**Diploma Matters** Linda Murray, 2011-06-20 **DIPLOMA MATTERS** In our current education system too many high school students wind up with too few choices. NEGRONI, senior vice president, College Board “This is a story worth reading, including the specific implications for schools and districts nationwide.” –MICHAEL W. KIRST, emeritus professor of Education and Business Administration, Stanford University; president, California State Board of Education; author, *Political Dynamics Of American Education* “This book is a definitive ‘how to’ for effective, meaningful, and lasting school reform.” –KATHY BURKHARD, former president, San Jose Teachers’ Association

**Diploma Mills** A. J. Angulo, 2016-03-15 A provocative history of for-profit colleges and universities. Honorable Mention, PROSE Education Practice Award by the American Association of Publishers, FY17 The most significant shift in higher education over the past two decades has been the emergence of for-profit colleges and universities. These online and storefront institutions lure students with promises of fast degrees and “guaranteed” job placement, but what they deliver is often something quite different. In this provocative history of for-profit higher education, historian and educational researcher A.

J. Angulo tells the remarkable and often sordid story of these “diploma mills,” which target low-income and nontraditional students while scooping up a disproportionate amount of federal student aid. Tapping into a little-known history with big implications, Angulo takes readers on a lively journey that begins with the apprenticeship system of colonial America and ends with today’s politically savvy \$35 billion multinational for-profit industry. He traces the transformation of nineteenth-century reading and writing schools into “commercial” and “business” colleges, explores the early twentieth century’s move toward professionalization and progressivism, and explains why the GI Bill prompted a surge of new for-profit institutions. He also shows how well-founded concerns about profit-seeking in higher education have evolved over the centuries and argues that financial gaming and maneuvering by these institutions threatens to destabilize the entire federal student aid program. This is the first sweeping narrative history to explain why for-profits have mattered to students, taxpayers, lawmakers, and the many others who have viewed higher education as part of the American dream. *Diploma Mills* speaks to today’s concerns by shedding light on unmistakable conflicts of interest long associated with this scandal-plagued class of colleges and universities.

*My Diploma Doesn't Seem to Work: Principles they forgot to teach in High School* Moisés

Castillo, 2017-09-12 *My Diploma doesn't seem to work* was written by a recent high school grad who is passionate about helping others see through an

established system and find their greater potential. What you will get out of reading this book is a shifted perspective and an abundance of self-awareness of the systematic structure that every student is obligated to go through. Whether the student becomes successful outside of school, comes down to how well they are self-aware of their surroundings and environment. Concepts that the educational curriculum leaves out will be addressed in the book through a series of vignettes and analysis along with recommendations for further knowledge. High school education is a subject that should no longer be looked over, by rather understanding there is a hole in the system. And the first step in solving a problem is realizing there is a problem.

*The International Baccalaureate Diploma Program and the School Library* Anthony Tilke, 2011-03-11  
This book, a blend of practice and theory, shows how the school library can contribute to the success of the International Baccalaureate Diploma Program. Written for librarians in schools that are applying to offer the program as well as those who already work with it, *The International Baccalaureate Diploma Program and the School Library: Inquiry-Based Education* provides information and strategies specifically relating libraries to the IBDP. The guide includes information about the IBDP ranging from the subject matrix to unique aspects of the program, such as the Theory of Knowledge course, the Extended Essay requirement, and the Learner Profile. The book also discusses other important features of IB programs, such as internationalism

and academic honesty. Finally, it blends theory and practice by providing details and findings from the only two-year research study to follow students and teachers through the IBDP. The study demonstrates the role of the school library in the program, showing how both students and teachers used and valued it. Each chapter concludes with a series of points or strategies for the librarian to reflect upon and/or use as the basis of action.

**Diploma Mills** David Wood Stewart, Henry A. Spille, 1988 Stewart and Spille probe the underworld of American higher education--diploma mills that grant fraudulent or academically deficient degrees and credentials. They show why these operations are booming, what techniques they use to lure prospective students, and how many of these businesses operate legally, under lax state requirements. With real-world examples, the authors describe the relationship of diploma mills

to fraudulent occupational licensure, identify states in which the activity is rampant, and explore foreign diploma mills in America and American diploma mills operating overseas. They describe the trade in fraudulent transcripts, letters of reference, educational counselling, honorary doctorates, term papers and dissertations, and misleading directories; explain how to distinguish legitimate from fraudulent degree-granting institutions; and conclude with recommendations for reversing the diploma mill boom.
