Storm-blast Curtis Parkinson, 2003-05-13 Shortlisted for the 2005-2006 Red Cedar Book Award, Fiction Selected by the Pennsylvania School Librarians Association as one of the PSLA YA Top Forty Fiction Titles 2003 The prospect of spending summer vacation sailing in the Grenadines with his cousin Matt and his older sister Carol wasn't an appealing one for Regan. His cousin and sister have little time for him, and the three young people never get along. Regan seems to lose every argument. Then disaster strikes – the kids find themselves adrift on a dinghy with no food and little water, facing a furious tropical storm and voracious sharks. Their survival will depend on their resourcefulness and the work they accomplish together. *Storm-Blast* is a white-knuckle tale full of adventure and courage.

Storm of Sharks Curtis Jobling, 2013-06-25 The epic Wereworld saga continues as Drew Ferran—werewolf, leader of people, and the rightful king of Lyssia—battles the evil Catlords who seek to oppress the kingdom. As the war's scope widens, Drew and his allies take the fight to the high seas. But just as many terrors await them on the water as on land, with pirates and scoundrels abounding and a host of previously-unknown werelords emerging to take sides in the war that threatens to destroy the Seven Realms. Called "Game of Thrones for the tween set," (School Library Journal), the Wereworld series hits a new high in this fifth book!

Toxicological Effects of Veterinary Medicinal Products in Humans Kevin N. Woodward, 2012-10 *Toxicological Effects of Veterinary Medicinal Products in Humans* is the first definitive guide to discuss the adverse effects of veterinary medicinal products in humans. The chapters focus on occupational safety and consumer issues and examine the circumstances under which exposure is likely to occur. To be in context, it reviews this against the background of adverse health effects from other sources in the veterinary and farming professions. The book examines adverse drug effects reported to regulatory agencies (mainly the FDA's Center for Veterinary Medicine) and then considers a series of individual drugs, including antibiotics, anaesthetics and organophosphorus compounds. The chapters also discuss the fundamental aspects of regulatory issues relating to safety assessment, and examine the

manner in which user safety is assessed prior to authorisation/approval and what measures can be taken after authorisation/approval in the light of findings from pharmacovigilance activities. There is growing concern over the issue of antimicrobial resistance and the contribution made by veterinary medicinal products. This too is addressed along with the significance to human health and measures that can be taken to mitigate the effects (if any) of the use of antibiotics in animals e.g. prudent use measures. The book will be an essential resource for medical practitioners in hospitals and general practice, pharmaceutical industry scientists, analysts, regulators and risk managers.
