Davis' New Commercial Encyclopedia Ellis A. Davis,1900

Thomas Mann's The Magic Mountain Rodney Symington,2011-09-22 Thomas Mann's novel *The Magic Mountain* presents a panorama of European society in the first two decades of the 20th century and depicts the philosophical and metaphysical dilemmas facing people in the modern age. In the years leading up to the First World War, the fundamental elements of human nature were thrown into sharp relief by the political tensions that resulted in the ultimate metaphor for the innate destructiveness of humankind: the War itself. If such a war is the true expression of human tendencies, what hope is there for the future? Through the figure of the main character of the novel, Thomas Mann explores the alternative philosophies of life available to human beings in the modern age, and invites the reader to undertake a personal odyssey of discovery, with a view to adopting a positive approach in an era that seems to offer no clear-cut answers. This book is a comprehensive commentary on Thomas Mann's seminal novel, one of the key literary artefacts of the 20th century. The author has taken upon himself the task of explaining all the references and allusions contained in the novel, and of providing readers who know little or no German with enough explanatory comment to enable them to understand the novel and extract the maximum reading pleasure from it.

On a law of Indo-European word order Jacob Wackernagel, Jacob Wackernagel's 1892 essay on second-position enclitics in the Indo-European languages has long been hailed as groundbreaking in both historical and theoretical linguistics. Until now, however, it has only been available in the original German. This book provides a full translation into English, including glossed and translated examples from several early Indo-European languages and varieties and full bibliographical details of the references drawn upon, as well as a new edition of the German original. It should be of interest to researchers in historical and Indo-European linguistics and in general linguistics working on the interfaces between morphology, prosody and syntax.
