Multiword expressions at length and in depth Stella Markantonatou ,Carlos Ramisch , Agata Savary , Veronika Vincze , The annual workshop on multiword expressions takes place since 2001 in conjunction with major computational linguistics conferences and attracts the attention of an ever-growing community working on a variety of languages, linguistic phenomena and related computational processing issues. MWE 2017 took place in Valencia, Spain, and represented a vibrant panorama of the current research landscape on the computational treatment of multiword expressions, featuring many high-quality submissions. Furthermore, MWE 2017 included the first shared task on multilingual identification of verbal multiword expressions. The shared task, with extended communal work, has developed important multilingual resources and mobilised several research groups in computational linguistics worldwide. This book contains extended versions of selected papers from the workshop. Authors worked hard to include detailed explanations, broader and deeper analyses, and new exciting results, which were thoroughly reviewed by an internationally renowned committee. We hope that this distinctly joint effort will provide a meaningful and useful snapshot of the multilingual state of the art in multiword expressions modelling and processing, and will be a point point of reference for future work.

Multiword expressions Manfred Sailer ,Stella Markantonatou , Multiword expressions (MWEs) are a challenge for both the natural language applications and the linguistic theory because they often defy the application of the machinery developed for free combinations where the default is that the meaning of an utterance can be predicted from its structure. There is a rich body of primarily descriptive work on MWEs for many European languages but comparative work is little. The volume brings together MWE experts to explore the benefits of a multilingual perspective on MWEs. The ten

contributions in this volume look at MWEs in Bulgarian, English, French, German, Maori, Modern Greek, Romanian, Serbian, and Spanish. They discuss prominent issues in MWE research such as classification of MWEs, their formal grammatical modeling, and the description of individual MWE types from the point of view of different theoretical frameworks, such as Dependency Grammar, Generative Grammar, Head-driven Phrase Structure Grammar, Lexical Functional Grammar, Lexicon Grammar.

Nation-building and Identity Conflicts Ariel Hernandez, 2014-07-08 Ending identity conflicts through negotiated agreements is an intractable process that is embedded complexly in the nation-building process. Ariel Hernandez looks on the complexity of the nation-building process in the Philippines and how its social and political context constrains the achievement of a peace agreement that would withhold new challenges as the process unfolds. Mediation as one of the possible modes of intervention to resolve identity conflicts is taken as the self-evident instrument to end the 40 year old conflict between the Filipino society at large and the Bangsamoro. The analysis confirms that mediation and other types of intervention are contributing to the intractability of identity conflicts by

bringing in further complexities in the negotiation process. The conceptualization of “stumbling blocks” may provide knowledge based resources to develop strategies to “facilitate” the mediation process that allows negotiating parties to cope with the complexity of the bargaining table.

Santiago's Road Home Alexandra Diaz,2020-05-05 “With every chapter, readers will be further immersed in Santiago’s story as they root for his triumph over injustice.” —Booklist (starred review) “With unflinching conviction, Diaz sketches a frank, brief account of refugee youth in an uncaring bureaucratic system.” —Kirkus Reviews (starred review) “Harrowing but deeply illuminating.” —School Library Journal “Diaz’s crucial narrative shines a disconcerting light on the plight of children in US detention centers along the southern border.” —Publishers Weekly (starred review) A young boy gets detained by ICE while crossing the border from Mexico to the United States in this timely and unflinching novel by award-winning author Alexandra Diaz. The bed creaks under Santiago’s shivering body. They say a person’s life flashes by before dying. But it’s not his whole life. Just the events that led to this. The important ones, and the ones Santiago would rather forget. The coins in Santiago’s hand are meant for the bus fare back to his abusive abuela’s house. Except he refuses to return; he won’t be missed. His future is uncertain until he meets the kind, maternal María Dolores and her young daughter, Alegría, who help Santiago decide what comes next: He will accompany them to el otro lado, the United States of America. They embark with little, just backpacks with water and a bit of food. To travel together will require trust from all parties, and Santiago is used to going it alone. None of the three travelers realizes that the journey through Mexico to the border is just the beginning of their story.

Mirror to Physiology Ralph W Gerard, 2013-05-27 This is a motley document, the product of many, presented for what it is. Fondly conceived as another Flexner report, it lacked a Flexner to produce it. The excitement of planning by varied committees was not always maintained through execution; communication, necessarily difficult, was strained by important changes in operating staff; questions were forgotten by the time answers became available; too much was undertaken with inadequate experience and funds (large though the support seemed) ; multiple purposes and distributed responsibility caused confusion and delay; the inevitable and evil hazards of an extended

undertaking exacted their full toll. As a result, the report is seriously late in appearing, and it lacks important portions of the anticipated perspectives along time and across disciplines. But high devotion and hard labor have been poured into the mold, and the finished creation is not without merit. The Survey did pioneer in formulating a study of a profession, and its struggles have supplied both guidance and warning to many followers. It did amass great chunks of new data, collate older information, and make interpretations of the whole which have been put to use long before this report was completed. And it did catalyze much other successful activity, especially in the area of education, by the American Physiological Society and its sister organizations and by agents of other interests, from mathematics to medical schools.

Natural Language Generation Systems David D. McDonald, Leonard Bolc, 2012-12-06 Natural language generation is a field within artificial intelligence which looks ahead to the future when machines will communicate complex thoughts to their human users in a natural way. Generation systems supply the sophisticated knowledge about natural languages that must come into play when one needs to use wordings that will overpower techniques based only on symbolic string manipulation techniques. Topics covered in this volume include discourse theory, mechanical translation, deliberate writing, and revision. Natural Language Generation Systems contains contributions by leading researchers in the field. Chapters contain details of grammatical treatments and processing seldom reported on outside of full length monographs.

Using Communication Theory Swen Windahl, Benno Signitzer, Jean T Olson, 1992-01-09 This broad-ranging textbook provides a clear and comprehensive introduction to using communication theory in real-life communication activities. Planned communication, both interpersonal and through the mass media, is a standard facet of modern life. It is as evident in public health campaigns on smoking, drugs or AIDS as in commercial advertising and public relations. This textbook outlines how such communication can be informed by an understanding of the theories of communication that have evolved over the last thirty years. How are ideas diffused through the mass media and other channels of communication? How does the audience read a message? What is known about the impact of different ways of handling a communication ca

Bioinorganic Medicinal Chemistry Enzo Alessio, 2011-02-25 This book gives a comprehensive overview about medicinal inorganic chemistry. Topics like targeting strategies, mechanism of action, Pt-based antitumor drugs, radiopharmaceuticals are covered in detail and offer the reader an in-depth

overview about this important topic.

Automatic Text Simplification Horacio Saggion, 2022-05-31 Thanks to the availability of texts on the Web in recent years, increased knowledge and information have been made available to broader audiences. However, the way in which a text is written—its vocabulary, its syntax—can be difficult to read and understand for many people, especially those with poor literacy, cognitive or linguistic impairment, or those with limited knowledge of the language of the text. Texts containing uncommon words or long and complicated sentences can be difficult to read and understand by people as well as difficult to analyze by machines. Automatic text simplification is the process of transforming a text into another text which, ideally conveying the same message, will be easier to read and understand by a broader audience. The process usually involves the replacement of difficult or unknown phrases with simpler equivalents and the transformation of long and syntactically complex sentences into shorter and less complex ones. Automatic text simplification, a research topic which started 20 years ago, now has taken on a central role in natural language processing research not only because of the interesting challenges it possesses but also because of its social implications. This book presents past and current research in text simplification, exploring key issues including automatic readability assessment, lexical simplification, and syntactic simplification. It also provides a detailed account of machine learning techniques currently used in simplification, describes full systems designed for specific languages and target audiences, and offers available resources for research and development together with text simplification evaluation techniques.

Bioinorganic Chemistry -- Inorganic Elements in the Chemistry of Life Wolfgang Kaim, Brigitte Schwederski, Axel Klein, 2013-08-01 The field of Bioinorganic Chemistry has grown significantly in recent years; now one of the major sub-disciplines of Inorganic Chemistry, it has also

pervaded other areas of the life sciences due to its highly interdisciplinary nature. Bioinorganic Chemistry: Inorganic Elements in the Chemistry of Life, Second Edition provides a detailed introduction to the role of inorganic elements in biology, taking a systematic element-by-element approach to the topic. The second edition of this classic text has been fully revised and updated to include new structure information, emerging developments in the field, and an increased focus on medical applications of inorganic compounds. New topics have been added including materials aspects of bioinorganic chemistry, elemental cycles, bioorganometallic chemistry, medical imaging and therapeutic advances. Topics covered include: Metals at the center of photosynthesis Uptake, transport, and storage of essential elements Catalysis through hemoproteins Biological functions of molybdenum, tungsten, vanadium and chromium Function and transport of alkaline and alkaline earth metal cations Biomineralization Biological functions of the non-metallic inorganic elements Bioinorganic chemistry of toxic metals Biochemical behavior of radionuclides and medical imaging using inorganic compounds Chemotherapy involving non-essential elements This full color text provides a concise and comprehensive review of bioinorganic chemistry for advanced students of chemistry, biochemistry, biology, medicine and environmental science.

Ask Dr. Mueller Cookie Mueller, 1997 *Ask Dr. Mueller* captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from *Walking Through Clear Water* in a Pool Painted Black and other publications. Also the best of Cookie's art columns from *Details* magazine, and the funniest of her advice columns from the *East Village Eye*, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before *Bright Lights*, *Big City*, before the art world exploded,

before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.
