Theodor Storm's Craft of Fiction Clifford A. Bernd,1966 Bernd's study shows how Storm's Novellen are made purposeful by the operations of a fictional intelligence, haunted by the fear of passing time. The author challenges the traditional belief that Storm's narratives are products of a sentimental mind. No other discussion of Storm's tales, be it analysis of an individual narrative or collective treatment of several or all of them, seeks to interpret them with such specific emphasis upon their fictional, omniscient narrator. This concentration on the fictional narrator also leads into a study of Storm's subjective narrative form.

Fair Weather National Research Council,Division on Earth and Life Studies,Computer Science and Telecommunications Board,Board on Atmospheric Sciences and Climate,Board on Earth Sciences and Resources,Committee on Geophysical and Environmental Data,Committee on Partnerships in Weather and Climate Services,2003-05-14 Decades of evolving U.S. policy have led to three sectors providing weather services—NOAA (primarily the National Weather Service [NWS]), academic institutions, and private companies. This three-sector system has produced a scope and diversity of weather services in the United States second to none. However, rapid scientific and technological change is changing the capabilities of the sectors and creating occasional friction. *Fair Weather: Effective Partnerships in Weather and Climate Services* examines the roles of the three sectors in providing weather and climate services, the barriers to interaction among the sectors, and the impact of scientific and technological advances on the weather enterprise. Readers from all three sectors will be interested in the analysis and recommendations provided in *Fair Weather*.

Storm Chaser Mike Olbinski,2017-02-19 “Olbinski chases storms . . . capturing lightning, tornadoes and dramatic cloud formations in images that convey the awesome power and beauty of nature.” —International Business Times The storms that cross the Great Plains of North America each spring are some of nature's most spectacular. They can also be some of the most dangerous. Most people who live in areas susceptible to these storms keep a close eye on the weather reports and take cover or evacuate when one is on the way. Storm chasers keep an even closer eye on the weather data, but for a different reason: they don't run away when they see a storm approaching, they follow it! Professional photographer and Emmy Award winner, Mike Olbinski has chased storms throughout his native Arizona, as well as even further afield, including Texas, Oklahoma, Kansas, and Colorado. Whether he's photographing lightning, tornadoes or even cloud formations, his remarkable images are able to convey nature in its most dramatic and impressive forms. With over 100 stunning colour photographs, this book brings together some of Mike's most breathtaking images from the past five years as he describes his love of the open road and the thrill of capturing the perfect storm on film. “These pictures are truly fascinating; they show just how small we are and how little control we have over the environment and that these storms can pack a wallop. For fans of weather and spectacular photos, this is the book for you.” —San Francisco Book Review (5-star review) “A striking series of breath-taking pictures of nature lashing out from apocalyptic skies.” —Daily Mail Online
