**Weathering the Global Storm** International Monetary Fund,2010-12-01 This paper highlights that central banks from Brazil, Chile, Colombia, Mexico, and Peru (the LA5 countries) reaped the benefits of what they sowed in successfully weathering the global crisis. The adoption of far-reaching institutional, policy, and operational reforms during the last two decades enabled central banks to build credibility about their commitment with the objective of price stability. Thus, when the 2007 - 08 supply shock and the financial crisis hit the world, the LA5 central banks reacted swiftly and effectively based on a flexible policy framework and with the support of strong macroeconomic and financial foundations. Building on the experience of the LA5 central banks and complementing with recommendations from the IMF’s technical advice, the paper provides several suggestions for countries seeking to strengthen the effectiveness of monetary policy.

*The Storm* Defoe D., On the evening of 26th November 1703, a cyclone from the north Atlantic hammered into southern Britain at over seventy miles an hour, claiming the lives of over 8,000 people. For Defoe, bankrupt and just released from prison for seditious writings, the storm struck during one of his bleakest moments. But it also furnished him with the material for his first book, and in his powerful depiction of private suffering and individual survival played out against a backdrop of public calamity.

The Expanding Art of Comics Thierry Groensteen,2017-10-05 In The Expanding Art of Comics: Ten Modern Masterpieces, prominent scholar Thierry Groensteen offers a distinct perspective on important evolutions in comics since the 1960s through close readings of ten seminal works. He covers over half a century of comics production, sampling a single work from the sixties (Ballad of the Salt Sea by Hugo Pratt), seventies (The Airtight Garage of Jerry Cornelius by Moebius), eighties (Watchmen by Alan Moore and Dave Gibbons), and nineties (Epileptic by David B.). Then this remarkable critic, scholar, and author of The System of Comics and Comics and Narration delves into recent masterpieces, such as Building Stories by Chris Ware. Each of these books created an opening, achieved a breakthrough, offered a new narrative model, or took up an emerging tendency and perfected it. Groensteen recaptures the impact with which these works, each in its own way, broke with what had gone before. He regards comics as an expanding art, not only because groundbreaking works such as these are increasing in number, but also because it is an art that has only gradually become aware of its considerable potential and is unceasingly opening up new expressive terrain.
