The Art of Confectionary ... Also how to Make All Sorts of Biscakes ... The Second Edition Edward Lambert,1745

A Concordance to the Poems of Robert Browning Leslie Nathan Broughton,Benjamin Franklin Stelter,1925

Models for Concurrency Uri Abraham,2020-08-27 Concurrent systems are generally understood in terms of behavioral notions. Models for Concurrency analyzes the subject in terms of events and their temporal relationship rather than on global states. It presents a comprehensive analysis of model theory applied to concurrent protocols, and seeks to provide a theory of concurrency that is both intuitively appealing and rigorously based on mathematical foundations. The book is divided into three main sections. The first introduces the required concepts from model theory, details the structures that are used to model concurrency, gives an in-depth description and explanation of the semantics of a simple language that allows concurrent execution of sequential programs, and deals with the question of resolving executions into higher-level and lower-level granularities. The second and third sections apply the theory developed to practical examples, and an exposition of the producer/consumer problem with details of two solutions is given. The author also deals with message passing, as opposed to shared memory.

High Performance Computing Alex Veidenbaum,Kazuki Joe,Hideharu Amano,Hideo Aiso,2003-11-18 The 5th International Symposium on High Performance Computing (ISHPC-V) was held in Odaiba, Tokyo, Japan, October 20-22, 2003. The symposium was thoughtfully planned, organized, and supported by the ISHPC Organizing Committee and its collaborating organizations. The ISHPC-V program included two keynote speeches, several invited talks, two panel discussions, and technical sessions covering theoretical and applied research topics in high-performance computing and representing both academia and industry. One of the regular sessions highlighted the research results of the ITBL project (IT-based research laboratory, <http://www.itbl.riken.go.jp/>). ITBL is a Japanese national project started in 2001 with the objective of realizing a virtual joint research environment using information technology. ITBL aims to connect 100 supercomputers located in main Japanese scientific research laboratories via high-speed networks. A total of 58 technical contributions from 11 countries were submitted to ISHPC-V. Each paper received at least three peer reviews. After a thorough evaluation process, the program committee selected 14 regular (12-page) papers for presentation at the symposium. In addition, several other papers with favorable reviews were recommended for a poster session presentation. They are also included in the proceedings as short (8-page) papers.

The program committee gave a distinguished paper award and a best student paper award to two of the regular papers. The distinguished paper award was given for “Code and Data Transformations for Improving Shared Cache Performance on SMT Processors” by Dimitrios S. Nikolopoulos. The best student paper award was given for “Improving Memory Latency Aware Fetch Policies for SMT Processors” by Francisco J. Cazorla.

I Can Make You Happy Paul McKenna, Ph.D.,2016-09-06 Do you want to be happier? Do you want to stop feeling bad right now? Do you want to experience greater joy than ever before? What if it was possible to feel happier than you had ever imagined before? It doesn't matter whether you're sad, bored, or depressed—or even if you're already quite content—Paul McKenna can help you become a whole lot happier! Scientific research reveals that our levels of happiness aren't fixed; we can change them through our thoughts and actions. Dr. McKenna has spent the past 25 years developing a system that can have an immediate, measurable impact on people's emotional well-being. This book uses the latest, most powerful psychological techniques and a downloadable guided hypnosis session to help readers feel really good right now. The human mind is like a computer, with its own software that governs how we think and act. Most human problems are caused by negative programs running in the unconscious mind. This book and audio session help you install positive programs that seek out and magnify the factors that create happiness. Use it to take control of your life and start feeling happier today!
