Parallel Worlds Wynne Stevens, Wynne Stevens MR, 2016-06-14 Is our world unique? Many scientists theorize that there are worlds just like our own in other dimensions of time and space. We are not one-of-a-kind individuals. Copies of ourselves exist in these parallel worlds living lives virtually identical to our own. Were we able to travel across the Universe, could we observe ourselves as we live in these parallel worlds? This story is about one young man who is given the opportunity to visit himself and discover how his life might have been under different circumstances. Here in this other world he finds himself as a demented and broken old man, waiting to die after a meaningless and wasted life. It is a shocking discovery. The young man undertakes the responsibility of giving the old man purpose so that he may know love one more time.

Fourth Dimension Eric Walters, 2018-02-06 In a world with no power, chaos soon descends. A powerful look at the disintegration of society in the wake of a massive and mysterious outage that has knocked out all modern amenities. Fifteen-year-old Emma has moved house with her ex-Marine mother and younger brother. It's a brand-new condo building, which explains the semi-regular power outages, as workers complete the units around them. So Emma isn't particularly concerned when the latest blackout hits just as they are preparing to leave town on a long weekend camping trip. But then the car won't start, and their cellphones appear dead -- and all the cars outside their building seem to be stalled in a long traffic jam ... In the midst of what appears to be a massive power outage, with their camping gear packed and ready, Emma and her family canoe over to the islands, just offshore, to wait it out. But while they land on an isolated island, with a relatively hidden site, they are far from safe, as people become increasingly desperate to find food and shelter. And as the days pass, and the power remains out, the threat of violence becomes all too real.

Escape the Dimension Pranav Puttaparthi, 2014-02-08 Randy's just an ordinary kid being raised by his single mom, his father having died long ago. At least, that's what Randy's mom always told him, and he's had no reason to disbelieve her. When Randy's accepted into a prestigious school for the gifted, he finds evidence his dad may not be dead. He doesn't have much time to investigate though, because he's too busy trying to survive his weird new school. How weird? Usually schools have names. This one doesn't. It does, however, have a security system made up of holographic children, deadly spiked walls, and a principal who condemns students to a grim alternate reality called the Dimension. Randy, his new friend Jason, and school bully Brian must band together if they're to overcome the principal, his trap-filled school, and the horrors of the Dimension. Randy might learn more about his long-lost father, but first he's going to have to Escape the Dimension.

Dimension Travel IV Joseph Salvatore Pidorian, 2016-03-13

SECOND DIMENSION (Based On A True Story) King De Jesus, 2020-10-31 SECOND DIMENSION (Based On A True Story) A wonderful story to fall in love with other creatures or fairies and inspired by what really happened, based on real life the names, places, dates year and events are detailed in the story. let's protect the names and places mentioned above the story thank you.)

Tales From Another Dimension Robbie Sheerin, 2021-12-03 How will HG Wells react when he awakes 200 years in the future on a strange planet, faced with a terrible truth? Two young brothers make a frightening discovery about the neighbors. Do robots secretly want to rule us all? A scientist goes to extremes to change the future of mankind. But is it possible to change our destiny? Tales from another dimension is a strange and fantastical collection of ten short stories. Robbie Sheerin is inspired by classic Sci-fi, invoking nightmarish twists and turns with each story. Travel to another dimension and meet strange characters, sometimes human, and at times not so human. They will make you question the solidity of the earth and mankind. Explore prejudice, fear, imagination, kindness, empathy, and human frailty. The Truth Comes in Storms is wonderfully evocative -and the twist caught me completely unawares. Sheerin is a writer to keep an eye on! - Rob Yescombe. Writer of the movie Outside the Wire These stories are strong echoes of the classic science fiction of the 1950's, and bring back fond memories of the Twilight Zone. - Noel Chidwick. Founder and editor of the award winning sci-fi magazine Shoreline of Infinity Sheerin's Sci-fi shorts engage the mind and senses with dread and wonder at the same time. What happens on the moon.... stays on the moon, even it's from different planets. - ARZONO Publishing With a voice of clarity and surprise, Robbie Sheerin is well worth the quick and wondrous read each of his stories provides, the insight into our humanity (or inhumanity) they present, and the lasting impression they leave. Indulge and entertain yourself! - Jason J. Marchi, author of Venus Remembered with Ray Bradbury and the Barnes & Noble recognized bestseller The Legend of Hobbomock: The Sleeping Giant. Robbie Sheerin's insightful story The Protector is a chilling tale that underscores humanity's most troubling shortcomings. At its core, it reminds us that we must remain open-minded and compassionate toward those who are not like us or suffer the consequences..... ...The Future You Imagine, Doctor, Is Not The Future Of The Future is inventive and imaginative. In my opinion, all tales about our future should be appropriately apocalyptic. They should shake the foundations of our hopes and dreams - Leith MacArthur, author of The Death of Harry Crow, from The William Snow Series of thrillers.

The Fifth Dimension Tube Murray Leinster, 2015-10-04 THE generator rumbled and roared, building up to its maximum speed. The whole laboratory quivered from its vibration. The dynamo hummed and whined and the night silence outside seemed to make the noises within more deafening. Tommy Reames ran his eyes again over the power-leads to the monstrous, misshapen coils. Professor Denham bent over one of them, straightened, and nodded. Tommy Reames nodded to Evelyn, and she threw the heavy multiple-pole switch. There was a flash of jumping current. The masses of metal on the floor seemed to leap into ungainly life. The whine of the dynamo rose to a scream and its brushes streaked blue flame. The metal things on the floor flicked together and were a tube, three feet and more in diameter. That tube writhed and twisted. It began to form itself into an awkward and seemingly impossible shape, while metal surfaces sliding on each other produced screams that cut through the din of the motor and dynamo. The writhing tube strained and wriggled. Then there was a queer, inaudible snap and something gave. A part of the tube quivered into nothingness. Another part hurt the eyes that looked upon it.

Die Dimension. Life is a Story - story.one Laura Fuchs, 2023-07-31 In einer verborgenen Untergrundwelt, der Dimension, möchte der junge Thilo, der Sohn des Königs, an die Macht kommen und sich seinen Platz auf dem Thron sichern. Dafür geht Thilo dunkle Bündnisse ein und begeht schreckliche Gräueltaten. Eine Geschichte über Intrigen, Hass, Leidenschaft und Liebe, in einem spannenden und mysteriösen Setting.

Rediscovering the Fifth dimension Jan Edvin Andersen, 2023-05-31 This brand-new universal model and physics was first published, in book form, September 26th, 2015! Remember the important date! This book, is a brand new textbook, in a brand new basic 5-dimensional quantum physics, and is written for future physicists and researchers! This new model is a full 'visualization' of all these 'extra' undetectable quantum physical dimensions! 'Rediscovering the fifth dimension' is a brand new 5-dimensional quantum physics model that builds up the entire universe, only on energetic oscillating fields, and a very special universal substance! This substance is actually the difference between whether something can be seen, discovered, detected or not! This universal substance was fully proven by Carl David Anderson as early as the 1930s! This 'semi-physical substance' is produced only by the Higg's field! That's the only reason they were able to discover this Higg's field as the absolute only possible field they could detect in the particle accelerator! They found absolutely no physical particles! Remember this! This is very important if you want to understand the universe as it really appears! This new quantum physical hologram model's atoms, are only these 4-dimensional oscillating energetic fields, which are actually fully proven, by the particle accelerator, in 2016! As a result, 99% of the universe actually consists of an undetectable quantum physics side, and 1% is this strange substance! This is where reality comes to the

'surface' and becomes fully 'visible', in the highly active 5-dimensional quantum physical universal engine room! The fact that something is visible and detectable is only due to the 'substance'! This new model reveals Tesla technology and stealth technology, and points out the very reason why the UFO's can disappear from today's high-tech radars! The reason why the UFO can disappear from radar, is that there are no physical particles left in the UFO, only the atom! This 'substance' can 'disappear' again, completely controlled, also the stealth effect occurs, in the UFO! The particle accelerator's final and very clear evidence just says that there can be no physical particles, and that it actually proves that there has never been a big-bang!! Still today, is this fake big-bang universe only researched and taught!? Why? Is it only because scientists don't understand the right universe that the particle accelerator actually proved to them should be there!? The energetic oscillating field universe!?

The Boy Who Reversed Himself William Sleator,1998-02 When Laura discovers that the unpopular boy living next door to her has the ability to go into the fourth dimension, she makes the dangerous decision to accompany him on his journeys

Dimension Why #1: How to Save the Universe Without Really Trying John Cusick,2020-09-29 A 31st-century boy and a 21st-century girl team up to save the universe, evade an evil race of bog mutants, and make a quick pit stop to visit the moon in Dimension Why. John Cusick's middle grade debut will transport you to a vast fantasy world full of absurd humor that will keep you gasping all the way to the twist ending .Lola Ray was a normal 21st-century girl until a poorly timed sneeze in an X-ray machine flung her a thousand years into the future. To get back home, she'll have to team up with Phineas T. Fogg, a 31st-century boy whose only friend up until now has been his talking teddy bear and whose overprotective parents have never let him leave his high-tech apartment. Together, Lola and Phin will have to cross the galaxy, brave a mysterious invitation to tea, and escape a race of all-powerful interdimensional beings who are convinced that Lola knows the answer to the universe's biggest question . . . the question of The End.

Dichronauts Greg Egan,2017-07-11 Seth is a surveyor, along with his friend Theo, a leech-like creature running through his skull who tells Seth what lies to his left and right. Theo, in turn, relies on Seth for mobility, and for ordinary vision looking forwards and backwards. Like everyone else in their world, they are symbionts, depending on each other to survive. In the universe containing Seth's world, light cannot travel in all directions: there is a "dark cone" to the north and south. Seth can only face to the east (or the west, if he tips his head backwards). If he starts to turn to the north or south, his body stretches out across the landscape, and to rotate as far as north-north-east is every bit as impossible as accelerating to the speed of light. Every living thing in Seth's world is in a state of perpetual migration as they follow the sun's shifting orbit and the narrow habitable zone it creates. Cities are being constantly disassembled at one edge and rebuilt at the other, with surveyors mapping safe routes ahead. But when Seth and Theo join an expedition to the edge of the habitable zone, they discover a terrifying threat: a fissure in the surface of the world, so deep and wide that no one can perceive its limits. As the habitable zone continues to move, the migration will soon be blocked by this unbridgeable void, and the expedition has only one option to save its city from annihilation: descend into the unknown.

The Emergence of the Fourth Dimension Mark Blacklock,2018 The idea of the fourth dimension of space has been of sustained interest to nineteenth-century and Modernist studies since the publication of Linda Dalrymple Henderson's *The Fourth Dimension and Non-Euclidean Geometry in Modern Art* (1983). An idea from mathematics that was appropriated by occultist thought, it emerged in the fin de siècle as a staple of genre fiction and grew to become an informing idea for a number of important Modernist writers and artists. Describing the post-Euclidean intellectual landscape of the late nineteenth century, *The Emergence of the Fourth Dimension* works with the concepts derived from the mathematical possibilities of n-dimensional geometry-co-presence, bi-location, and interpenetration; the experiences of two consciousnesses sharing the same space, one consciousness being in two spaces, and objects and consciousness pervading each other—to examine how a crucially transformative idea in the cultural history of space was thought and to consider the forms in which such thought was anchored. It identifies a corpus of higher-dimensional fictions by Conrad and Ford, H.G. Wells, Henry James, H.P. Lovecraft, and others and reads these closely to understand how fin de siècle and early twentieth-century literature shaped and were in turn shaped by the reconfiguration of imaginative space occasioned by the n-dimensional turn. In so doing it traces the intellectual history of higher-dimensional thought into diverse terrains, describing spiritualist experiments and how an extended abstract space functioned as an analogue for global space in occult groupings such as the Theosophical Society.

The Fourth Dimension David Y. Cho,Yong-gi Cho,R. Whitney Manzano,1979 In this sequel to *The Fourth Dimension*, Volume 1, Dr. David Yonggi Cho shows how you can develop the dynamic faith and true communion with God which overcome spiritual obstacles and surpass barriers.

The Voyage Into The Next Dimension Nikole Jordan,2018-12-09 *The Voyage Into The Next Dimension* is a collection of short stories and a little poetry. This exciting book contains stories ranging from an imaginary friend disappearing, alien abductions, and so much more

Emotion and Narrative Tilmann Habermas,2018-12-20 The way we tell stories influences how others react to our emotions, and impacts how we cope with emotions ourselves.

The Religious Dimension of Intercultural Education Heid Leganger-Krogstad,2011 This book explores the religious dimension in intercultural education and states that religion plays a key role in value conflicts and worldview differences in schools in pluralistic societies. Religion is considered having a double role, both as the reason for deep differences in mental mapping and worldviews and as a contributor to intercultural understanding and dialogue. The book discusses the role religion has in education both at an institutional level, in the whole school society, and in Religious Education as a specific school subject. Underlying Western worldviews in subject curricula and subject didactics need to be revealed and contested to increase the benefit of education for all students. It argues for the need of a contextual understanding to help teaching and learning address religious diversity in schools.

Influences of Pre-Christian Mythology and Christianity on Old Norse Poetry Andrew McGillivray,2018-10-08 The Eddic poem *Vafþrúðnismál* serves as a representation of early pagan beliefs or myths and as a myth itself; the poem performs both of these functions, acting as a poetic framework and functioning as sacred myth. In this study, the author looks closely at the journey of the Norse god Óðinn to the hall of the ancient and wise giant Vafþrúðnir, where Óðinn craftily engages his adversary in a life-or-death contest in knowledge.

The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition Linda Dalrymple Henderson,2018-05-18 The long-awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art. In this groundbreaking study, first published in 1983 and unavailable for over a decade, Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception—the curved spaces of non-Euclidean geometry and, most important, a higher, fourth dimension of space—were central to the development of modern art. The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence. That iconoclastic idea encouraged radical innovation by a variety of early twentieth-century artists, ranging from French Cubists, Italian Futurists, and Marcel Duchamp, to Max Weber, Kazimir Malevich, and the artists of De Stijl and Surrealism. In an extensive new Reintroduction, Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000. Although largely eclipsed by relativity theory beginning in the 1920s, the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s. In a remarkable turn of events, it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics (with its ten-

or eleven-dimensional universes) and computer graphics. Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller, Robert Smithson, and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak.
