**The Numinous Legacy** Adair Butchins, 2002 Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider tha

**Paul Kossoff: All Right Now** J. P. James, 2017-11-02 Affectionately known as 'Koss', Paul Kossoff's playing touched people. It still does today, more than forty years after his sad and untimely death at the age of twenty-five. This authorised biography pays fitting tribute to a much-loved and widely admired musician whose influence and inspiration is still very evident. It's all here: Kossoff's musical childhood, his formative years with Black Cat Bones, forming Free at seventeen, that group's dizzying success, breakup, reforming and dissolution, the solo years, Back Street Crawler - the sessions, the tours and big concerts, the triumphs, the tragedies and the heartbreak - J.P. James takes the reader right there. Over four distinct sections, Kossoff's many guitars and the equipment he used to make them sing are fully documented; a brand-new detailed analysis of Kossoff's distinctive playing style and technique is presented for the first time; a broad overview of Kossoff's creative life draws on the voices of family, friends and fellow musicians; and finally, Kossoff's musical influences, approach to playing and his wider musical interests, hopes and dreams are explored - all drawn from his own words. Cramming so much into his short years, Paul Kossoff left a rich musical legacy, and he is indeed All Right Now. Thoroughly researched and sensitively written, given often in Kossoff's own words and packed with anecdotes from those who were there, musicians and fans alike will enjoy this authoritative and comprehensive biography.

**Atomic Quest: A Personal Narrative** Arthur Holly Compton, 2019-08-09 As director of the Metallurgical Laboratory of the Manhattan Project at the University of Chicago, Arthur Holly Compton was a major participant in the research, production and testing of the first atomic bombs. In this memoir, he tells the story of the bomb's development from the presentation of the project to President Roosevelt, through its planning, research, and building phases, to its use against Japan. From the perspective of the key position he held during World War II, Compton describes the project as a large-scale group effort leveraging the knowledge and talents of numerous scientists, industrialists and administrators all working as part of their nation's war effort. "An absorbing and eminently readable account... packed with new information, enlivened with precious detail and illuminating insights into the minds and personalities of the chief actors in the drama... Mr. Compton tells, and tells well, the story of how, with his unflagging encouragement, the brilliant team under the late Enrico Fermi brought about the first nuclear chain reaction... [an] important book." — Henry Guerlac, The New York Times Book Review "This book... is without doubt the most authoritative source available on many aspects of the atomic bomb project... Better than in most histories the real factors underlying one of mankind's most important developments are set forth in this work... The story is a personal one, which... gives the book a Churchillian authenticity... No historian will ever dare to neglect this volume in writing the history of World War II. It is beautifully written, carefully documented, and thoroughly interesting from cover to cover." — W.F. Libby, Science "For those who were in the project, it will mean many recollections. For those who were not, it should give an inkling of the character and capacity of many of the individuals, including Arthur Compton, who made success possible." — Lieutenant General Leslie R. Groves, U.S. Army (Retired) "Atomic Quest is an absorbingly interesting story of the people who blazed the trail into the atomic frontier... In a lifetime filled with brilliant accomplishments, Arthur Compton's four-year leadership in the quest for the atomic bomb was his grandest achievement... It is fortunate indeed that he returned to the fold long enough to set down in Atomic Quest a story that only he could tell." — Richard L. Doan, American Journal of Physics "Dr. Compton is a thinking man whose reflections range far beyond the confines of his scientific work: indeed, the distinctive quality of his book lies in his ability to reconcile the atomic bomb and similar operations with his belief as a practicing Christian." — John Barkham, Saturday Review Syndicate "It should be required reading for every American, for the free world... The narrative alone makes the book worth reading; its hopeful philosophy makes it mandatory reading." — Robert S. Kleckner, Chicago Sunday Tribune "As... director of the Metallurgical Laboratory of the Manhattan Project, Dr. Compton has an important record to add to the annals of the beginning of the Atomic Age, for his was a personal and intimate connection with it." — Kirkus "A leading physicist's personal account of the wartime developments in atomic energy, culminating in the production of the atomic bomb." — Henry L. Roberts, Foreign Affairs "Informal, anecdotal, packed with behind-the-scenes incidents and impressions... arrestingly interesting." — George W. Gray, The Saturday Review "The most controversial part of the book is that which endeavors to foresee the future of a world faced with the threat of war with nuclear weapons and the inevitable

widespread destruction that will accompany their use. Compton is convinced that war has actually thereby become obsolescent.” — Robert Bruce Lindsay, *Physics Today* “This book... is written for the layman, in clear, everyday English... it answers the questions that have arisen in the minds of all intelligent people concerning the physical, moral, social and religious implications of the Atomic Age which was so brutally and vividly thrust upon the world in 1945.” — Paul Jordan-Smith, *Los Angeles Times*

**Expostulation** William Cowper,2013-09 This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 edition. Excerpt: ... NOTES. The Motto is quoted from Virgil's Aene.id, v. 390-391, and represents Cowper's appeal to England. The English of the quotation is, Will you then so tamely allow such great prizes to be carried off without any contest? The words were addressed by the Trojan prince Acestes to a famous old hero who was watching some sports arranged by Aeneas. A braggart had challenged all the onlookers to a boxing match. The reproof of Acestes caused the old hero to take up the challenge, in spite of advanced age, with the result that he carried off the prize. So Cowper asks England if she will allow all the blessings she enjoys to be lost in consequence of her indifference to religion. I. Muse, goddess of poetry. Cowper professes in this poem to answer the question in this line. 4. clothed with a smile; a confused metaphor, since smiles have no connection with clothing. The meaning is clear-- Does not England display happiness in all directions and at all times? 7, 8. These lines describe the worldliness of the eighteenth century. People pursued pleasure and put aside all serious thoughts. 10. horn, the Cornucopia, or horn of plenty, which is used in art to represent abundance of nature's productions. Plenty, Art, and Commerce are examples of personification, the abstract idea being treated as though it were a person. II. Ambrosial, fragrant. The Greek ambrosia was the imaginary food of the gods which maintained their immortality. Poets use the word ambrosial to describe anything extremely sweet. Art supplies, etc., by artificial means the plants of tropical countries are made to grow in England. 12. fervour, heat; force, power of making plants grow, or forcing them. 43 14. his golden tide, the valuable cargoes of ships coming to England;...
