A Perfect Moral Storm Stephen M. Gardiner, 2013-03-21 Climate change is arguably the great problem confronting humanity, but we have done little to head off this looming catastrophe. In *The Perfect Moral Storm*, philosopher Stephen Gardiner illuminates our dangerous inaction by placing the environmental crisis in an entirely new light, considering it as an ethical failure. Gardiner clarifies the moral situation, identifying the temptations (or storms) that make us vulnerable to a certain kind of corruption. First, the world's most affluent nations are tempted to pass on the cost of climate change to the poorer and weaker citizens of the world. Second, the present generation is tempted to pass the problem on to future generations. Third, our poor grasp of science, international justice, and the human relationship to nature helps to facilitate inaction. As a result, we are engaging in willful self-deception when the lives of future generations, the world's poor, and even the basic fabric of life on the planet is at stake. We should wake up to this profound ethical failure, Gardiner concludes, and demand more of our institutions, our leaders and ourselves. This is a radical book, both in the sense that it faces extremes and in the sense that it goes to the roots. –Notre Dame Philosophical Reviews The book's strength lies in Gardiner's success at understanding and clarifying the types of moral issues that climate change raises, which is an important first step toward solutions. –Science Magazine Gardiner has expertly explored some very instinctual and vitally important considerations which cannot realistically be ignored. –Required reading. –Green Prophet Gardiner makes a strong case for highlighting and insisting on the ethical dimensions of the climate problem, and his warnings about buck-passing and the dangerous appeal of moral corruptions hit home. –Times Higher Education Stephen Gardiner takes to a new level our understanding of the moral dimensions of climate change. *A Perfect Moral Storm* argues convincingly that climate change is the greatest moral challenge our species has ever faced - and that the problem goes even deeper than we think. –Peter Singer, Princeton University

Nordic Explorations John Fullerton, Jan Olsson, 1999 *Nordic Explorations: Film Before 1930* includes twenty previously unpublished essays written for the 1999 retrospective of Nordic cinema at la Giornate del Cinema Muto in Italy. It brings together leading research on early cinema in Denmark, Finland, Norway and Sweden, and includes essays on some of the major figures in Nordic cinema including Dreyer, Christensen, Sjöström and Stiller. Much current research in Nordic film before 1930 is also represented in this anthology with studies of the Norwegian travel genre, Nordic animated film, the relation of Nordic cinema to German and Russian film, the development of educational cinema and industrial film, as well as studies of individual films, filmmakers and national styles, and the relation of the medium to other forms of popular entertainment. The essays make a timely contribution to the more general study of cinema, afford authoritative and stimulating insight into research in the field and challenge many assumptions regarding Nordic cinema before 1930.

Regenerative Leadership Giles Hutchins, 2019-07-16 This book by leadership and sustainability experts Giles Hutchins and Laura Storm provides an exciting and comprehensive framework for building regenerative life-affirming businesses. It offers a multitude of business cases, fascinating examples from nature's living systems, insights from the front-line pioneers and tools and techniques for leaders to succeed and thrive in the 21st century. Regenerative Leadership draws inspiration from pioneering thinking within biomimicry, circular economy, adult developmental psychology, anthropology, biophilia, sociology, complexity theory and next-stage leadership development. It connects the dots between these fields through a powerful framework that enables leadership to become regenerative: in harmony with life, building thriving, prosperous organizations amid transformational times. The book is a combination of theoretical frameworks, case studies, tools & practices: Everything the leader needs to be successful in the 21st century. Regenerative Leadership - what's it all about? While the future is uncertain, we clearly see an upward trend towards sustainable conscious business. And this is more than just a trend - we're witnessing a new kind of organization emerging. An organization which is able to rapidly sense and respond to the ever-changing business climate by innovating how and why it creates and delivers value, and the way it engages internally and externally with its ecosystem of employees, customers, suppliers, resources, investors, society and environment. This new kind of organization is the organization-as-living-system that is designed on the Logic of Life: life-affirming businesses that thrive from the inside out, by cultivating conditions conducive for life, internally and externally. These organizations nurture flourishing cultures while focusing on products and services that enhance society and the environment. Regenerative organizations will be tomorrow's success stories.

Theodor Storm Clifford A. Bernd,2005 This book offers a new understanding of the nineteenth-century German author Theodor Storm, taking seriously, for the first time, the heritage of the Danish muse in his life and major works. Bernd offers a Dano-German portrait of Storm, tracing the youth of the author in the bicultural borderland

of Schleswig, where Storm lived under a succession of Danish monarchs until he was 36 years old, and learned to refer to the German states as Ausland (foreign territory). Highlighting the German nationalism that has prevented previous biographers, beginning with Storm's own daughter, from drawing attention to the importance of Danish culture and literature in forming the author, Bernd then details Storm's education and reading in the Danish language and literature, showing how he added a distinct Danish tone to his German poetry and also refashioned the German novella in the manner of Danish practitioners, and thus became a unique representative of a Danish literature situated in the German-speaking world. These achievements, inflected by transnational influence, should now help us to recognize Storm as a figure of exceptional importance in European letters.
