Exploring Movie Construction and Production John Reich,2017-07-10 Exploring Movie Construction & Production contains eight chapters of the major areas of film construction and production. The discussion covers theme, genre, narrative structure, character portrayal, story, plot, directing style, cinematography, and editing. Important terminology is defined and types of analysis are discussed and demonstrated. An extended example of how a movie description reflects the setting, narrative structure, or directing style is used throughout the book to illustrate building blocks of each theme. This approach to film instruction and analysis has proved beneficial to increasing students' learning, while enhancing the creativity and critical thinking of the student.

Actions and Goals Marshall Dotson,2016-11-16 How is A Game of Thrones the same story as The Lego Movie? How is the mind-bending plot of Inception identical to the terse narrative of Gravity? In what way is Clarice Starling's struggle to silence the lambs indistinguishable from Harry Potter's pursuit of the philosopher's stone? Despite the striking difference in these stories, they share a less conspicuous similarity: they're all structured on a universal pattern of actions undertaken by their characters. This sequence of six Actions and Goals is the hidden foundation of modern story structure. By aligning the unique actions your characters takes with these universal story actions, you can create propulsive narratives that grab your audience by the lapels and punch them in the face (figuratively, of course). Whether you're writing for television or plotting a novel, penning your first screenplay or coming off your most recent bestseller, this groundbreaking storytelling technique is guaranteed to change your perception of story. Actions and Goals will teach you: How to use the actions of your character to structure your story. Why your character's goal should change as the story progresses. The five turning points and the decision your character must make at each one. How a conflict of ideals creates the opposition your character faces. How your character's attempt to fulfill a new role propels him through the narrative. Successful storytellers understand the importance of structure. Actions and Goals gives you beat by beat examples of this structural secret at work in over a dozen critically acclaimed novels and films. From The Hunger Games to The Empire Strikes Back, from Titanic to Iron Man, you will learn the simple, effective structure at the heart of them all.

Schematics Julian Hibbard, 2011 What can a triangle tell us about love? In *Schematics: A Love Story*, author Julian Hibbard uses schematic diagrams to meditate on love, memory, and the way time links them. Every spread of the book pairs a quietly unfolding, enigmatic narrative with a visually arresting illustration drawn from old diagrams. Whether they illustrate simplistic dance steps or chart the process of chemical decomposition, the illustrations play off the text, coaxing out new hints of meaning from what at first glance appears simple. As the story unfolds, the schematics draw readers in, revealing more and more of the paradox that is love. *Schematics* includes an index explaining the sources of the original diagrams, adding another layer of intrigue to this short but memorable fiction.

The Seven Basic Plots Christopher Booker, 2005-11-11 This remarkable and monumental book at last provides a comprehensive answer to the age-old riddle of whether there are only a small number of 'basic stories' in the world. Using a wealth of examples, from ancient myths and folk tales via the plays and novels of great literature to the popular movies and TV soap operas of today, it shows that there are seven archetypal themes which recur throughout every kind of storytelling. But this is only the prelude to an investigation into how and why we are 'programmed' to imagine stories in these ways, and how they relate to the inmost patterns of human psychology. Drawing on a vast array of examples, from Proust to detective stories, from the Marquis de Sade to E.T., Christopher Booker then leads us through the extraordinary changes in the nature of storytelling over the past 200 years, and why so many stories have 'lost the plot' by losing touch with their underlying archetypal purpose. Booker analyses why evolution has given us the need to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years. This seminal book opens up in an entirely new way our understanding of the real purpose storytelling plays in our lives, and will be a talking point for years to come.

Preaching from Inside the Story Jeffrey W. Frymire,2022-06-02 Preaching from Inside the Story is a book that seeks to carve out an understanding of narrative preaching in an age where there is little agreement about its nature and practice. Capitalizing on the works of Craddock and Lowry, it seeks to find an expanded palette upon which the preacher may engage the larger canvas of narrative preaching. This book will engage the mind by introducing neuroscientific understandings of creativity; build upon the foundations of the philosophy of stories by engaging Aristotle's foundational understanding of narrative; and renew the Lowry Loop by expanding this seminal work and how it should be understood in our current culture. Preaching from Inside the Story breaks new ground by encouraging preachers to move inside stories and tell them from the inside out providing a positive effect, thereby affording non-narrative preachers to connect with storytelling principles. Ultimately, it is filled with examples of how to do narrative in a very practical way. However, in showing these practical examples, the reader is involved in a deep analysis of those narrative sermons and how they fit into an overall narrative understanding of preaching. In the final analysis, it invites the reader to take a fresh journey into narrative preaching.

When he protests, Rainsford the hunter becomes Rainsford the hunted. Born in New York, Richard Connell (1893 – 1949) went on to become an acclaimed author, screenwriter, and journalist. He is best remembered for the gripping novel The Most Dangerous Game and for receiving an Oscar nomination for the screenplay Meet John Doe.
