The Paper Architect María Victoria Garrido Bianchini, Ingrid Siliakus, Joyce Aysta, 2009 An introduction to cutting and folding paper structures with templates and plans for creating models of structures such as the Golden Gate Bridge, the Eiffel Tower, the Taj Mahal, and many others.

Babushka's Doll Patricia Polacco, 2013-11-26 Babushka's doll was special. She had played with it only once, when she was a little girl like her high-spirited granddaughter, Natasha. Now Babushka is going to the store and it's Natasha's turn to take the little doll down from the high shelf. When the naughty doll comes to life -- and is even more rambunctious than the little girl herself -- Natasha finds out why playing once with Babushka's doll is enough! Patricia Polacco's beautiful illustrations capture the warmth, humor, and timeless spirit of her magical tale.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert, Erma Hermens, Marja Peek, 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Amusing Ourselves to Death Neil Postman,2005-12-27 What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman.” -CNN Originally published in 1985, Neil Postman’s groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. “A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one.” –Jonathan Yardley, The Washington Post Book World

Plant Physics Karl J. Niklas,Hanns-Christof Spatz,2012-02-06 From Galileo, who used the hollow stalks of grass to demonstrate the idea that peripherally located construction materials provide most of the resistance to bending forces, to Leonardo da Vinci, whose illustrations of the parachute are alleged to be based on his study of the dandelion's pappus and the maple tree's samara, many of our greatest physicists, mathematicians, and engineers have learned much from studying plants. A symbiotic relationship between botany and the fields of physics, mathematics, engineering, and chemistry continues today, as is revealed in *Plant Physics*. The result of a long-term collaboration between plant evolutionary biologist Karl J. Niklas and physicist Hanns-Christof Spatz, *Plant Physics* presents a detailed account of the principles of classical physics, evolutionary theory, and plant biology in order to explain the complex interrelationships among plant form, function, environment, and evolutionary history. Covering a wide range of topics—from the development and evolution of the basic plant body and the ecology of aquatic unicellular plants to mathematical treatments of light attenuation through tree canopies and the movement of water through plants' roots, stems, and leaves—*Plant Physics* is destined to inspire students and professionals alike to traverse disciplinary membranes.

Gnomes Wil Huygen,2023-09-05 A newly reissued edition of the beloved illustrated survey of gnome life, history, and lore, which has sold astronomically since its original publication in 1977 Did you know that gnome couples always have twin children? Or that a gnome is seven times as strong as a human? Do you want to hear some gossip from the gnome who knew Rembrandt? Dutch artist Rien Poortvliet's charming illustrations and physician Wil Huygen's detailed observations of the gnomes' habits, anatomy, and lifestyle are a delight for readers of all ages. Children will adore the gnome family's underground home and the constant interaction with animals; adults will appreciate the tongue-in-cheek scientific data. Gnomebody is immune to the gnomes' tremendous appeal--and a whole new generation is waiting to love them for the first time!

The 5AM Club Robin Sharma,2018-12-04 Legendary leadership and elite performance expert Robin Sharma introduced The 5am Club concept over twenty years ago, based on a revolutionary morning routine that has helped his clients maximize their productivity, activate their best health and bulletproof their serenity in this age of overwhelming complexity. Now, in this life-changing book, handcrafted by the author over a rigorous four-year period, you will discover the early-rising habit that has helped so many accomplish epic results while upgrading their happiness, helpfulness and feelings

of aliveness. Through an enchanting—and often amusing—story about two struggling strangers who meet an eccentric tycoon who becomes their secret mentor, *The 5am Club* will walk you through: How great geniuses, business titans and the world's wisest people start their mornings to produce astonishing achievements A little-known formula you can use instantly to wake up early feeling inspired, focused and flooded with a fiery drive to get the most out of each day A step-by-step method to protect the quietest hours of daybreak so you have time for exercise, self-renewal and personal growth A neuroscience-based practice proven to help make it easy to rise while most people are sleeping, giving you precious time for yourself to think, express your creativity and begin the day peacefully instead of being rushed “Insider-only” tactics to defend your gifts, talents and dreams against digital distraction and trivial diversions so you enjoy fortune, influence and a magnificent impact on the world Part manifesto for mastery, part playbook for genius-grade productivity and part companion for a life lived beautifully, *The 5am Club* is a work that will transform your life. Forever.

What Technology Wants Kevin Kelly, 2011-09-27 From the author of the New York Times bestseller *The Inevitable*— a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed—or what it wants. Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

Cruciverbalism Stanley Newman, Mark Lasswell, 2006-10-31 For the millions of people who do crosswords, the person behind the puzzle is always something of a mystery. What puzzler wouldn't want to know how a constructor thinks when putting together a puzzle? Or the secret rules that guide the selections of clues and answers? Or how to outsmart the constructor by understanding his mindset? A few tips about how to improve solving skills wouldn't hurt, either. Putting it all together in an accessible and witty guide to life in the grid is just what everybody wants and needs.

CRUCIVERBALISM will help people become better solvers and have more fun doing crosswords. It will also pull back the curtain on puzzle-making itself, outlining the history of crosswords, showing how they have evolved over the past century, and how rules and the mindsets of puzzle editors have changed over time. It will pass along the guidelines the author provides to his stable of puzzle constructors, and tidbits such as the 100 essential words for the pursuit of crossword happiness. Finally, it will recount the decade-long battle between Old Guard and New Wave constructors, bringing in a cast of colorful characters living in a world of words. The book will be a combination of crossword self-help, wisdom, trivia and stories that will fascinate today's millions of avid puzzlers.
