Natural History Dioramas Sue Dale Tunnicliffe, Annette Scheerso, 2014-12-05
This book brings together in a unique perspective aspects of natural history dioramas, their history, construction and rationale, interpretation and educational importance, from a number of different countries, from the west coast of the USA, across Europe to China. It describes the journey of dioramas from their inception through development to visions of their future. A complementary journey is that of visitors and their individual sense making and construction of their understanding from their own starting points, often interacting with others (e.g. teachers, peers, parents) as well as media (e.g. labels). Dioramas have been, hitherto, a rather neglected area of museum exhibits but a renaissance is beginning for them and their educational importance in contributing to people's understanding of the natural world. This volume showcases how dioramas can reach a wide audience and increase access to biological knowledge.

Natural History Dioramas – Traditional Exhibits for Current Educational Themes Annette Scheersoi, Sue Dale Tunnicliffe, 2018-11-14 This book presents the history of natural history dioramas in museums, their building and science learning aspects, as well as current developments and their place in the visitor experience. From the early 1900s, with the passage of time and changes in cultural norms in societies, this genre of exhibits evolved in response to the changes in entertainment, expectations and expressed needs of museum visitors. The challenge has always been to provide meaningful, relevant experiences to visitors, and this is still the aim today. Dioramas are also increasingly valued as learning tools. Contributions in this book specifically focus on their educational potential. In practice, dioramas are used by a wide range of educational practitioners to assist learners in developing and understanding specific concepts, such as climate change, evolution or conservation issues. In this learning process, dioramas not only contribute to scientific understanding and cultural awareness, but also reconnect wide audiences to the natural world and thereby contribute to the well-being of societies. In the simultaneously published book: "Natural History Dioramas – Traditional Exhibits for Current Educational Themes, Socio-cultural Aspects" the editors focus on socio-cultural issues and the potential of using dioramas to engage various audiences with – and in – contemporary debates and big issues, which society and the natural environment are facing.

A Tutorial for Making Military Dioramas and Models Bjorn Jacobsen,2017-08-17 This book is made for all who would like to make a military diorama and for all those who already are making military dioramas. Many have been building scale models and now want to put them in a diorama context. This book is full of ideas and describes the way the author has made many of his world-renowned dioramas. This book is not about building the perfect model or diorama. It is about creating a snapshot of history, to freeze a moment in time and, about all, to tell a story. The beauty of building a diorama is that there is no right or wrong way to do it. It is entirely up to your creativity and imagination. The options are endless and fascinating! This book describes more than twenty-five different dioramas and gives you a fantastic insight of how these were created. With more than 800 pictures and in-depth description, it gives you numerous tips and guidance which will help you building your own diorama. The Autor, Bjørn Jacobsen, built his first scale model in 1957, 15 years old. Since then he has made numerous models, mostly WWII planes, but also many extraordinary dioramas. After years of modelling, he found it more and more rewarding and challenging to make dioramas, because it required not only modelling skills but also a sense of realism and a lot of research and scratch building to get it as realistic as possible. It also gives him the opportunity to let the models tell their story - and a story, they always have. For years, he has posted his work to the many model groups around the world and he often has been asked to publish some of his amazing work. He has now taken those requests seriously and has written this book. His hope is that his models and dioramas might inspire some to try out this exciting hobby.

Ship Dioramas David Griffith,2013-10-17 This book is about the art of displaying waterline models. By their very nature, ship models that do not show the full hull and are not mounted on an artificial stand cry out for a realistic setting. At its most basic this can be just a representation of the sea itself, but to give the model a context — even to tell some sort of story — is far more challenging. This is the province of the diorama, which at its most effective is a depiction of a scene or an event in which the ship model takes centre stage. As with a painting, the composition is a vital element and this book devotes much of its space to what works and what does not, and illustrates with photographic examples why the best maritime dioramas have visual power and how to achieve that impact. Individual chapters explore

themes like having small craft in attendance on the main subject, multiple-model scenarios, dockyards and naval bases, and the difficulties of replicating naval combat realistically. It also looks at both extremes of modelmaking ambition: the small single-ship exposition and the largest, most ambitious projects of the kind meant for museum display. The book concludes with some of the most advanced concepts – how to create drama and the illusion of movement, and how to manipulate perspective. Illustrated throughout with colour photos, the more abstract discussion is backed with practical 'how to' sections, so anyone who builds waterline ship model will benefit from reading this book. As featured in 'Glasgow Now'.

Natural History Dioramas Annette Scheerso, Sue Dale Tunnicliffe, 2019 This book focuses on socio-cultural issues and the potential of using dioramas in museums to engage various audiences with - and in - contemporary debates and big issues, which society and the natural environment are facing, such as biodiversity loss. From the early 1900s, with the passage of time and changes in cultural norms in societies, this genre of exhibits evolved in response to the changes in entertainment, expectations and expressed needs of museum visitors. The challenge has always been to provide meaningful, relevant experiences to visitors, and this is still the aim today. Dioramas are also increasingly valued as learning tools. In this learning process, dioramas not only contribute to scientific understanding and cultural awareness, but also reconnect wide audiences to the natural world and thereby contribute to the well-being of societies. In the simultaneously published book: Natural History Dioramas - Traditional Exhibits for Current Educational Themes, Science Educational Aspects the editors discuss the history of dioramas and their building and science learning aspects, as well as current developments and their place in the visitor experience.

Full Catch Diorama Nick Salomon, 2017-07-20 It's the golden age of the diorama. Full sensory immersion entertainment that has rendered movies, video games and VR obsolete. Ted Davies is tired of being a wage slave. Looking to cash in the fad before it dies down, he partners up with his ex-girlfriend to open their own indie studio. Together, they accidentally come up with next generation diorama technology that will change the world. Not necessarily for the best, but there are profits to be made.

Culture/Power/History Nicholas B. Dirks, Geoff Eley, Sherry B. Ortner, 2021-04-13 The intellectual radicalism of the 1960s spawned a new set of questions about the role and nature of the political in social life, questions that have since revolutionized nearly every field of thought, from literary criticism through anthropology to the philosophy of science. Michel Foucault in particular made us aware that whatever our functionally defined roles in society, we are constantly negotiating questions of authority and the control of the definitions of reality. Such insights have led theorists

to challenge concepts that have long formed the very underpinnings of their disciplines. By exploring some of the most debated of these concepts-- culture, power, and history--this reader offers an enriching perspective on social theory in the contemporary moment. Organized around these three concepts, *Culture/ Power/History* brings together both classic and new essays that address Foucault's new economy of power relations in a number of different, contestatory directions. Representing innovative work from various disciplines and sites of study, from taxidermy to Madonna, the book seeks to affirm the creative possibilities available in a time marked by growing uncertainty about established disciplinary forms of knowledge and by the increasing fluidity of the boundaries between them. The book is introduced by a major synthetic essay by the editors, which calls attention to the most significant issues enlivening theoretical discourse today. The editors seek not only to encourage scholars to reflect anew on the course of social theory, but also to orient newcomers to this area of inquiry. The essays are contributed by Linda Alcoff (Cultural Feminism versus Post-Structuralism), Sally Alexander (Women, Class, and Sexual Differences in the 1830s and 1840s), Tony Bennett (The Exhibitionary Complex), Pierre Bourdieu (Structures, Habitus, Power), Nicholas B. Dirks (Ritual and Resistance), Geoff Eley (Nations, Publics, and Political Cultures), Michel Foucault (Two Lectures), Henry Louis Gates, Jr. (Authority, [White] Power and the [Black] Critic), Stephen Greenblatt (The Circulation of Social Energy), Ranajit Guha (The Prose of Counter-Insurgency), Stuart Hall (Cultural Studies: Two Paradigms), Susan Harding (The Born-Again Telescandals), Donna Haraway (Teddy Bear Patriarchy), Dick Hebdige (After the Masses), Susan McClary (Living to Tell: Madonna's Resurrection of the Fleshly), Sherry B. Ortner (Theory in Anthropology since the Sixties), Marshall Sahlins (Cosmologies of Capitalism), Elizabeth G. The Sublimity of Document Scott MacDonald, 2019-07-01 The Sublimity of Document: Cinema as Diorama is a collection of in-depth, substantive interviews with moving-image artists working avant-doc, that is, making films that explore the territory between documentary and experimental cinema. The book uses the early history of the museum habitat diorama of animal life, specifically the Hall of African Mammals at the American Museum of Natural History, as a way of rethinking both early and modern cinema document--and especially those recent filmmakers and films that are devoted to providing viewers with panoramic documentations of places and events that otherwise they might never have opportunities to experience in person. This international collection of 27 interviews follows on MacDonald's earlier *Avant-Doc: Intersections of Documentary and Avant-Garde Cinema* (Oxford, 2015). The interviews, organized panoramically within the collection, are dense with information and insight, and readable by specialists and non-specialists alike. In most instances, these are the most in-depth and expansive-sometimes the first-interviews with these filmmakers. Together, these interviews offer an engaging panorama of the recent history and geography of cinema devoted to documenting the world around us, as well as an in-depth look at the challenges and accomplishments of filmmakers willing to go anywhere on the planet (or on the internet!) to document what they believe we need to see. MacDonald's general introduction provides an overall context

for the collection, which includes interviews with Ron Fricke, Gustav Deutsch, Laura Poitras, Fred Wiseman, Nikolaus Geyrhalter, Bill Morrison, Brett Story, Abbas Kiarostami, Lois Patiño, Dominic Gagnon, Erin Espelie, Yance Ford, Janet Biggs, Carlos Adriano, Craig Johnson, Ben Russell, Betzy Bromberg, James Benning, Maxim Pozdorovkin, along with several veterans of Harvard's Sensory Ethnography Lab (and with the executive directors of the distributor, Documentary Educational Resources, which has served the field of independent documentary for nearly fifty years)--each interview is introduced with MacDonald's overview of the interviewee's life and work. The book includes filmographies and selected bibliographies for all the filmmakers.

The Art of the Anthropological Diorama Noémie Etienne, 2021-08-23 Dioramen bewegen sich im Grenzbereich verschiedener Disziplinen. Sie wurden im 19. Jahrhundert im Zuge von Reformen eingeführt, die die pädagogische Dimension der Museen weiterentwickelten. Dioramen mit menschlichen Figuren sind heute scharfer Kritik ausgesetzt. Dieses Buch untersucht die anthropologischen Dioramen zweier nordamerikanischer Museen des frühen 20. Jahrhunderts: des American Museum of Natural History, New York, und des New York State Museum, Albany. Noémie Etienne analysiert die Arbeit der Künstler und Wissenschaftler, die die Dioramen anfertigten, und zeigt, dass Dioramen als Mittel der Wissenserzeugung und -vermittlung eine Geschichte erzählen, die immer politisch ist. Innerhalb des Museums können sie Visionen des Andersseins und der Abstammung erschaffen, die es kritisch zu betrachten gilt.
