The Storm of Creativity Kyna Leski,2015-11-13 The stages of the creative process—from “unlearning” to beginning again—seen through examples from the practice of artists, architects, poets, and others. Although each instance of creativity is singular and specific, Kyna Leski tells us, the creative process is universal. Artists, architects, poets, inventors, scientists, and others all navigate the same stages of the process in order to discover something that does not yet exist. All of us must work our way through the empty page, the blank screen, writer's block, confusion, chaos, and doubt. In this book, Leski draws from her observations and experiences as a teacher, student, maker, writer, and architect to describe the workings of the creative process. Leski sees the creative process as being like a storm; it slowly begins to gather and take form until it overtakes us—if we are willing to let it. It is dynamic, continually in motion; it starts, stops, rages and abates, ebbs and flows. In illustrations that accompany each chapter, she maps the arc of the creative process by tracing the path of water droplets traveling the stages of a storm. Leski describes unlearning, ridding ourselves of preconceptions; only when we realize what we don't know can we pose the problem that we need to solve. We gather evidence—with notebook jottings, research, the collection of objects—propelling the process. We perceive and conceive; we look ahead without knowing where we are going; we make connections. We pause, retreat, and stop, only to start again. To illustrate these stages of the process, Leski draws on examples of creative practice that range from Paul Klee to Steve Jobs, from the discovery of continental drift to the design of Antoni Gaudí's Sagrada Familia. Creativity, Leski tells us, is a path with no beginning or end; it is ongoing. This revelatory view of the creative process will be an essential guide for anyone engaged in creative discovery. The Creative Process Unlearning Problem Making Gathering and Tracking Propelling Perceiving and Conceiving Seeing Ahead Connecting Pausing Continuing

Storm Kim Hargreaves,Kathleen Hargreaves,Graham Watts (Photographer),2013 Kim Hargreaves needs little introduction to seasoned knitters. Her flair for femininity and elegance has earned her worldwide fame as a knitwear designer. Rowan Yarns gave Kim her first job and fostered her career as a designer. Their prestigious bi-annual magazines, with exquisite photography, were a showcase for her talents for more than a decade. In this book, they have chosen to revisit 25 of her truly great designs in their favorite classic yarns: wools, mohairs and cottons, so there is something to knit all year round. There are smart little sweaters, soft cardigans, tailored jackets and cute tops, with beaded, textured, plain and lacy stitches, plus a few accessories. -- from publisher's website.

Severe Storm Engineering for Structural Design Michele G. Melaragno,1996 Building codes and standards in other countries are studied in correlation to the number of casualties suffered during a violent storm. Specifically, Bangladesh is offered as a case study of minimum standards of building construction, while Australia is highlighted for having some of the strictest controls in the world. In 1990 and 1991, hurricanes Hugo, Andrew and Iniki pummeled the United States leveling residences, office buildings, a military base, and shopping areas. The devastation had a profound effect on the local communities, industries and commerce. Judging from the destruction these storms caused to the buildings in the area, it is clear that we still have a great deal to learn about designing structures to withstand hurricanes, typhoons and tornadoes. This book, for both the student and practicing architect or engineer, explores wind velocity typical of storms such as these. The weather conditions are then translated into actual forces on a structure to be used to better design build

Regenerative Leadership Giles Hutchins,2019-07-16 This book by leadership and sustainability experts Giles Hutchins and Laura Storm provides an exciting and comprehensive framework for building regenerative life-affirming businesses. It offers a multitude of business cases, fascinating examples from nature's living systems, insights from the front-line pioneers and tools and techniques for leaders to succeed and thrive in the 21st century. Regenerative Leadership draws inspiration from pioneering thinking within biomimicry, circular economy, adult developmental psychology, anthropology, biophilia, sociology, complexity theory and next-stage leadership development. It connects the dots between these fields through a powerful framework that enables leadership to become regenerative: in harmony with life, building thriving, prosperous organizations amid transformational times. The book is a combination of theoretical frameworks, case studies, tools & practices: Everything the leader needs to be successful in the 21st century. Regenerative Leadership - what's it all about? While the future is uncertain, we clearly see an upward trend towards sustainable conscious business. And this is more than just a trend - we're witnessing a new kind of organization emerging. An organization which is able to rapidly sense and respond to the ever-changing business climate by innovating how and why it creates and delivers value, and the way it engages internally and externally with its ecosystem of employees, customers, suppliers, resources, investors, society and environment. This new kind of organization is the organization-as-living-system that is designed on the Logic of Life: life-affirming businesses that thrive from the inside out, by cultivating conditions conducive for life, internally and externally. These organizations nurture flourishing cultures while focusing on products and services that enhance society and the environment. Regenerative organizations will be tomorrow's success stories.

Winter Design Storm Factor Determination for Airports Dean Mericas,2012 TRB's Airport Cooperative Research Program (ACRP) Report 81: Winter Design Storm Factor Determination for Airports identifies the relevant factors in defining a winter design storm for use in sizing airport deicing runoff management systems and components. The guidebook also provides a decision support tool for identifying an appropriate winter design storm for an airport-specific project; a review of regulations as they pertain to deicing runoff; and suggestions for target levels of service, including the acceptable level of risk of the designed system not meeting performance standards. -- from website.

Taking Shelter from the Storm: Building a Safe Room for Your Home or Small Business ,2008

Magnetic Storm Roger Dean,Martyn Dean,2009-06-09 First published in 1984, Magnetic Storm followed in the groundbreaking footsteps of the million-selling Views (1975). Once again employing a large format and lavish production to showcase the unique art and design of Roger Dean, this iconic book was a retrospective of the astonishing breadth of work accomplished since the publication of its predecessor. Through Views and Magnetic Storm, Roger Dean established a devoted readership, while Dragon's Dream (2008) demonstrates how his visionary work has continued to illuminate an age of digital animation, computer games, and virtual worlds. Embracing designs for record sleeves, rock stages, movie projects, architecture, games consoles, landscapes, and books, Magnetic Storm features everything from innovative aircraft livery to the Yes logo. This new edition streamlines the original format and retains the combination of concept sketches and the finished works. Featuring revised design and typography, a new foreword, and a newly finished painting that Roger supplied especially for the front cover of this edition, Magnetic Storm showcases and celebrates the art that defined an era.
