Sorted Books Nina Katchadourian, 2013-02-08 A witty and thought-provoking collection of visual poems constructed from stacks of books. Delighting in the look and feel of books, conceptual artist Nina Katchadourian's playful photographic series proves that books' covers—or more specifically, their spines—can speak volumes. Over the past two decades, Katchadourian has perused libraries across the globe, selecting, stacking, and photographing groupings of two, three, four, or five books so that their titles can be read as sentences, creating whimsical narratives from the text found there. Thought-provoking, clever, and at times laugh-out-loud funny (one cluster of titles from the Akron Museum of Art's research library consists of: Primitive Art /Just Imagine/Picasso/Raised by Wolves), Sorted Books is an enthralling collection of visual poems full of wry wit and bookish smarts. Praise for Sorted Books “Katchadourian's project . . . takes on a weight

beyond its initial novelty. It's a love letter to books, book collecting and the act of reading." —San Francisco Chronicle "As a longtime fan of [Katchadourian's] long-running Sorted Books project I'm thrilled for the release of Sorted Books—a collection spanning nearly two decades of her witty and wise minimalist mediations on life by way of ingeniously arranged book spines. . . . In an era drowned in periodic death tolls for the future of the physical book, her project stands as a celebration of the spirit embedded in the magnificent materiality of the printed page." —Brain Pickings "Katchadourian's stacks possess an understated sophistication; they are true to the intimate nature of books and yet reveal their dramatic features and unexpected potential." —Publishers Weekly

Reclaiming the Archive Vicki Callahan,2010-04-15 Reclaiming the Archive: Feminism and Film History brings together a diverse group of international feminist scholars to examine the intersections of feminism, history, and feminist theory in film. Editor Vicki Callahan has assembled essays that reflect a range of methodological approaches—including archival work, visual culture,

reception studies, biography, ethno-historical studies, historiography, and textual analysis—by a diverse group of film and media studies scholars to prove that feminist theory, film history, and social practice are inevitably and productively intertwined. Essays in *Reclaiming the Archive* investigate the different models available in feminist film history and how those feminist strategies might serve as paradigmatic for other sites of feminist intervention. Chapters have an international focus and range chronologically from early cinema to post-feminist texts, organized around the key areas of reception, stars, and authorship. A final section examines the very definitions of feminism (post-feminism), cinema (transmedia), and archives (virtual and online) in place today. The essays in *Reclaiming the Archive* prove that a significant heritage of film studies lies in the study of feminism in film and feminist film theory. Scholars of film history and feminist studies will appreciate the breadth of work in this volume.

African American Clinical Psychologists' Q-sort

Conceptualizations of Optimal Mental Health Antoinette Elizabeth Kavanaugh,1997 The present study used the California Q-set (CQ-

set) and Q-sort methodology (Block, 1961) to study how African American clinical psychologists conceptualize optimal mental health. Specifically, the study examined how their Q-sort descriptions vary as a function of the race of the target and the Afrocentricity of the judges. Template Q-sorts were developed to represent the collective judgment of a group of individual judges' Q-sorts. When the conventional Q-sort template matching method was used to analyze the data, the template Q-sorts of optimal mental health were virtually the same regardless of the target of the sort (European American or African American) or the psychologists' level of Afrocentricity (high or low). Furthermore, African American psychologists' conceptualizations of optimal mental health were also essentially the same as European American clinical psychologists' (Block, 1961) description of optimal mental health. A unique aspect of this study is that the data were also analyzed using an ANOVA model. By assessing the levels of variance within various groups of individual Q-sorts and the variance between groups, it was determined that it is possible for templates to be highly correlated and significantly different. Finally, although the templates were highly similar, participants reported that they believed optimal mental health was different for an African

American and a European American. Thus, the appropriateness of using the CQ-set to conceptualize optimal mental health from a non-Eurocentric perspective is explored.

The Great Endarkenment Elijah Millgram,2015 Human beings have always been specialists, but over the past two centuries division of labor has become deeper, ubiquitous, and much more fluid. The form it now takes brings in its wake a series of problems that are simultaneously philosophical and practical, having to do with coordinating the activities of experts in different disciplines who do not understand one another. Because these problems are unrecognized, and because we do not have solutions for them, we are on the verge of an age in which decisions that depend on understanding more than one discipline at a time will be made badly. Since so many decisions do require multidisciplinary knowledge, these philosophical problems are urgent. Some of the puzzles that have traditionally been on philosophers' agendas have to do with intellectual devices developed to handle less extreme forms of specialization. Two of these, necessity and the practical 'ought', are given extended treatment in Elijah Millgram's *The Great Endarkenment*. In this collection of essays, both previously published and new, Millgram pays special attention to ways a focus

on cognitive function reframes familiar debates in metaethics and metaphysics. Consequences of hyperspecialization for the theory of practical rationality, for our conception of agency, and for ethics are laid out and discussed. An Afterword considers whether and how philosophers can contribute to solving the very pressing problems created by contemporary division of labor. These always interesting, often brilliant, and contentious essays focus on the question of how we need to reason practically, if we are to flourish, given Millgram's account of our human nature and of the environments that we inhabit. The originality of his thought is matched by his clarity and his wit.--Alasdair MacIntyre, University of Notre Dame
