Dodge Challenger & Charger Randy Bolig, 2016-02-15

The new Dodge Charger, Challenger, and other LX-platform cars bring modern V-8 performance to unparalleled heights, and the new Challenger and Charger Hellcats are the most powerful American production cars today. The outrageous performance and audacious styling has earned a large and dedicated following. However, you can tune and modify the Chrysler 300, Dodge Magnum, Charger, and Challenger for more performance, and for many owners, fast is not fast enough. In the pursuit of a higher-performing LX-platform car, former Mopar Muscle editor Randy Bolig has created this book to show you how to extract ultimate performance from these cars. Chrysler has built more than one million Chargers, Challengers, and other full-size-platform cars starting with the Dodge Magnum and Chrysler 300. These cars offer competent handling, braking, and suspension performance, but they can be made much better through a set of targeted upgrades using better aftermarket equipment. Bolig gives you a comprehensive guide to the cars and engines. He details the features, benefits, and drawbacks of each package or set of upgrades, so you select the best modification for your car, application, and budget. He also covers basic to extreme modifications for the R/T and SRT8 models with the 5.7-, 6.1-, and 6.4-liter Hemi engines. Guidance for installing heads, rotating assemblies, ignition upgrades, higher-performance injectors, and many other parts are provided. But, this book doesn't just discuss performance; it shows you how to do it with comprehensive, step-by-step product installs for a cat-back exhaust system, hand-held ignition tuner, cold-air intake, and supercharger. If you have been searching for the best performance package to make your Charger, Challenger,

or full-size Chrysler car stand out from the crowd, you need this book. It has the latest information, so you can learn how to install all the products and get your car back out on the road.

Mopar Muscle Robert Genat, Now in paperback, this book covers Chrysler's incredible series of muscle cars. In

1955 Chrysler introduced the first of its famed 300 letter series cars. The company designed a stylish, sporty car, stuffed in one of its potent Hemi engines, and gave birth to the American muscle car. The C-300's combination of style and performance put the Mopar brand ahead of its competitors in the postwar performance race. When the Detroit performance wars began in earnest during the 1960s, Chrysler was well positioned to build the most outrageous, bodacious cars of an outrageous, bodacious era, cars like the famed Charger, Hemi Cuda, Road Runner, Superbird, and Challenger T/A. These cars dominated the dragstrips as well as the NASCAR ovals, and with color combinations guaranteed to burn out the corneas of your eyes if you stared at them directly, they ruled the streets of America; they ruled not just the streets, but the drive ins and parking lots. Nothing was cooler than Mopar muscle. Over the years these legendary Mopar muscle cars were the fastest, baddest assed, most outrageous machines to rip up American pavement. This lavishly produced book is definitely a feast for all fans of this line of cars: the photography (by David Newhardt) is absolutely stunning. Not only are the pictures big, and of the highest quality, but the thought that has gone into their composition is plain for all to see. It could be argued that given the striking nature of these cars, and the wonderful backdrops, it would be hard to go wrong, but Newhardt went the extra mile here, and it shows. The story is also very comprehensive, listing all of the cars from the line, and taking time to tell the story in a well-researched, yet caring way. It is obvious that Robert Genat knows the subject well and loves it even more. . . . This book is a must-have for all lovers of American muscle, and thanks to the sheer depth of its coverage and drop-dead-gorgeous photography, the asking price of £34.99 is something of a bargain. - Classic

Dodge Dynamite! Peter Grist, 2015-01-29 Since the 1950s, Dodge has produced a series of charismatic performance cars that have given the company a unique reputation among American car makers. The original Charger and Challenger and the more recent Viper and Caliber SRT are outstanding examples of the company's commitment to cars of high performance and aggressive styling. Peter Grist's pictorial history of these typically American machines gives a fascinating insight into their ancestry and evolution and celebrates the huge impact they have made on the road and on the track. His account is an exciting introduction that will appeal to everyone who is interested in American automobile history. When the first Dodge performance cars were conceived in the early 1950s, they were a brave step for a company that was well known for its dependable saloons and pickups. Peter Grist describes this change of direction and the radical new thinking that resulted in the creation of the innovative Dodge Hemi V8 of 1953. This remarkable engine provided the power for the first sporting Dodges and led to the race-bred D-500 series of 1956, the first Dodge Muscle car. But Dodge's reputation for creating big, potent, sporting cars was really consolidated in the 1960s and early 1970s the muscle-car era when the Dart, Charger and Challenger were so successful on the road, the race track and drag strip. The book features these historic cars and the drivers who have raised Dodge to a pre-eminent position over the last 50 years. Featuring illustrations of Dodge's styling experiments and concept cars, which had such a strong effect on their production models, from the first Dodge concept the 1954 Firearrow up to the most recent Challenger and Hornet. The book brings together an evocative collection of over 200 photographs and adverts

that offer a unique look at ALL of Dodge s fast cars in one book. this is an entertaining and informative guide to the Dodge tradition which will be essential reading for Dodge enthusiasts and for everyone who enjoys their cars at full speed.
