Security Intelligence Services in New Democracies K. Williams,D. Deletant,2000-12-18 The first account of the secret police in Eastern Europe and after 1989, this book uses a wide range of sources, including archives, to identify what has and has not changed since the end of communism. After explaining the structure and workings of two of the area's most feared services, Czechoslovakia's StB and Romania's Securitate, the authors details the creation of new security intelligence institutions, the development of contacts with the West, and forms of democratic control.

.NET 2.0 Interoperability Recipes Bruce Bukovics,2006-11-22 It is difficult to just throw out all existing code and start over when a new technology arrives. That's the situation with Microsoft .NET, which represents a new and improved way of developing software for the Windows platform. Wouldn't you would love to rewrite all of your existing code in the newer managed code environment that .NET provides? However, you have that little problem known as legacy code. Fortunately, Microsoft .NET provides a rich set of tools interoperation with existing code. This book is written as a guide for

Windows developers transitioning from native Windows code to .NET managed code.

DNA Synthesis M. Kohiyama, 2012-12-06 This book represents the proceedings of the NATO Advanced Study Institute held in Santa Flavia, Sicily from the 20 - 29th June, 1977. In addition to the review talks given by the Lecturers at the Institute it proved feasible for other topics to be splendidly reviewed. This has led to a much wider subject coverage than would otherwise have been possible. The discussion sessions which followed these review talks were extremely valuable and almost all the participants played an active role. Essentially all of the verbal contributions presented at this ASI were

subsequently put into written format, which is why these proceedings are so extensive. They do, however, provide an up-to-date summary of DNA synthesis in a wide variety of subjects with many of the remaining problems clearly expressed. The editing of these contributions has been essentially confined to alterations in style and presentation. We have taken some liberties in the re-organization of the papers into related sections. We express our thanks to those who helped organize the ASI and to the session conveners who attempted to confine and contain those who became too verbose. We are indebted to NATO, Scientific Affairs Division for the financial support that made this ASI possible. Finally, we express our gratitude to Miss Brenda Marriott. She typed all seventy five papers in this book, which was originally estimated to be less than half its present length and which just grew and grew. She deserves our special thanks.
