About to Die Barbie Zelizer, 2010-12-01 Due to its ability to freeze a moment in time, the photo is a uniquely powerful device for ordering and understanding the world. But when an image depicts complex, ambiguous, or controversial events--terrorist attacks, wars, political assassinations--its ability to influence perception can prove deeply unsettling. Are we really seeing the world as it is or is the image a fabrication or projection? How do a photo's content and form shape a viewer's impressions? What do such images contribute to historical memory? *About to Die* focuses on one emotionally charged category of news photograph--depictions of individuals who are facing imminent death--as a prism for addressing such vital questions. Tracking events as wide-ranging as the 1906 San Francisco Earthquake, the Holocaust, the Vietnam War, and 9/11, Barbie Zelizer demonstrates that modes of journalistic depiction and the power of the image are immense cultural forces that are still far from understood. Through a survey of a century of photojournalism, including close analysis of over sixty photos, *About to Die* provides a framework and vocabulary for understanding the news imagery that so profoundly shapes our view of the world.

How Not to Die Michael Greger, M.D., FACLM, Gene Stone, 2015-12-08 From the physician behind the wildly popular NutritionFacts website, *How Not to Die* reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse

many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In *How Not to Die*, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America-heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more-and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug-and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, *How Not to Die* includes Dr. Greger's Daily Dozen -a checklist of the twelve foods we should consume every day. Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.

Run or Die Kilian Jornet, 2013-07-01 Shortlisted for the 2014 William Hill Sports Book of the Year Award National Geographic Adventurer of the Year 2014 The most dominating endurance athlete of his generation. -- The New York Times An exceptional athlete. A dominating force. An extraordinary person. Kilian Jornet has conquered some of the toughest physical tests on the planet. He has run up and down Mt. Kilimanjaro faster than any other human being, and struck down world records in every challenge that has been proposed, all before the age of 25. Redefining what is possible, Jornet continually pushes the limits of human ability, astonishing competitors with his near-superhuman fitness and ability. Born and raised at 6,000 feet above sea level in the Spanish Pyrenees, Jornet climbed an 11,000 foot mountain -- the highest mountain in the region -- at age 5. Now Jornet adores the mountains with the same ferocity with which he runs them. In *Run or Die* he shares his passion, inviting readers into a fascinating world rich with the beauty of rugged trails and mountain vistas, the pulse-pounding drama of racing, and an intense love for sport and the landscapes that surround him. In his book, Jornet describes his record-breaking runs at Lake Tahoe, Western States 100, Ultra-Trail du Mont-Blanc, and Mount Kilimanjaro--the first of his ambitious Summits of My Life project in which Jornet will attempt to break records climbing the highest peaks on each continent. In turns inspiring, insightful, candid, and deeply personal, this is a book written from the heart of the world's greatest endurance runner, for whom life presents one simple choice: Run. Or die. Trail running's first true breakout star, [Jornet] has yet to find a record he can't shatter. -- *Runner's World*

Die Wise Stephen Jenkinson, 2015-03-17 *Die Wise* does not offer

seven steps for coping with death. It does not suggest ways to make dying easier. It pours no honey to make the medicine go down. Instead, with lyrical prose, deep wisdom, and stories from his two decades of working with dying people and their families, Stephen Jenkinson places death at the center of the page and asks us to behold it in all its painful beauty. *Die Wise* teaches the skills of dying, skills that have to be learned in the course of living deeply and well. *Die Wise* is for those who will fail to live forever. Dying well, Jenkinson writes, is a right and responsibility of everyone. It is not a lifestyle option. It is a moral, political, and spiritual obligation each person owes their ancestors and their heirs. *Die Wise* dreams such a dream, and plots such an uprising. How we die, how we care for dying people, and how we carry our dead: this work makes our capacity for a village-mindedness, or breaks it.

How to Die Ray Robertson, 2020-01-28 A radical revaluation of how contemporary society perceives death—and an argument for how it can make us happy. “He who would teach men to die would teach them to live,” writes Montaigne in *Essais*, and in *How to Die: A Book about Being Alive*, Ray Robertson takes up the challenge. Though contemporary society avoids the subject and often values the mere continuation of existence over its quality, Robertson argues that the active and intentional consideration of death is neither morbid nor frivolous, but instead essential to our ability to fully value life. *How to Die* is both an absorbing excursion through some of Western literature’s most compelling works on the subject of death as well as

an anecdote-driven argument for cultivating a better understanding of death in the belief that, if we do, we'll know more about what it means to live a meaningful life.

What Really Happens When You Die? Andrew McLauchlin, 2016-01-08 What happens to us when we die? It's a question that has sought answers from religion; philosophy; the supernatural; and, more recently, to evidence from 'near death' experience. But never, it seems, from science. Yet that's where the answer appears to lie. Specifically, in cosmology, the study of the history and future of the universe. Taking his inspiration from Stephen Hawking's groundbreaking *A Brief History of Time*, author Andrew McLauchlin brings his background in physics to bear on this fascinating subject. He examines developments in cosmology and shows how they point to a conclusion about the dimension of time that has very real implications not only for the universe but also for us. *What Really Happens When We Die?* is a journey of discovery into a realm that offers an astonishing explanation for one of life's imponderables.

How Democracies Die Steven Levitsky, Daniel Ziblatt, 2019-01-08
NEW YORK TIMES BESTSELLER • “Comprehensive, enlightening, and terrifyingly timely.”—The New York Times Book Review (Editors' Choice) WINNER OF THE GOLDSMITH BOOK PRIZE • SHORTLISTED FOR THE LIONEL GELBER PRIZE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • Time • Foreign Affairs • WBUR • Paste Donald Trump's presidency has raised a question that many of us never thought we'd be asking: Is our democracy in danger? Harvard professors Steven

Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America, and they believe the answer is yes. Democracy no longer ends with a bang—in a revolution or military coup—but with a whimper: the slow, steady weakening of critical institutions, such as the judiciary and the press, and the gradual erosion of long-standing political norms. The good news is that there are several exit ramps on the road to authoritarianism. The bad news is that, by electing Trump, we have already passed the first one. Drawing on decades of research and a wide range of historical and global examples, from 1930s Europe to contemporary Hungary, Turkey, and Venezuela, to the American South during Jim Crow, Levitsky and Ziblatt show how democracies die—and how ours can be saved. Praise for *How Democracies Die*

“What we desperately need is a sober, dispassionate look at the current state of affairs. Steven Levitsky and Daniel Ziblatt, two of the most respected scholars in the field of democracy studies, offer just that.”—The Washington Post

“Where Levitsky and Ziblatt make their mark is in weaving together political science and historical analysis of both domestic and international democratic crises; in doing so, they expand the conversation beyond Trump and before him, to other countries and to the deep structure of American democracy and politics.”—Ezra Klein, Vox

“If you only read one book for the rest of the year, read *How Democracies Die*. . . . This is not a book for just Democrats or Republicans. It is a book for all Americans. It is nonpartisan. It is fact based. It is deeply rooted in history. . . . The best commentary on our politics, no contest.”—Michael Morrell, former Acting Director of the Central Intelligence Agency (via Twitter)

“A smart and deeply informed book about the ways in which democracy is being undermined in dozens of countries around the world, and in

ways that are perfectly legal.”—Fareed Zakaria, CNN

The Self Does Not Die Titus Rivas, Anny Dirven, Rudolf Smit, 2016-07-06 Are near-death experiences (NDEs) just elaborate hallucinations produced by a dying brain? Or the exuberant fantasies of attention-seeking narcissists? As the accounts in this book abundantly demonstrate: Neither! This book contains over 100 reliable, often firsthand accounts of perceptions during NDEs that were later verified as accurate by independent sources. These near-death experiencers were everyday people from all over the world—many of whom were clinically dead, unable to see or hear, and yet able to perceive new vistas of a world beyond the senses and even beyond death. *The Self Does Not Die* is a trailblazing effort to present the most confirmed cases of consciousness beyond death ever compiled. In these cases, the authors have gone back to the original sources, the people involved in each case, whenever possible, rather than relying on secondhand sources. In so doing, they have assembled a unique collection of empirical data that any scholar worthy of the name must take into account. By carefully studying and describing many convincing and corroborated cases, during cardiac arrest and other cases, the authors conclude that there are good reasons to assume that our consciousness does not always coincide with the functioning of our brain: Enhanced consciousness can sometimes be experienced separately from the body. This book is a must read for anyone wanting to know more about this fascinating subject with its implications about the very nature of human consciousness and its survival of physical death. It has the potential to radically change the currently still widely accepted materialist paradigm in science.

The Hill to Die on Jake Sherman, Anna Palmer, 2019 With control

of both the House and Senate up for grabs in 2018 and the direction of the nation resting on the outcome, never has a more savage, unrelenting fight been waged in the raptor cage that is the U.S. congress. From the torrid struggle between the conservative Freedom Caucus and Speaker Paul Ryan for control of the house, to the sexual assault accusations against Court nominee Brett Kavanaugh that threw the Senate into turmoil, to the pitched battles across America in primaries, the road to the midterm election has been paved with chaos and intrigue. And that's before one considers that it's all refracted through the kaleidoscopic lens of President Trump, who can turn any situation on its head with just a single tweet. With inside access that ushers readers deep into the inner workings and hidden secrets of party leadership, Politico Playbook writers Anna Palmer and Jake Sherman trace the strategy and the impulsiveness, the deal-making and the backstabbing, in a blow-by-blow account of the power struggle roiling the halls of Congress. *The Hill to Die On* will be an unforgettable story of power and politics, where the stakes are nothing less than the future of America under Trump.

How to Die Seneca, 2018-02-27 Timeless wisdom on death and dying from the celebrated Stoic philosopher Seneca It takes an entire lifetime to learn how to die, wrote the Roman Stoic philosopher Seneca (c. 4 BC–65 AD). He counseled readers to study death always, and took his own advice, returning to the subject again and again in all his writings, yet he never treated it in a complete work. *How to Die* gathers in one volume, for the first time, Seneca's remarkable meditations on death and dying. Edited and translated by James S. Romm, *How to Die* reveals a provocative thinker and dazzling writer who speaks with a startling frankness about the need to accept death or even, under certain conditions, to seek it out. Seneca believed that

life is only a journey toward death and that one must rehearse for death throughout life. Here, he tells us how to practice for death, how to die well, and how to understand the role of a good death in a good life. He stresses the universality of death, its importance as life's final rite of passage, and its ability to liberate us from pain, slavery, or political oppression. Featuring beautifully rendered new translations, *How to Die* also includes an enlightening introduction, notes, the original Latin texts, and an epilogue presenting Tacitus's description of Seneca's grim suicide.

And a Time to Die Sharon Kaufman, 2005-04-19 Most Americans, when pressed, have a vague sense of how they would like to die. They may imagine a quick and painless end or a gentle passing away during sleep. Some may wish for time to prepare and make peace with themselves, their friends, and their families. Others would prefer not to know what's coming, a swift, clean break. Yet all fear that the reality will be painful and prolonged; all fear the loss of control that could accompany dying. That fear is justified. It is also historically unprecedented. In the past thirty years, the advent of medical technology capable of sustaining life without restoring health, the expectation that a critically ill person need not die, and the conviction that medicine should routinely thwart death have significantly changed where, when, and how Americans die and put us all in the position of doing something about death. In a penetrating and revelatory study, medical anthropologist Sharon R. Kaufman examines the powerful center of those changes -- the hospital, where most Americans die today. In the hospital world, the deep, irresolvable tension between the urge to extend life at all costs and the desire to allow letting go is rarely acknowledged, yet it underlies everything that happens there among patients, families, and health

professionals. Over the course of two years, Kaufman observed and interviewed critically ill patients, their families, doctors, nurses, and other hospital staff at three community hospitals. In...And a Time to Die, her research places us at the heart of that science-driven yet fractured and often irrational world of health care delivery, where empathetic yet frustrated, hard-working yet constrained professionals both respond to and create the anxieties and often inchoate expectations of patients and families, who must make decisions they are ill-prepared to make. Filled with actual conversations between patients and doctors, families and hospital staff,...And a Time to Die clearly and carefully exposes the reasons for complicated questions about medical care at the end of life: for example, why heroic treatment so often overrides humane care; why patients and families are ambivalent about choosing death though they claim to want control; what constitutes quality of life and life itself; and, ultimately, why a good death is so elusive. In elegant, compelling prose, Kaufman links the experiences of patients and families, the work of hospital staff, and the ramifications of institutional bureaucracy to show the invisible power of the hospital system itself -- its rules, mandates, and daily activity -- in shaping death and our individual experience of it. ...And a Time to Die is a provocative, illuminating, and necessary read for anyone working in or navigating the health care system today, providing a much-needed road map to the disorienting territory of the hospital, where we all are asked to make life-and-death choices.
