Try This At Home: Adventures in songwriting Frank Turner,2019-03-21 *THE SUNDAY TIMES BESTSELLER* The brand new memoir from the Sunday Times bestselling author of *The Road Beneath My Feet*. Taking 36 songs from his back catalogue, folk-punk icon Frank Turner explores his songwriting process. Find out the stories behind the songs forged in the hedonistic years of the mid-2000s North London scene, the ones perfected in Nashville studios, and everything in between. Some of these songs arrive fully-formed, as if they've always been there, some take graft and endless reworking to find 'the one'. In exploring them all, Turner reflects with eloquence, insight and self-deprecating wit on exactly what it is to be a songwriter. From love songs and break-up songs to political calls-to-arms; songs composed alone in a hotel room or in soundcheck with the Sleeping Souls, this brilliantly written memoir - featuring exclusive photos of handwritten lyrics and more - is a must-have book for FT fans and anyone curious about how to write music.

The Strange Case of Origami Yoda (Origami Yoda #1) Tom Angleberger,2012-08-07 In this funny, uncannily wise portrait of the dynamics of a sixth-grade class and of the greatness that sometimes comes in unlikely packages, Dwight, a loser, talks to his classmates via an origami finger puppet of Yoda. If that weren't strange enough, the puppet is uncannily wise and prescient. Origami Yoda predicts the date of a pop quiz, guesses who stole the classroom Shakespeare bust, and saves a classmate from popularity-crushing embarrassment with some well-timed advice. Dwight's classmate Tommy wonders how Yoda can be so smart when Dwight himself is so clueless. With contributions from his puzzled classmates, Tommy assembles this first case file in the blockbuster bestselling Origami Yoda series, written by Tom Angleberger, author of *Star Wars: Return of the Jedi: Beware the Power of the Dark Side*, and hailed by *School Library Journal* as "honest, funny, and immensely entertaining." Turnabout Patchwork Teresa Mairal Barreu,2018-12-03 Start with a simple block. Slice, turn, and sew slices back together. Then watch the magic happen! It's hard to believe such complex-looking quilts can come from such easy-to-sew blocks, but turnabout techniques transform even the most basic blocks into showstopping quilts. In some cases slicing isn't even necessary--just turn units as directed for unique designs! Each chapter focuses on a single block; just follow along to sew, slice, turn, and sew again. Find several design options for each block, along with a total of 23 quilt patterns, so you can make lap quilts, runners, and more with the turnabout blocks you create.

Easy Knits for Beautiful Yarns Toby Roxane Barna,2021-02-01 Drawn to a beautiful, unique yarn, but not sure what to do with it? Look no further. Gorgeous hand-dyed, variegated, self-striping, speckled, and other fun yarns abound for the knitter today, but sometimes the color variations and changes can make it difficult to find patterns that allow the yarn to shine. Oftentimes, the simpler the pattern, the more the yarn gets to take center stage. With this in mind, Toby designed all of the pieces in this book--hats, shawls, mittens, sweaters, and more--to let the yarn be the main feature. The 21 designs are written at a level for the motivated knitter who has made a scarf or two and is ready to move on to something a little more interesting and unique. Sidebars with photos and notes explain techniques that may be unfamiliar to beginners so that you can fearlessly make any piece. More experienced knitters can relax into these patterns and enjoy their showcase yarn as it slides along their needles and becomes a masterpiece of color.

The Electrical Nature of Storms D. R. MacGorman,W. D. Rust,1998 Rapid progress during the last twenty years has created a host of new technologies for studying electrical storms, including lightning mapping systems, new radars, satellite sensors, and new ways of measuring electric field and particle charge. This book explains how these advances have revolutionized our understanding. The books provides substantial background material, making it accessible to a broad scientific audience.

Thunder Cake Patricia Polacco,1997-08-25 A loud clap of thunder booms, and rattles the windows of Grandma's old farmhouse. This is Thunder Cake baking weather, calls Grandma, as she and her granddaughter hurry to gather the ingredients around the farm. A real Thunder Cake must reach the oven before the storm arrives. But the list of ingredients is long and not easy to find . . . and the storm is coming closer all the time! Reaching once again into her rich childhood experience, Patricia Polacco tells the memorable story of how her grandma--her Babushka--helped her overcome her fear of thunder when she was a little girl. Ms. Polacco's vivid memories of her grandmother's endearing answer to a child's fear, accompanied by her bright folk-art illustrations, turn a frightening thunderstorm into an adventure and ultimately . . . a celebration! Whether the first clap of thunder finds you buried under the bedcovers or happily anticipating the coming storm, Thunder Cake is a story that will bring new meaning and possibility to the excitement of a thunderstorm.

Predicting Storms Robert Ellis,2024-02-14 PREDICTING STORMS - The Adventure Begins 2nd Edition. BY ROBERT ELLIS Robert Ellis' full colour paperback book shows ordinary people how to predict a storm long before it is even visible to radar or satellite. Many lives can be saved by using the simple rules explained in the book. As many as 500,000 people worldwide may die in large storms each year. Traditional weather forecasts can currently only give around 13 minutes' lead time for tornadoes spawned by supercell thunderstorms. The Tornado Early Warning Rule published in this book gives at least 5 hours early warning of a deadly tornado from its rigid straight-line signature on a barograph. Your barometer will give you at least 24 hours early warning of an approaching hurricane making landfall. Book has the most comprehensive compilation of barometer rules for all storms. Predicting Storms covers practical information such as whether you can walk to work, or if there will be a storm or rain in your area within the next hour or two. All types of storms are covered in the book: Severe Thunderstorms, tornadic supercell thunderstorms, cyclones, hurricanes, typhoons, extratropical cyclones, tropical storms, tornadoes, bush firestorms, fire tornadoes, weather bombs, windstorms, dust storms, and snowstorms. Barometer rules apply to storms on land and at sea, so sea and surf are another important part of the book. Readers will learn the 'secret of the swell'. Predicting Storms explains how a small increase in carbon dioxide content in the atmosphere makes a critical difference to the Earth's climate and why we can expect stronger storms in a warmer world. Whether you are a general reader, a surfer, a weather watcher, a storm-spotter, or a storm-chaser, Predicting Storms will give you the tools to predict all storms confidently. The book has a useful, easy-to-use highly rated

companion app that users can download free, Thunder & Bushfire Storms app. Predicting storms is the author's passion. Predicting storms is easy and it's fun. Book suggests you use your own barometer or access a graph of pressure against time (barograph) in an app with pressure sensor. Marine Barograph app can be used on land or at sea.

Looking Up Matthew Cappucci,2022-08-02 An energetic and electrifying narrative about all things weather—by one of today's rising meteorological stars. Get in—we’re going storm-chasing! Imagine a very cool weather nerd has just pulled up to you and yelled this out the window of his custom-built armored storm-chasing truck. The wind is whipping around, he’s munching on Wawa, it’s all very chaotic—yet as you look into his grinning face, you feel the greatest surge of adrenaline you have ever felt in your life. Hallelujah: your cavalry is here! Welcome to the brilliance of Looking Up, the lively new book from rising meterology star Matthew Cappucci. He’s a meteorologist for The Washington Post, and you might think of him as Doogie Howser meets Bill Paxton from Twister, with a dash of Leonardo DiCaprio from Catch Me If You Can. A self-proclaimed weather nerd, at the age of fourteen he talked his way into delivering a presentation on waterspouts at the American Meteorological Society's annual broadcast conference by fudging his age on the application and created his own major on weather science while an undergrad at Harvard. Combining reportage and accessible science with personal storytelling and infectious enthusiasm, Looking Up is a riveting ride through the state of our weather and a touching story about parents and mentors helping a budding scientist achieve his improbable dreams. Throughout, readers get a tutorial on the basics of weather science and the impact of the climate. As our country’s leaders sound the alarm on climate change, few people have as close a view to how serious the situation actually is than those whose job is to follow the weather, which is the daily dose of climate we interact with and experience every day. The weather affects every aspect of our lives (even our art) as well as our future. The way we think about it requires a whole-life overhaul. Rain or shine, tropical storm or twister, Cappucci is here to help us begin the process. So get in his storm-chasing truck already, will ya?
