Reading Bridal Magazines from a Critical Discursive Perspective E. Glapka, 2014-09-04 Bridal magazines have become increasingly popular in Western society, proliferating the idea of a 'princess bride' on her 'big day'. Yet little has been written on how the ever-expanding wedding media and the popular wedding culture constructs gender and affects the ways women live and experience their weddings. Offering a critique of contemporary wedding discourse, this book marries together analyses of media texts and their reception to propose a new approach to media discourse. The analysis richly illustrates how women are invited to embrace not only the stereotypical idea of bridal femininity but also a consumptive way of experiencing it. Through examination of brides' accounts of their 'big days', the book observes the imprints of the popular gender imagery on their self-portraits and self-narratives, and describes the women's diverse approaches to them. Based on insights from gender and critical discourse studies, sociology and audience research, this exploration illuminates the ongoing debate on 'media and gender' and its methodological approaches.

Stochastic Optimization Models in Finance W. T. Ziemba, R. G. Vickson, 2014-05-12 Stochastic Optimization Models in Finance focuses on the applications of stochastic optimization models in finance, with emphasis on results and methods that can and have been utilized in the analysis of real financial problems. The discussions are organized around five themes: mathematical tools; qualitative economic results; static portfolio selection models; dynamic models that are reducible to static models; and dynamic models. This volume consists of five parts and begins with an overview of expected utility theory, followed by an analysis of convexity and the Kuhn-Tucker conditions. The reader is then introduced to dynamic programming; stochastic dominance; and measures of risk aversion. Subsequent chapters deal with separation theorems; existence and diversification of optimal portfolio policies; effects of taxes on risk taking; and two-period consumption models and portfolio revision. The book also describes models of optimal capital accumulation and portfolio selection. This monograph will be of value to mathematicians and economists as well as to those interested in economic theory and mathematical economics.

Advances in Cryogenic Engineering Peter Kittel, 2012-12-06 The Albuquerque Convention Center was the venue for the 1993 Cryogenic Engineering Conference. The meeting was held jointly with the International Cryogenic Materials Conference. Walter F. Stewart, of Los Alamos National Laboratory, was conference chairman. Albuquerque is near Los Alamos National Laboratory which has been a significant contributor to the cryogenics community since the early days of the Manhattan Project. Albuquerque is also the home of the Air Force's Phillips Laboratory which has a lead role in developing cryocoolers. The program consisted of 322 CEC papers, more than a 30% increase from CEC-91 and 20% more than CEC-89. This was the largest number of papers ever submitted to the CEC. Of these, 249 papers are published here, in Volume 39 of Advances in Cryogenic Engineering. Once again the volume is published in two books. This volume includes a cumulative index for the CEC volumes from 1975-1993 (volumes 21, 23, 25, 27, 29, 31, 33, 35, 37, and 39 of Advances in Cryogenic Engineering). The first 20 volumes are indexed in Volume 20. A companion cumulative index for the ICMC volumes (volumes 22 through 40) appears in Volume 40. This is my first volume as editor. I would not have been able to have done it without the assistance of the many reviewers. Especially appreciated was the instruction manual left me by the previous editor, Ron Fast.

The Long and the Short of It Peter Anthony Barbieri,2018-01-09 What does it mean to have a personality that is slightly skewed? I am not speaking of a personality that throughout its earthly tenure exhibits qualities of excess, be they psychosomatic, psychotic, delusional, or narcissistic; I am speaking of a personality that on occasion, given the depth of emotional entrapment, takes matters to the edge of predictable behavior and beyond, thus shedding light on the darkness lurking within. Although these qualities might, at times, apply to some or all of the main characters here, they primarily serve as the necessary, yet impure, ingredients for the alchemists journey; as such, they point out the twists and turns of hints and allusions, the oddness of the plots, and, of course, the suggestion of larger, more intangible issues. In The Long and the Short of It, character impuritiesand our rigorous attempt to sublimate and repress themare subtle reminders of the cosmic hoop through which we jump to keep our world ordered and sane.

The Bicycling Big Book of Cycling for Women Selene Yeager,Editors of Bicycling Magazine,2015-09-15 It's a fact: Women are built differently than men. That means that women's bodies react differently to training, nutrition, and sometimes even riding itself. Yet most bicycling books are written without addressing any of these differences. This comprehensive cycling book addresses how to gear up and prepare for any goal--whether you want to ride for pleasure, complete your first 100 miles, or line up at a race. Top professional cyclist Selene Yeager has teamed up with the editors of Bicycling magazine to create The Bicycling Big Book of Cycling for Women, an easy-to-follow instructional manual geared specifically toward women and their unique needs. It breaks down the sport of cycling into easily digestible sections, beginning with the history of women's cycling and progressing into equipment, lifestyle, technique, training, fitness goals, nutrition, maintenance, and more. The book also includes a women-specific section regarding hormones and exercise performance, cycling while menstruating, cycling while pregnant, how menopause affects your training, and how specific parts of the female body are uniquely affected by cycling. The Bicycling Big Book of Cycling for Women is an indispensable, lifelong guide for every female cyclist.
