Juliet Moxley

Decoupage Elizabeth Gilmour Foy,1971 Describes the tools, materials, and techniques for using decoupage to decorate a variety of objects.

John Derian Picture Book John Derian,2016-10-04 New York Times Bestseller Named one of the Best Gift Books of the Year by Entertainment Weekly, InStyle, House Beautiful, T: The New York Times Style Magazine, Better Homes & Gardens, Luxe Interiors + Design, People StyleWatch, Garden & Gun, The Los Angeles Times, The Chicago Tribune, New York Magazine, and more John Derian's home goods empire reaches far and wide—in addition to the four John Derian stores he owns in New York and Massachussetts, his products are sold by more than 600 retailers worldwide, including Neiman Marcus, ABC, and Gump's in the United States; Conran and Liberty in the UK; and Astier de Villatte in Paris. It all started with his now-iconic collectible plates decoupaged with 19th-century artwork sourced from old and rare books, a process that credited him with elevating the decoupage technique into fine art. Over the past 25 years, the brand has expanded greatly to include home and general design gifts and products. Now, for the first time ever, comes the book John Derian fans have been waiting for. Culled from the thousands of images that have appeared in his biannual collections, here is an astoundingly beautiful assortment of nearly 300 full-bleed images in their original form. From intensely colored flowers and birds to curious portraits, hand-drawn letters, and breathtaking landscapes, the best of John Derian is here. The result is an oversized object of desire, a work of art in and of itself, that brilliantly walks the line between commerce and art, and that is destined to become the gift book of the season.

The End Richard John Neupert,1995 Given the importance that spectators grant to the final moments of a motion picture, it is surprising to find so little written on how films end and how audiences interpret those closing moments. This study investigates endings in film and the lively role they play in how and why viewers make sense of movies. Relying upon contemporary literary criticism and film theory, the author analyses narrative strategies in films ranging from the classical Hollywood motion picture to the more modern European art cinema. To assist readers in understanding the various functions of endings, the films are divided into four critical categories: the Closed Text film, typical of classical works; the Open Story films; the Open Discourse film; and the Open Text film which struggles to defy story resolution. Detailed textual analysis of sample films reveal how all of the devices of filmic narration - from mise-en-scene to soundtracks - direct a viewer's perception, comprehension and interpretation of closure in films. Among the sample films that are featured as test cases for studying endings are The Quiet Man (Ford, 1950), The 400 Blows (Truffaut, 1959), Weekend (Godard, 1967), Tout va bien (Godard, 1972), and Earth (Dovzhenko, 1930). To round out his informative study of endings in films, Neupert also examines a host of diverse titles, including Do the Right Thing (Lee, 1989), Open City (Rossellini, 1945) and The Graduate (Nichols, 1967).

Beating Captain Najork Todd R. Nelson,

Cutting-Edge Decoupage Nathalie Mornu,2007 Decoupage has always been one of the easiest, most effective ways to transform old, worn, or simply uninspired objects into one-of-a-kind masterpieces. And this cool, graphic guide gives the craft a fresh twist! Colorful and unabashedly contemporary, with innovative techniques and unexpected materials, these 30 projects end the decoupage doldrums. Every design delivers sophisticated results on such unusual surfaces as a discarded window and the blades of a table fan, and the unique embellishments include illustrations downloaded from the Internet; color photocopies of fabrics; and designs bleached into colored vellum. Retro fashion clippings transform a vintage hatbox into spectacular luggage fit for the most discriminating traveler. Ordinary children's chairs become punchy polka-dotted showpieces with a touch of paint and decoupaged circles. Every effect is fantastic. A Selection of the Crafter's Choice Book Club.

Design and Development of Web Information Systems Klaus-Dieter Schewe,Bernhard Thalheim,2019-04-01 This book describes the research of the authors over more than a decade on an end-to-end methodology for the design and development of Web Information Systems (WIS). It covers syntactics, semantics and pragmatics of WIS, introduces sophisticated concepts for conceptual modelling, provides integrated foundations for all these concepts and integrates them into the co-design method for systematic WIS development. WIS, i.e. data-intensive information systems that are realized in a way that arbitrary users can access them via web browsers, constitute a prominent class of information systems, for which acceptance by its a priori unknown users in varying contexts with respect to the presented content, the ease of functionality provided and the attraction of the layout adds novel challenges for modelling, design and development. This book is structured into four parts. Part I, Web Information Systems – General Aspects, gives a general introduction to WIS describing the challenges for their development, and provides a characterization by six decisive aspects: intention, usage, content, functionality, context and presentation. Part II, High-Level WIS Design – Strategic Analysis and Usage Modelling with Storyboarding, introduces methods for high-level design of WIS covering strategic aspects and the storyboarding method, which is discussed from syntactic, semantic and pragmatic perspectives. Part III, Conceptual WIS Design – Rigorous Modelling of Web Information Systems and their Layout with Web Interaction Types and Screenography, continues with conceptual design of WIS including layout and playout. This introduces the decisive web interaction types, the screenography method and adaptation aspects. The final Part IV, Rationale of the Co-Design Methodology and Systematic Development of Web Information Systems, describes the co-design method for WIS development and its application for the systematic engineering of systems. The book addresses the research community, and at the same time can be used for education of graduate students and as methodological support for professional WIS developers. For the WIS research community it provides methods for WIS modelling on all levels of abstraction including

theoretical foundations and inference mechanisms as well as a sophisticated end-to-end methodology for systematic WIS engineering from requirements elicitation over conceptual modelling to aspects of implementation, layout and playout. For students and professional developers the book can be used as a whole for educational courses on WIS design and development, as well as for more specific courses on conceptual modelling of WIS, WIS foundations and reasoning, co-design and WIS engineering or WIS layout and playout development.
