The News at the Ends of the Earth Hester Blum,2019-04-04 From Sir John Franklin's doomed 1845 search for the Northwest Passage to early twentieth-century sprints to the South Pole, polar expeditions produced an extravagant archive of documents that are as varied as they are engaging. As the polar ice sheets melt, fragments of this archive are newly emergent. In *The News at the Ends of the Earth* Hester Blum examines the rich, offbeat collection of printed ephemera created by polar explorers. Ranging from ship newspapers and messages left in bottles to menus and playbills, polar writing reveals the seamen wrestling with questions of time, space, community, and the environment. Whether chronicling weather patterns or satirically reporting on penguin mischief, this writing provided expedition members with a set of practices to help them survive the perpetual darkness and harshness of polar winters. The extreme climates these explorers experienced is continuous with climate change today. Polar exploration writing, Blum contends, offers strategies for confronting and reckoning with the extreme environment of the present.

Chaotic Logic Ben Goertzel,2013-04-17 This book summarizes a network of interrelated ideas which I have developed, off and on, over the past eight or ten years. The underlying theme is the psychological interplay of order and chaos. Or, to put it another way, the interplay of deduction and induction. I will try to explain the relationship between logical, orderly, conscious, rule-following reason and fluid, self organizing, habit-governed, unconscious, chaos-infused intuition. My previous two books, *The Structure of Intelligence* and *The Evolving Mind*, briefly touched on this relationship. But these books were primarily concerned with other matters: SI with constructing a formal language for discussing mentality and its mechanization, and EM with exploring the role of evolution in thought. They danced around the edges of the order/chaos problem, without ever fully entering into it. My goal in writing this book was to go directly to the core of mental process, where angels fear to tread -- to tackle all the sticky issues which it is considered prudent to avoid: the nature of consciousness, the relation between mind and reality, the justification of belief systems, the connection between creativity and mental illness,... All of these issues are dealt with here in a straightforward and unified way, using a combination of concepts from my previous work with ideas from chaos theory and complex systems science.

Rome Tales Helen Constantine, 2011-07-14 In ways no guide book can achieve, these twenty absorbing tales by Italian authors ranging from Boccaccio in the Middle Ages to Giacomo Casanova in the eighteenth century, to Pier-Paolo Pasolini in the twentieth and contemporary new writers such as Melania Mazzucco and Igiaba Scego, offer the delight of discovering and exploring one of the world's most unique cities thorough a wide variety of individual lives and epochs. The tales span seven hundred years but rather than being ordered chronologically, old and new appear alongside one another, reflecting the dual identity of Rome - thriving, modern metropolis and ancient city centre that is one of the wonders of the world. The tales are wonderfully varied in style, tone, and subject matter. Casanova sets about seducing the hotelier's daughter only minutes after his arrival, a notorious Spanish prostitute in Renaissance Rome endures a public hiding without flinching, a Danish tourist in her sixties finds an unusual lover, Pope John Paul II uncovers a vast conspiracy against him, a medieval revolutionary demagogue suffers almost the same fate as Mussolini. Each story is illustrated with a black-and-white photograph and there is a map of Rome to help readers locate the important sites which feature in the text. A deep sense of timelessness, of separate destinies entwined across a gulf of centuries, is the cumulative effect of this vivid mosaic of dramatic, comic, and tragic stories set in the Eternal City.
