### **Consolidated B-24 Liberator** Edward

Shacklady, 2002 Although overshadowed, to a large extent, by the B-17 Flying Fortress the B-24 Liberator was made in greater quantity, and used by more Allied air forces on every front of the Second World War. The first operational models were used by the Royal Air Force as a transport on the North Atlantic ferry service. The RAF Liberator I, used both as a bomber in North Africa and as a long-range Coastal Command patroller, had ASV (air-to-surface vessel) radar and four 20mm cannons. Its armament was greatly improved when powered turrets in the tail and mid-upper positions were incorporated into the Liberator II. As a heavy bomber it saw service in the Pacific with the USAAF; in North Africa and Italy with the RAF and USAAF. Specially equipped Liberators were also used to drop agents and equipment in Occupied Europe on behalf of the OSS (Office of Strategic Service), SOE (Special Operations Executive) and SIS (Secret Intelligence Service, also known as MI6).

### **B-24 Liberator Units of the Fifteenth Air Force**

Robert F Dorr, 2012-12-20 The B-24 was heavily utilised in the North African and Mediterranean theatres by the USAAF's Fifteenth Air Force, with operations over the Ploesti oilfields in Rumania being some of the most famous missions undertaken by the big American 'heavy' in World War 2. The stirring work of the Fifteenth Air Force is often overshadowed by the glamorous 'Mighty Eighth', yet the men flying the B-24 fought ceaselessly right through to VE Day. This is the third of five titles planned to chart the operational history of the Consolidated heavy bomber, and is the first single volume to exclusively cover the Fifteenth Air Force's B-24 units.

### **B-24 Liberator Units of the Eighth Air Force**

Robert F Dorr, 2012-12-20 The B-24 Liberator was

built in greater numbers than any other US warplane, yet its combat crews live, even today, in the shadow of the less plentiful, but better-known, B-17. Accounts of the 'Mighty Eighth' in Europe, and indeed many of the books and films that emerged from the greatest air campaign in history, often overlook the B-24, even though it was in action for as long as the Flying Fortress, and participated in just as many perilous daylight bombing missions.

**B-24 Liberator Units of the Pacific War** Robert F Dorr, 2012-12-20 Ever present in the Pacific from Pearl Harbor to VJ-Day, the B-24 Liberator proved to be the staple heavy bomber of the campaign. From its ignominious beginnings in the Allied rout in the Philippines and the Dutch East Indies, the bomber weathered the Japanese storm with a handful of bomb groups, which played a crucial role in checking the enemy's progress firstly in New Guinea, and then actively participating in the 'island hopping' campaign through the south-west Pacific.

B-24 Liberators of the 15th Air Force/49th Bomb Wing in World War II Michael D. Hill, Mike Hill, John R. Beitling, 2006 The first in a planned series that presents the B-24 Liberators used by the 15th Air Force in World War II, noted B-24 historians Robert Beitling and Mike Hill present for the first time the biographies of the individual B-24s used by the 451st, 461st and 484th Bomb Groups of the 49th Bomb Wing in Italy. As much information as is known about the individual aircraft is presented in biographical form: serial number, nickname, how the aircraft received its nickname, number of missions, original aircraft for the groups, and the ultimate fate of the aircraft. The volume will be of interest to historians, veterans and those who are interested in the B-24s that flew in the flak filled skies of the Third Reich.

## **B-24 Liberator Units of the CBI** Edward M.

Young, 2012-11-20 The B-24 Liberator was the mainstay of the US Army Air Force's strategic bombing effort in the China-Burma-India (CBI) Theatre from 1942 until the end of the war in 1945. With longer range and a greater load-carrying capacity than the B-17, the B-24 was well-suited to the demands of the CBI. The CBI's two air forces, the Tenth in India and the Fourteenth in China, each had one heavy bomb group equipped with Liberators. These two groups, the 7th and the 308th, carried the war to the Japanese across China and South East Asia, flying over some of the most difficult terrain in the world. The 308th had the added burden of having to carry its own fuel and bombs over the Himalayan 'Hump' from India to China in support of its missions. Despite the hardships and extreme distances from sources of supply, both units compiled a notable record, each winning two Distinguished Unit Citations.

**Consolidated B24** David Doyle, 2019-05-28 The B-24 Liberator remains to this day the world's most produced heavy bomber and multi-engine aircraft, and the most-produced military aircraft in US history, with almost 19,000 examples leaving the assembly lines of five plants. Through a broad range of photos gathered from around the world, this book, the second of two volumes on the B-24, chronicles the design, development, and wartime use of the iconic late-production aircraft, featuring gun turrets on the nose. The story of these iconic WWII aircraft is told through carefully researched photos, many never before published, which are reproduced in remarkable clarity. Large, clear images, coupled with descriptive and informative captions, unlock the secrets of this aircraft. Part of the Legends of Warfare series.

Consolidated B-24 Vol. 1 David Doyle, 2018-10-28 The B-24 Liberator remains to this day the world's

most-produced heavy bomber and multi-engine aircraft, and the most produced military aircraft in US history, with almost 19,000 examples leaving the assembly lines of five plants. Through a broad range of photos gathered from around the world, this book chronicles the design, development, and wartime use of the iconic early models of the B-24--those featuring the so-called glass nose--from the assembly line to their use in the famous raid on the refineries at Ploesti, Romania, in 1943. The story of these iconic early WWII aircraft is told through carefully researched photos, many of which have never before been published, which are reproduced in remarkable clarity. Large clear photos, coupled with descriptive and informative captions, unlock the secrets of this aircraft. Part of the Legends of Warfare series.

**The Wild Blue** Stephen E. Ambrose, 2001-08-14  
Stephen E. Ambrose, acclaimed author of *Band of Brothers* and *Undaunted Courage*, carries us along in the crowded and dangerous B-24s as their crews fought to destroy the German war machine during World War II. The young men who flew the B-24s over Germany in World War II fought against horrific odds, and, in *The Wild Blue*, Ambrose recounts their extraordinary heroism, skill, daring, and comradeship with vivid detail and affection. Ambrose describes how the Army Air Forces recruited, trained, and selected the elite few who would undertake the most demanding and dangerous jobs in the war. These are the boys-turned pilots, bombardiers, navigators, and gunners of the B-24s—who suffered over fifty percent casualties. With his remarkable gift for bringing alive the action and tension of combat, Ambrose carries us along in the crowded, uncomfortable, and dangerous B-24s as their crews fought to the death through thick black smoke and deadly flak to reach their targets and destroy the

German war machine. Twenty-two-year-old George McGovern, who was to become a United States senator and a presidential candidate, flew thirty-five combat missions (all the Army would allow) and won the Distinguished Flying Cross. We meet him and his mates, his co-pilot killed in action, and crews of other planes. Many went down in flames. As *Band of Brothers* and *Citizen Soldiers* portrayed the bravery and ultimate victory of the American soldiers from Normandy on to Germany, *The Wild Blue* illustrates the enormous contribution that these young men of the Army Air Forces made to the Allied victory.

**Witchcraft** Kenny Kemp, 2017 The first book in the Warbird Flightline series celebrates the Collings Foundation's *Witchcraft*, the last flying exemplar of the B-24 Liberator bomber. Unlike other walk-around books, *Witchcraft: B-24 Liberator* not only gets into the weeds of aircraft systems and stations, but also soars aloft for a bird's-eye view of the historical context in which the aircraft flew: a world on the brink of war, the desperate need for a long-range, heavy bomber, and just one American company capable of putting what became the world's most advanced aircraft into production in just nine short months. The legendary Liberator flew in every theater of the war, dropped more bombs than any other, and literally won the war in the Pacific, only to have its thunder stolen when the Boeing B-29 Superfortress was chosen to drop the atom bomb on Japan, thus ending the war and at the same time bringing the too-short lifespan of this unique and unsung hero to a close.

*Log of the Liberators* Steve Birdsall, 1973-01-01 Beretter om det amerikanske bombefly B-24 Liberator og indsatsen under 2. verdenskrig

Beneath Haunted Waters Peter Stekel, 2017-09-30 Drama. Tragedy. Irony. Unsolved mysteries. And throw in a little greed. *Beneath Haunted Waters* is

not a ghost story; it's not that kind of "haunted" at all. These are waters haunted by generations of people who cannot forget the story of how two B-24 Liberator bombers disappeared in 1943 and what happened to the boys on board. During the World War II years, the convention was to call young men in their late teens to their late 20s, "boys." The boys who piloted bombers and fighter aircraft during World War II were 19 or 20 years old - barely out of their childhood. Imagine boarding a 737 today and seeing a teenager at the controls instead of a person with greying temples. That was the situation during the war. Beneath Haunted Waters is a story about that era, when children flew large airplanes equipped with enough firepower to destroy cities. And yet, boys they were, and boys they will always be. But it's primarily a story of how they died, not in combat, but by accident. During World War II the USA lost 7100 combat aircraft and 5300 trainers, along with 15,530 pilots, crew members, and ground personnel in over 52,000 domestic accidents. These statistics don't compare to the huge numbers of RAF, 8th Air Force, and Luftwaffe losses during the European air war but the numbers are still frightening: Between 1942-1945, US aviation losses to accidents (12,400) exceeded combat losses (4500) to the Japanese. For every plane shot down in the South Pacific there were three lost to accidents within the United States. While memoirs of those who served, histories of military and political leaders, and books about combat abound, very little has been written about the terrible toll of aviation training accidents during the war. Beneath Haunted Waters is unique because it tells this hardly known and little appreciated story. Most information on this subject is covered in official reports. It appears in a casual way in many memoirs. There are a few histories of the air war during World War II that mention aviation

accidents during training or once the boys were in theater. There has been no popular, academic, or comprehensive book on the subject. I propose to cover this subject within the more personal story of what happened to the two Liberators that wound up in Huntington Lake and Hester Lake. Usually, pilots and crews of World War II aircraft were neither old enough to vote nor to drink. Many had never driven a car or taken a train ride much less been in an airplane. Nine months after enlistment they were flying the most technologically advanced, high performance, machines ever built. The same could be said for their navigation equipment and radio gear. But aviation had been around for only 40 years! Aircraft design was still in its infancy. Engines failed, pilots flew into mountains, navigators got lost, radios broke, and weather forecasts were frequently and fatally wrong.

*Consolidated B-24 Liberator* Frederick A. Johnsen, 1996 One of a series of books designed for the layman which looks at military aircraft that have recently arrived in the marketplace. Special emphasis is placed on the design and performance aspects of the aircraft and detailed technical specifications are included.

**Consolidated B-24 Liberator** Graham M. Simons, 2012-08-19 The Consolidated B-24 Liberator was almost certainly the most versatile Second World War Bomber. Apart from its bombing role in all theaters of operation, the B-24 hauled fuel to France during the push towards Germany, carried troops, fought U-boats in the Atlantic and, probably most important of all, made a vital contribution towards winning the war in the Pacific. Its most famous single exploit is possibly the raid on the Ploesti oil fields in August 1943. The B-24 ended World War Two as the most produced Allied heavy bomber in history, and the most produced American military aircraft at

over 18,000 units, thanks in large measure to Henry Ford and the harnessing of American industry. It still holds the distinction as the most produced American military aircraft. The B-24 was used by several Allied air forces and navies, and by every branch of the American armed forces during the war, attaining a distinguished war record with its operations in the Western European, Pacific, Mediterranean and China-Burma-India theaters. This book focuses on the design, engineering, development and tactical use of the many variants throughout the bombers service life. The overall result is, as David Lee, the former Deputy Director of the Imperial War Museum at Duxford said upon reading the final manuscript, to be acquainted with ...all you never knew about the B-24! The book is enlivened by the many dramatic photographs which feature, and this coupled with the clarity of Simons' prose makes for an engaging and entertaining history of this iconic Allied bomber, a key component in several of their biggest victories and a marvel of military engineering.

No Way Out Steven R. Whitby, 2020-10-28 It was the first and only combat mission for the B-24 Liberator Lady Be Good. On April 4, 1943, she left her base on the North African coast of Libya to bomb the port city of Naples, Italy. She never returned to base. It was not until the spring of 1959 that Lady Be Good was discovered by a BP oil exploration team almost 500 miles deep in the Libyan Desert, virtually intact, with no trace of the crew. What happened to the Lady Be Good is explored in this book. This includes the search for the crew and the subsequent mission to find the two US Army personnel lost during the initial search. The author interviewed personnel who took part in the recovery effort, and has included many unpublished photos taken at the crash site during the first USAF visit in 1959.

**B-24 Liberator** Frederick A. Johnsen, 1999 \* The not-to-be-missed, triumphant story of the B-24 Liberator bomber--the most heavily produced American military aircraft ever--told through veterans' priceless first-person recollections and snapshots \* Defines the B-24's role in winning WWII, drawing on Air Force archival records and combat photos \* Covers technical innovations of the V-24: the tricycle landing gear, as well as a sophisticated airfoil and flap design

**Vanishing Point** Tom Wilber, 2023-05-15 In Vanishing Point, award winning journalist and author Tom Wilber pieces together the largely forgotten story of the bomber, Getaway Gertie, and an eclectic group of enthusiasts who have spent years searching for it. At the height of World War II, a B-24 Liberator bomber vanished with its crew while on a training mission over upstate New York. The final hours and ultimate resting place of pilot Keith Ponder and seven other US aviators aboard the plane remain mysteries to this day. The tale is at once a compelling instance of loss on the World War II American home front and a more extensive, largely unreported history. Ponder-a 21-year-old from rural Mississippi-and his crew were tragically unexceptional casualties in the monumental effort to recruit and train an air force en masse to counter the global conquest of Nazi Germany and Imperial Japan. More than fifteen thousand American airmen and, in some cases, women burned, crashed, or fell to their deaths in stateside training accidents during the war-their lives and stories shuffled away in piles of Air Force bureaucracy. The forgotten story of Getaway Gertie was originally inspired by summer evenings around the campfire on the shores of Lake Ontario, where parts of the plane have washed up. Building on those campfire tales, Wilber deftly connects myth with fact and memory with historicity. The result is a vivid portrait of the forgotten

soldier of the home front and a new take on the meaning of wartime sacrifice as the last survivors of the Greatest Generation pass away.

**Under the Southern Cross** Bob Livingstone, 1998  
Follow Australian author, Bob Livingstone as he follows the B-24 Liberator as it arrives in Australia during the turning point of the war against Japan and enables attacks to penetrate deep into Japanese held territory. The B-24 was the most numerous USAAF heavy bomber based in Australia and New Guinea in the most desperate phase of the Pacific War, and the first four-engine heavy bomber to serve with Royal Australian Air Force home squadrons. Includes many never before published photographs and an index.

**Reuben Fleet** William Wagner, 1976

**The Final Flight of Maggie's Drawer** Ray E. Zinck, 1998-06-15  
The Final Flight of Maggie's Drawers is the true story of Joe Maloney, a B-24 tail gunner during WWII. His story unfolds as he describes, in detail, life in the military, from living in a tent city to countless bombing runs over Nazi-held Europe.
