Bastard Culture! Mirko Tobias Schäfer,2011 The computer and particularly the Internet have been represented as enabling technologies, turning consumers into users and users into producers. The unfolding online cultural production by users has been framed enthusiastically as participatory culture. But while many studies of user activities and the use of the Internet tend to romanticize emerging media practices, this book steps beyond the usual framework and analyzes user participation in the context of accompanying popular and scholarly discourse, as well as the material aspects of design, and their relation to the practices of design and appropriation.

Benjamin Now Kevin McLaughlin,Philip Rosen,2003 The Arcades Project is the unfinished, final work of influential cultural theorist, critic, and historian Walter Benjamin. Until 1999, this huge, unruly manuscript, which provides a more complete picture of the diversity of Benjamin's work than formerly available, had not been fully translated into English. Benjamin Now is the first collection of essays in English to focus on The Arcades Project. While this essential text's title refers to its ostensible subject--the nineteenth-century shopping arcades of Paris--The Arcades Project is a mass of cultural, political, and social material presented in the form of a vast montage. Benjamin Now reconsiders the significance of his theories and writings in light of this final project. The contributors gathered in this special issue--several of whom participated in the translation of The Arcades Project--include leading scholars from modern culture and media studies, comparative literature and literary studies, art history, philosophy, cultural studies, and film studies. Contributors. T. J. Clark, Howard Eiland, Peter Fenves, Tom Gunning, Michael Jennings, Claudia Brodsky Lacour, Kevin McLaughlin, Philip Rosen, Henry Sussman, Lindsay Waters, Samuel Weber, Peter Wollen

Python: End-to-end Data Analysis Phuong Vothihong,Martin Czygan,Ivan Idris,Magnus Vilhelm Persson,Luiz Felipe Martins,2017-05-31 Leverage the power of Python to clean, scrape, analyze, and visualize your data About This Book Clean, format, and explore your data using the popular Python libraries and get valuable insights from it Analyze big data sets; create attractive visualizations; manipulate and process various data types using NumPy, SciPy, and matplotlib; and more Packed with easy-to-follow examples to develop advanced computational skills for the analysis of complex data Who This Book Is For This course is for developers, analysts, and data scientists who want to learn data analysis from scratch. This course will provide you with a solid foundation from which to analyze data with varying complexity. A working knowledge of Python (and a strong interest in playing with your data) is recommended. What You Will Learn Understand the importance of data analysis and master its processing steps Get comfortable using Python and its associated data analysis libraries such as Pandas, NumPy, and SciPy Clean and transform your data and apply advanced statistical analysis to create attractive visualizations Analyze images and time series data Mine text and analyze social networks Perform web scraping and work with different databases, Hadoop, and Spark Use statistical models to discover patterns in data Detect similarities and differences in data with clustering Work with Jupyter Notebook to produce publication-ready figures to be included in reports In Detail Data analysis is the process of applying logical and analytical reasoning to study each component of data present in the system. Python is a multi-domain, high-level, programming language that offers a range of tools and libraries suitable for all purposes, it has slowly evolved as one of the primary languages for data science. Have you ever imagined becoming an expert at effectively approaching data analysis problems, solving them, and extracting all of the available information from your data? If yes, look no further, this is the course you need! In this course, we will get you started with Python data analysis by introducing the basics of data analysis and supported Python libraries such as matplotlib, NumPy, and pandas. Create visualizations by choosing color maps, different shapes, sizes, and palettes then delve into statistical data analysis using distribution algorithms and correlations. You'll then find your way around different data and numerical problems, get to grips with Spark and HDFS, and set up migration scripts for web mining. You'll be able to quickly and

accurately perform hands-on sorting, reduction, and subsequent analysis, and fully appreciate how data analysis methods can support business decision-making. Finally, you will delve into advanced techniques such as performing regression, quantifying cause and effect using Bayesian methods, and discovering how to use Python's tools for supervised machine learning. The course provides you with highly practical content explaining data analysis with Python, from the following Packt books: Getting Started with Python Data Analysis. Python Data Analysis Cookbook. Mastering Python Data Analysis. By the end of this course, you will have all the knowledge you need to analyze your data with varying complexity levels, and turn it into actionable insights. Style and approach Learn Python data analysis using engaging examples and fun exercises, and with a gentle and friendly but comprehensive learn-by-doing approach. It offers you a useful way of analyzing the data that's specific to this course, but that can also be applied to any other data. This course is designed to be both a guide and a reference for moving beyond the basics of data analysis.

Yours Presently Michael Seth Stewart,2020-12-01 Boston born and bred, John Wieners was a queer self-styled poète maudit who was renowned among his contemporaries but ignored by mainstream critics. Twenty-first-century readers are correcting this elision, placing Wieners back alongside his better-known peers, including Allen Ginsberg, Charles Olson, Denise Levertov, and Amiri Baraka. Wieners was a voluble letter writer, maintaining friendships with these contemporaries that spanned decades and tackling a range of complex issues that resonate today, including drug use, homosexuality, subcultures of the East and West Coasts, and the differing treatment of mental patients based on their economic class. The letters collected in this volume are greatly enhanced by Eileen Myles's preface and Stewart's thorough introduction, notes, and brief bios of the poets, writers, artists, and editors with whom Wieners corresponded. The result is more than the letters of a poet—it is a history that explores the world at large in the mid-twentieth century.

Human Aspects of Information Security, Privacy and Trust Theo Tryfonas,2017-05-11 The two-volume set LNCS 10286 + 10287 constitutes the refereed proceedings of the 8th International Conference on Digital Human Modeling and Applications in Health, Safety, Ergonomics, and Risk Management, DHM 2017, held as part of HCI International 2017 in Vancouver, BC, Canada. HCII 2017 received a total of 4340 submissions, of which 1228 papers were accepted for publication after a careful reviewing process. The 75 papers presented in these volumes were organized in topical sections as follows: Part I: anthropometry, ergonomics, design and comfort; human body and motion modelling; smart human-centered service system design; and human-robot interaction. Part II: clinical and health information systems; health and aging; health data analytics and visualization; and design for safety.

Cinematic Rotterdam Floris Paalman,2011 This publication zooms in on the part cinema has played in urban development between 1920 and 1980. Rotterdam acts as an inspiring example, as observed from an international perspective. This city has its very own history in film. Besides providing the backdrop for a variety of feature films and avant-garde classics, Cinematic Rotterdam describes how the city has established and maintained its identity through thousands of promotional and educational films and television programmes. This diverse collection of filmed material presents an audiovisual map of Rotterdams emergence as a modern city. Written by film scholar Floris Paalman, Cinematic Rotterdam is not only a thorough study of the audiovisual history of Rotterdam but is more especially a conceptual exploration of a hidden dimension of the city itself. Besides being an exhaustive reference work for policymakers, clients, producers and researchers in architecture, media and social studies, this overview makes a fascinating visual guide for anyone interested in looking at the city of Rotterdam from a different angle -- Publicaciones Arquitectura y Arte.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang,2020-11-13 This book is the first of a series of How

To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Mental Lexicon Patrick Bonin,2004 This book is about the mental lexicon and opens an understanding of this aspect of human cognition. The mental lexicon is still a central topic in psycholinguistics and, more generally speaking, in cognitive science. Is it possible to define what is intended by the expression mental lexicon, a concept coined by Oldfield as early as 1966? Are the terms that the authors have at their disposal still sufficient to discuss this hypothesised mental entity -- the mental lexicon -- which is intended to cover many different aspects of words? The authors propose as a working definition that the mental lexicon corresponds to the mental repository of all representations that are intrinsically related to words. This book extends its research in psycholinguistics and focuses on the word.

Call the Pharmacist Elizabeth Roddick,2013-10 Set in Glasgow, Elizabeth Roddick, an NHS award-winning pharmacist, gives a very personal account of her life in and out of her community pharmacy. Starting with her father's struggle as a chemist in 1938, she details the rich, humorous and sometimes poignant stories of the interaction with her patients and customers. The development of pharmacy services over the 30 year period is illustrated as well as demonstrating her holistic approach to health within her pharmacy and in the public speaking arena.

International Mathematics for the Middle Years Alan McSeveny,2009 This is the fourth book in the five book International Mathematics for the Middle Years series. Each full-colour student book in the series comes with an interactive student CD and includes access to online resources for both teachers and students. International Mathematics for the Middle Years has been developed with the international student in mind. This series is particularly beneficial to students studying the International Baccalaureate Middle Years Program. All examples and exercises take an international viewpoint, giving students an opportunity to learn Mathematics with a global perspective. The content is appropriate for international curricula and will meet the needs of all middle school students studying Mathematics.

Words in the Mind Jean Aitchison,2003-01-08 Words in the Mind deals with words, and how humans learn them, remember them, understand them, and find the ones they want. It discusses the structure and content of the human word-store or 'mental lexicon, with particular reference to the spoken language of native English speakers. Discusses the structure and content of the human word-store, or 'mental lexicon'. Features a highly informative and accessible account of a central area of research. Incorporates new research on the mental lexicon. Written by a prominent researcher of the

mental lexicon, language change, and the language of the media.

The BNC Handbook Guy Aston,Lou Burnard,1998 The authors explain how to use large language corpora in explanatory learning and English languages teaching and research. They focus on the largest corpus of spoken and written data compiled (the BNC) and on the search tool SARA.

The Siege of Heaven Tony Gosling,2022-01-03 Some say the arrival of the internet has made it impossible for governments and corporations to keep secrets from or otherwise bamboozle the public, but the truth is just the opposite. As the ownership of the mainstream media consolidates, so the new media barons have a much tighter grip on what is published, while journalists are removed ever further from the process. Tony Gosling worked as a reporter for the BBC and saw these changes taking place within the corporation, witnessing the organization turn from a positive force into a mouthpiece of an increasingly corrupt state and the tiny elite group that has controlled humanity for centuries. Never before seen in print, these articles reveal the hidden wiring of the Western Establishment. They point to the elusive positive side of what Tony sees as an inevitable, orchestrated WWIII and economic collapse. Each one offers, too, a vision of social justice where people and communities can properly fulfill their potential. Tony includes many reference articles, including a hidden history chronology from the dawn of time and into the future. In the spirit of the short-lived 60s and 70s cultural freedom, drawing on Hendrix's All Along The Watchtower for inspiration, this volume is an accessible idiots guide for the cataclysms to come.

The Oxford Reverse Dictionary ,1999 Have a word on the tip of your tongue? Unlike a thesaurus, where you look up alternatives to a word you know, or a dictionary, which defines a familiar word, this dictionary helps with words you are vaguely aware of, but can't bring to mind. Some 31,000 entries are listed under a wide range of subject areas and key words.

The Sixth Station Linda Stasi,2013-12-01 Some say Demiel ben Yusef is the world's most dangerous terrorist, personally responsible for bombings and riots that have claimed the lives of thousands. Others insist he is a man of peace, a miracle worker, and possibly even the Son of God. His trial in New York City for crimes against humanity attracts scores of protestors, as well as media and religious leaders from around the world. Cynical reporter Alessandra Russo heads to the UN hoping for a piece of the action, but soon becomes entangled in controversy and suspicion when ben Yusef singles her out for attention among all other reporters. As Alessandra begins digging into ben Yusef's past, she is already in more danger than she knows—and when she is falsely accused of murder during her investigation, she is forced to flee New York. On the run from unknown enemies, Alessandra finds herself on the trail of a global conspiracy and a story that could shake the world to its foundations. Is Demiel ben Yusef the Second Coming or the Antichrist? The truth may lie in the secret history of the Holy Family, a group of Templars who defied the church, and a mysterious relic stained with the sacred blood of Christ Himself.
