Travel, Tourism, and Identity Gabriel R. Ricci,2017-09-29 Travel, Tourism and Identity addresses the psychological and social adjustments that occur when people make contact with others outside their social, cultural, or linguistic groups. Whether such contact is the result of tourism, seeking exile, or relocating abroad, the volume's contributors demonstrate how one's identity, cultural assumptions, and worldview can be brought into question. In some cases, the traveller finds that bridging the social and cultural gap between himself and the new society is fairly easy. In other cases, the traveller discovers that reorienting himself requires absorbing a new cultural history and traditions. The contributors argue that making these adjustments will surely enhance the traveller's or tourist's experience; otherwise the traveller or tourist will be at risk of becoming a marginalized figure, one disconnected from the society that surrounds him. This latest volume in the Culture & Civilization series features a collection of essays on travel and tourism. The essays cover a range of topics from historical travels to modern social identities. They discuss ancient travels, contemporary travels in Europe, Africa and sustainable eco-tourism, and the politics of tourism. Essays also address experiences of Grenada's Spice Island identity, and the effects of globalization and migrations on personal identity.

Places of Invention Arthur P. Molella,Anna Karvellas,2015-06-30 The companion book to an upcoming museum exhibition of the same name, Places of Invention seeks to answer timely questions about the nature of invention and innovation: What is it about some places that sparks invention and innovation? Is it simply being at the right place at the right time, or is it more than that? How does "place"—whether physical, social, or cultural—support, constrain, and shape innovation? Why does invention flourish in one spot but struggle in another, even very similar location? In short: Why there? Why then? Places of Invention frames current and historic conversation on the relationship between place and creativity, citing extensive scholarship in the area and two decades of investigation and study from the National Museum of American History's Lemelson Center for the Study of Invention and Innovation. The book is built around six place case studies: Hartford, CT, late 1800s; Hollywood, CA, 1930s; Medical Alley, MN, 1950s; Bronx, NY,1970s; Silicon Valley, CA, 1970s–1980s; and Fort Collins, CO, 2010s. Interspersed with these case studies are dispatches from three "learning labs" detailing Smithsonian Affiliate museums' work using Places of Invention as a model for documenting local invention and innovation. Written by exhibition curators, each part of the book focuses on the central thesis that invention is everywhere and fueled by unique combinations of creative people, ready resources, and inspiring surroundings. Like the locations it explores, Places of Invention shows how the history of invention can be a transformative lens for understanding local history and cultivating creativity on scales of place ranging from the personal to the national and beyond.

misogynistic culture and to support games that represent a wider variety of human experiences. Rise of the Videogame Zinesters is a call to arms for anyone who's ever dreamed of making their own games. Anna's guide to game design encourages budding designers to bring their unique backgrounds and experiences to their creations and widen the playing field of an industry that has for too long catered to an adolescent male consumer base. Anna's newest game, Dys4ia, an autobiographical game about her experiences with hormone replacement therapy, has been featured in The Penny Arcade, IndieGames, and TigSource.

The Medium of the Video Game Mark J. P. Wolf,2010-07-22 Over a mere three decades, the video game has become the entertainment medium of choice for millions of people, who now spend more time in the interactive virtual world of games than they do in watching movies or even television. The release of new games or game-playing equipment, such as the PlayStation 2, generates great excitement and even buying frenzies. Yet, until now, this giant on the popular culture landscape has received little in-depth study or analysis. In this book, Mark J. P. Wolf and four other scholars conduct the first thorough investigation of the video game as an artistic medium. The book begins with an attempt to define what is meant by the term video game and the variety of modes of production within the medium. It moves on to a brief history of the video game, then applies the tools of film studies to look at the medium in terms of the formal aspects of space, time, narrative, and genre. The book also considers the video game as a cultural entity, object of museum curation, and repository of psychological archetypes. It closes with a list of video game research resources for further study.

Exploring the Collective Unconscious in the Age of Digital Media Schafer, Stephen Brock,2016-01-28 For decades we have witnessed the emergence of a media age of illusion that is based on the principles of physics—the multidimensionality, immateriality, and non-locality of the unified field of energy and information—as a virtual reality. As a result, a new paradigm shift has reframed the cognitive unconscious of individuals and collectives and generated a worldview in which mediated illusion prevails. Exploring the Collective Unconscious in a Digital Age investigates the cognitive significance of an altered mediated reality that appears to have all the dimensions of a dreamscape. This book presents the idea that if the digital media-sphere proves to be structurally and functionally analogous to a dreamscape, the Collective Unconscious researched by Carl Jung and the Cognitive Unconscious researched by George Lakoff are susceptible to research according to the parameters of hard science. This pivotal research-based publication is ideally designed for use by psychologists, theorists, researchers, and graduate-level students studying human cognition and the influence of the digital media revolution.
