicey situations in countries plagued by wars or revolts, others by arms and narcotics trafficking, warlords, and conmen. The stories of these expeditions take the reader to some of the remotest spots in the world, but once there, one is often greeted by the comfort of what was once the West's apex in transportation—however now haunted by the courageous airmen of the past.

The B-17 - The Flying Forts Martin Caidin, 2010-09-15 There is no such thunder in history -- nor ever will be again -- as the deep-throated roar of the mighty, four-engined B-17s that streamed across the skies in World War II. The long runways are silent now, the men and planes are gone. But out of the massive

files of records available, and the memories of the men who flew, Martin Caidin has assembled this dramatic portrait of America's most formidable heavy bomber of the war. The B-17: The Flying Forts recreates a vanished era and a great and gallant plane -- a plane that could absorb three thousand enemy bullets, fly with no rudder, and complete its mission on two engines. A plane that American pilots flew at Pearl Harbor, Tunis, Midway, Palermo, Schweinfurt, Regensburg, Normandy, and Berlin, in thousands of missions and through hundreds of thousands of miles of flak-filled skies. A plane that proved itself in every combat theater as the greatest heavy bomber of World War II.

Strides Towards Standard Methodologies in Aeronautical Archaeology Hunter W. Whitehead, Megan

Lickliter-Mundon,2023-11-07 This volume presents a subfield overview on current research, trends, and commentary on the state of aeronautical archaeology and its development, through selections from a session on aviation archaeology at the 2020 Society for Historical Archaeology Conference. It serves to highlight those practices and projects that take strides towards standard methodologies in aeronautical archaeology. This book involves the study of aircraft crash sites, airfields, battlefields, and buildings or structures related to aviation. High profile sites and topics in this book include Lake Mead's B-29 Superfortress, Tuskegee Airmen in Michigan, and patterns of preservation in WWII aircraft and their importance. A relatively new field, aeronautical archaeology is the sub-field of archaeology that examines past human interaction with flight. The authors aim to create more awareness for aviation cultural heritage projects and the associated community of scholars, practitioners, and enthusiasts. This volume includes contributions from leading global scholars through varied scientific inquiries, summaries of site investigations, and conservation techniques of aeronautical heritage.

The Freckleton, England, Air Disaster James R. Hedtke,2014-06-24 The Freckleton catastrophe of August 23, 1944, occurred when an American B-24 Liberator crashed into the small village of Freckleton in northwest England. The plane was on a test flight when it encountered a rare and severe summer thunderstorm. Air traffic control at the American air base Warton recalled the bomber back to the base. When the pilot attempted to abort the landing because of poor visibility and high winds, a downdraft caught the plane and it crashed into the adjacent village of Freckleton. As the B-24 tumbled through the village, destroying three houses and a snack bar, flames erupted from wreckage and engulfed Holy Trinity

grade school. Before the fire could be brought under control, the holocaust destroyed an entire generation of children in this village of fewer than 1,000 inhabitants. The village would never be the same. In a compelling account of sorrow, loss, hope and finally rebirth, the book looks at the history of the village, the establishment of the base at Warton, the crash, the funeral of the 61 victims, the official British inquest and the American investigation into the cause of the crash. The lives of the survivors, the servicemen and the villagers are followed through 2012.
