At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order service is available for the Series.

**Tailings Dam Design / Conception des Barrages de Stériles Miniers** Cigb Icold, 2023-04-03 Tailings are produced from the processing of mineral ores and are commonly stored within embankment dams. The design of the dams requires application of sound engineering principles and an understanding of the properties of the tailings. This Bulletin provides a framework for classifying different types of tailings, ranging from ultra-fine to coarse, based on their geotechnical properties and provides typical geotechnical parameters for the different tailings types. Technologies for dewatering tailings to reduce the risk of storage continue to be developed and the different technologies, from thickening to filtration, and re-application of old technologies are presented to illustrate the options available and, where appropriate, typical in situ properties. This bulletin is directed towards a wide audience of stakeholders: designers, owners, regulators, communities and various organizations and provides a reference for communicating tailings properties and the benefits and limitations of technologies. All mining operations, and thereby tailings operations, are unique. There is no one-solution-fits-all. Tailings dam designs need to account for site-specific conditions, such as climate, physiography, geochemistry, geomorphology, seismology, mining processes, environment, and community setting, with the application of technologies playing an important role in developing safe, sustainable tailings facilities. Les stériles miniers sont produits à partir du traitement des minéraux et sont généralement stockés derrière des barrages en remblai. La conception des barrages nécessite l'application de principes d'ingénierie solides et une compréhension des propriétés des résidus. Ce bulletin fournit un cadre pour classer différents types de résidus, allant de l'ultra-fin au grossier, en fonction de leurs propriétés

géotechniques et propose des paramètres géotechniques typiques pour les différentes sortes de résidus. Les technologies d'assèchement des résidus pour réduire le risque de stockage continuent à être développées ; les différentes technologies, de l'épaississement à la filtration, en passant par l'application des anciennes technologies, sont présentées pour illustrer les options disponibles et, le cas échéant, les propriétés in situ typiques. Ce bulletin s'adresse à un large public d'intervenants : concepteurs, propriétaires, régulateurs, communautés et organisations diverses et fournit une référence pour communiquer les propriétés des résidus et les avantages et les limites des technologies. Toutes les opérations minières et, par conséquent, les traitements des résidus, sont uniques. Il n'y a pas de solution unique pour tous. La conception des barrages de résidus doit tenir compte des conditions propres au site, telles que le climat, la physiographie, la géochimie, la géomorphologie, la sismologie, les processus miniers, l'environnement et le milieu communautaire, l'application de technologies jouant un rôle important dans le développement de parcs à résidus sûrs et durables.

*African Human Rights Yearbook / Annuaire africain des droits de l'homme 3 (2019)* ,2019-01-01

About the publication The African Charter on the Rights and Welfare of the Child (African Children's Rights Charter) is the continental instrument for protecting and promoting the rights and welfare of the Child. The Children's Charter, adopted in 1990, forms part of the salient features of the African human rights system, complementing the parent human rights instrument, the African Charter on Human and Peoples Rights (African Charter). To give meaning and effect to its provisions, the African Children's Rights Charter in article 34 establishes an organ namely the African Committee of Experts on the Rights and Welfare of the Child (African Children's Rights Committee or Committee) to monitor implementation by member states, to advocate for children's rights and to hold state parties accountable to their obligations as state parties. Working collaboratively on the continent's human rights system, the organs comprising the African human rights, namely, the African Commission on Human and Peoples' Rights (Commission), the African Court on Human and Peoples' Rights (Court) and the African Children's Rights Committee, have undertaken to publish the African Human Rights Yearbook. This is an instrumental platform to highlight the mandate of the organs, to foster collaboration and to illustrate Africa's commitment to uphold human rights. It is an important initiative that highlights various aspects of the norms and institutions relevant for human rights on the continent. This is the third volume of the Yearbook. It includes a focus on the 2019 theme of the African Union Refugees, Returnees and Internally Displaced Persons: Towards Durable Solutions to Forced Displacement in Africa. The African Children's Committee has at the same time undertaken and published a study on Children on the Move (2019), focusing not only on refugees, detainees and internally displaced persons, but also drawing inspiration from the protective mandate of the African Children's Rights Charter to draw the continent's attention to the protection and promotion of the rights and welfare of children who are on the move. The focus on themes of the African Union enables a critical analysis of the extent of their implementation and relevance to the human rights discourse in the continent. Furthermore, the special focus of the Yearbook on various groups of people in vulnerable situation, such as children and women, signals the need to enhance their protection and prioritise their plight. The role of academic writing in advancement of human rights deserves due notice

and appreciation by human rights implementing bodies. Peer reviewed academic research provides credible and independent knowledge about human rights in a specific country or region, as well as in various contexts and thematic areas. Academia plays a major role in the development of a human rights resource base that enables sustainable enhancement of human rights protection and promotion. The African Human Rights Yearbook is an excellent example of the important role played by academia in strengthening human rights protection and promotion in Africa. The breadth of knowledge enveloped in the Yearbook is evidenced by the long list of highly established scholars that informed it. By questioning and analysing the institutional architecture and the work of the three human rights bodies, the Yearbook has an invaluable role of ameliorating their functioning as a collective system. For this reason, it is critical that the Committee, Commission and Court take note of the various recommendations stemming from the research and apply them when relevant, for better protection and promotion of human rights in Africa. Mrs. Goitseone Nanikie Nkwe Chairperson of the African Committee of Experts on the Rights and Welfare of the Child. La Charte africaine des droits et du bien-être de l'enfant (Charte des droits de l'enfant) est l'instrument central en matière de protection et de promotion des droits et du bien-être de l'enfant en Afrique. Adoptée en 1990, elle fait partie intégrante des instruments clés du système africain des droits de l'homme et complète, à cet effet, la Charte africaine des droits de l'homme et des peuples, le traité fondateur du système africain des droits de l'homme. Pour mieux protéger les droits des enfants, le Comité africain d'experts sur les droits et le bien-être de l'enfant (Comité) fut créé à travers l'article 34 de la Charte des droits de l'enfant. Cet organe a pour mission de surveiller et de contrôler l'application et la mise en oeuvre de la Charte. Il veille que les Etats respectent et rendent compte de la mise en oeuvre des obligations qui leur incombent en vertu de la Charte. Travaillant en étroite collaboration dans le cadre de la protection des droits de l'homme en Afrique, la Commission africaine des droits de l'homme et des peuples, la Cour africaine des droits de l'homme et des peuples et le Comité africain d'experts sur les droits et le bien-être de l'enfant ont mis en place l'Annuaire africain des droits de l'homme. Cette initiative sert d'opportunité pour promouvoir les missions dévolues auxdits organes, raffermir les liens de collaboration entre eux et rappeler l'engagement pris par l'Afrique afin de protéger les droits humains. L'Annuaire est une initiative importante car elle met en exergue les différents aspects normatifs et institutionnels des droits de l'homme en Afrique. Ce troisième volume de l'Annuaire est dédié au thème que l'Union africaine a retenu pour l'année 2019; Année des réfugiés, des rapatriés et des personnes déplacées: Vers des solutions durables aux déplacements forcés en Afrique. En parallèle,

Le Comité a entrepris et publié une cartographie des enfants en mouvement en Afrique (2019) axée sur les réfugiés, les détenus et les déplacés internes. Tirant ses fondements du mandat de protection que confère la Charte des droits de l'enfant, la cartographie attire l'attention du continent sur la protection et la promotion des droits et du bien-être des enfants en mouvement. L'emphase sur les thèmes de l'Union africaine dans l'Annuaire permet d'examiner le degré de leur mise en oeuvre et leur importance au débat sur la question des droits de l'homme en Afrique. Par ailleurs, l'accent mis sur les catégories et groupes en situations de vulnérabilité dont les enfants et les femmes, sert à réitérer la nécessité de renforcer leur protection et de prioriser leur infortune. Les organes de protection des droits de l'homme devraient reconnaître, à sa juste valeur, le rôle que jouent les travaux scientifiques dans la promotion des droits de l'homme. Les travaux de recherche scientifique relus et examinés par les pairs fournissent des connaissances crédibles et indépendantes sur les droits de l'homme dans un pays ou une région spécifique, ainsi que dans divers contextes et domaines thématiques. Les universités jouent un rôle prépondérant dans la mise en place des ressources adéquates en matière des droits de l'homme en vue de renforcer durablement leur protection et promotion. L'Annuaire africain des droits de l'homme est un parfait exemple de l'important rôle joué par les universités dans le renforcement de la protection et de la promotion des droits de l'homme en Afrique. La profondeur des connaissances que regorge l'Annuaire peut être illustrée de par la longue liste d'universitaires et des chercheurs qui le constituent. En interrogeant et en analysant l'architecture institutionnelle et le travail des trois organes de défense des droits de l'homme, l'Annuaire joue un rôle inestimable dans l'amélioration de leur fonctionnement en tant que système collectif. Pour cette raison, il est essentiel que le Comité, la Commission et la Cour prennent note des diverses recommandations découlant des recherches entreprises et les appliquent le cas échéant pour une meilleure protection et promotion des droits de l'homme en Afrique. Rosario,2012-06-22 Permettre de concevoir, développer et utiliser des systèmes de diagnostic, de surveillance et de maintenance prédictive pour systèmes complexes (avions, centrales nucléaires, transport, etc.), afin d'optimiser les performances de la sûreté de fonctionnement : tel est l'objectif de cet ouvrage. Pour cela Fiabilité, diagnostic et maintenance prédictive des systèmes s'appuie sur la modélisation des systèmes (parties commandes et opératives), l'évaluation probabiliste et déterministe du fonctionnement, et la conception de systèmes de surveillance. Cet ouvrage fait le lien entre le diagnostic, la maintenance et la fiabilité des systèmes techniques, du plus simple au plus complexe. Son approche novatrice et sa présentation en font un véritable guide théorique et pratique pour les ingénieurs qui pourront y trouver la réponse à de nombreux problèmes de diagnostic, de surveillance et de maintenance, en particulier grâce à l'analyse vibratoire. Très didactique et accompagné de plus de 100 exercices et problèmes résolus reflétant des situations concrètes, il présente les concepts de base pour concevoir et développer correctement des outils ou des systèmes de diagnostic et de maintenance conditionnelle (prédictive) indispensables aux ingénieurs ou aux élèves ingénieurs en génie industriel, génie mécanique, robotique ou sûreté de fonctionnement dans les domaines les plus variés.

Le Réglement des différends sur les nouvelles ressources naturelles René Jean

Dupuy, 1983-11-14 Between 1988 & 1993 over fifty nations have either enacted new mining legislation, had such legislation pending adoption or were in the process of drafting new or revised legislation. In almost every case, this legislation carried with it changes in the fiscal regimes. The ability to attract mineral investment, be it in either a developed or a developing country, is partly dependent on the legislative & fiscal systems which regulate the industry. In the light of the changes taking place, this new reference work is timely & provides essential reading for those with an interest in mining taxation. The first part of the book analyses general topics which are applicable to understanding the taxation of mineral enterprises, while the second part provides a comprehensive & detailed account of actual taxation systems & methods.
