Why Dinosaurs Matter Kenneth Lacovara,2017-09-19 What can long-dead dinosaurs teach us about our future? Plenty, according to paleontologist Kenneth Lacovara, who has discovered some of the largest creatures to ever walk the Earth. By tapping into the ubiquitous wonder that dinosaurs

inspire, Lacovara weaves together the stories of our geological awakening, of humanity's epic struggle to understand the nature of deep time, the meaning of fossils, and our own place on the vast and bountiful tree of life. Go on a journey—back to when dinosaurs ruled the Earth—to discover how dinosaurs achieved feats unparalleled by any other group of animals. Learn the secrets of how paleontologists find fossils, and explore quirky, but profound questions, such as: Is a penguin a dinosaur? And, how are the tiny arms of T. rex the key to its power and ferocity? In this revealing book, Lacovara offers the latest ideas about the shocking and calamitous death of the dinosaurs and ties their vulnerabilities to our own. *Why Dinosaurs Matter* is compelling and engaging—a great reminder that our place on this planet is both precarious and potentially fleeting. “As we move into an uncertain environmental future, it has never been more important to understand the past.”

Enjoy the unique combination of visual illustrations and unforgettable accounts. Discover why the author calls into question what we've been taught to believe and understand about the history of dinosaurs and man. Every legend is said to include some grain of truth, and for years co-author Dave Woetzel has sought to separate fact from fiction as he explores mysteries related to dinosaurs, mankind's history, and the biblical time-line. Teaming with artist and designer Richard Dobbs, the two have created a visual archive of expeditions

and intriguing clues to explore, all of which highlight the connection to the authority and reliability of Scripture. Provocative artifacts from around the world are examined in an exquisite, full-color book that hints at man's familiarity with living dinosaurs. Here is the study of cryptozoology and the discoveries that seem to defy all evolutionary time-lines, vividly illustrated and filled with rare photos.
