The Reflexes of Syllabic Liquids in Ancient Greek Lucien van Beek, 2021-11-08 How can we explain metrical irregularities in Homeric phrases like ἀνδροτῆτα καὶ ἥβην? What do such phrases tell us about the antiquity of the epic tradition? And how did doublet forms such as τέτρατος beside τέταρτος originate? In this book, you will find the first systematic and complete account of the syllabic liquids in Ancient Greek. It provides an up-to-date, comprehensive and innovative etymological treatment of material from all dialects, including Mycenaean. A new model of linguistic change in the epic tradition is used to tackle two hotly-debated problems: metrical irregularities in Homer (including *muta cum liquida*) and the double reflex. The proposed solution has important consequences for Greek dialect classification and the prehistory of Epic language and meter.

Multiword expressions at length and in depth Stella Markantonatou, Carlos Ramisch, Agata Savary, Veronika Vincze, The annual workshop on multiword expressions takes place since 2001 in conjunction with major computational linguistics conferences and attracts the attention of an ever-growing community working on a variety of languages, linguistic phenomena and related computational processing issues. MWE 2017 took place in Valencia, Spain, and represented a vibrant panorama of the current research landscape on the computational treatment of multiword expressions, featuring many high-quality submissions. Furthermore, MWE 2017 included the first shared task on multilingual identification of verbal multiword expressions. The shared task, with extended communal work, has developed important multilingual resources and mobilised several research groups in computational linguistics worldwide. This book contains extended versions of selected papers from the workshop. Authors worked hard to include detailed explanations, broader and deeper analyses, and new exciting results, which were thoroughly reviewed by an internationally renowned committee. We hope that this distinctly joint effort will provide a meaningful and useful snapshot of the multilingual state of the art in multiword expressions modelling and processing, and will be a point of reference for future work.

**Manual of Internal Fixation** M. E. Müller, M. Allgöwer, H. Willenegger, 2012-12-06 The German edition of our book entitled *Operative Frakturenbehandlung* by M. E. MÜLLER, M. ALLGÖWER and H. WILLENEGGER (Springer, Berlin . Göttingen . Heidelberg, 1963) has been out of print now for more than three years. We are planning a new edition which will deal with the collective experience of 14,000 new cases, all treated by internal fixation, and will include the newest developments in the field of internal fixation. However, it will be some time before this new edition can be published. Increasing demands for a description of the AO technique of internal fixation has stimulated us to publish this manual. In it we shall describe in a comprehensive but somewhat apodictic manner the principles and techniques of the AO methods of fracture treatment and reconstructive surgery, which in our hands, have stood the test of time. The book is written in a somewhat abbreviated style. It corresponds in subject matter to the teaching given at the AO courses in Davos, but deals with each subject more thoroughly. We have dispensed with pictures of the instruments, as these may be found in the *Synthes Catalogue* \*. This manual should be regarded as the product of collective experience, containing new thoughts and new discoveries from basic research. In considering the risks of mistakes and dangers, we can only reiterate what we have already stated in *Technique of Internal Fixation of Fractures*: Open treatment of fractures is a valuable but difficult method which involves much responsibility.

*Multiword expressions* Manfred Sailer, Stella Markantonatou, Multiword expressions (MWEs) are a challenge for both the natural language applications and the linguistic theory because they often defy the application of the machinery developed for free combinations where the default is that the meaning of an utterance can be predicted from its structure. There is a rich body of primarily descriptive work on MWEs for many European languages but comparative work is little. The volume brings together MWE experts to explore the benefits of a multilingual perspective on MWEs. The ten contributions in this volume look at MWEs in Bulgarian, English, French, German, Maori, Modern Greek, Romanian, Serbian, and Spanish. They discuss prominent issues in MWE research such as classification of MWEs, their formal grammatical modeling, and the description of individual MWE types from the point of view of different theoretical frameworks, such as Dependency Grammar, Generative Grammar, Head-driven Phrase Structure Grammar, Lexical Functional Grammar, Lexicon Grammar.

**Recent Advances in Composite Materials** E.E. Gdoutos, Zaira Marioli-Riga, 2013-04-17 This book contains 31 papers presented at the symposium on Recent Advances in Composite Materials which was organized in honor of Professor Stephanos A. Paipetis. The symposium took place at Democritus University of Thrace, in Xanthi, Greece on June 12-14, 2003. The book is a tribute to Stephanos A. Paipetis, a pioneer of composite materials, in recognition of his continuous, original diversified and outstanding contributions for half a century. The book consists of invited papers written by leading experts in the field. It contains original contributions concerning the latest developments in composite materials. It covers a wide range of subjects including experimental characterization, analytical modeling and applications of composite materials. The papers are arranged in the following six sections: General concepts, stress and failure analysis, mechanical properties, metal matrix composites, structural analysis and applications of composite materials. The first section on general concepts contains seven papers dealing with composites through the pursuit of the consilience among them, computation and mechatronic automation of multiphysics research, a theory of anisotropic scattering, wave propagation, multi-material composite wedges, a three-dimensional finite element analysis around broken fibers and an in situ assessment of the micromechanics of large scale bridging in ceramic composites.

Weak Thought Gianni Vattimo, Pier Aldo Rovatti, 2012-09-01 Heralding the beginning of the philosophical dialogue on the concept for which Gianni Vattimo would become best known (and coining its name), this groundbreaking 1983 collection includes foundational essays by Vattimo and Pier Aldo Rovatti, along with original contributions by nine other Italian philosophers influenced by and working within the authors' framework. Dissatisfied with the responses to nineteenth- and twentieth-century European philosophy offered by Marxism, deconstruction, and poststructuralism, Vattimo found in the nihilism of Friedrich Nietzsche an important context within which to take up the hermeneutics of Martin Heidegger and Hans-Georg Gadamer. The idea of weak thought sketched by Vattimo and Rovatti emphasizes a way of understanding the role of philosophy based on language, interpretation, and limits rather than on metaphysical and epistemological certainties—without falling into relativism. To the first English-language edition of this volume, translator Peter Carravetta adds an extensive critical introduction, providing an overview of weak thought and taking stock of its philosophical trajectory over more than a quarter century.

*The Museum of Augustus* Peter Heslin, 2015-05-01 In the Odes, Horace writes of his own work, "I have built a monument more enduring than bronze,"—a striking metaphor that hints at how the poetry and built environment of ancient Rome are inextricably linked. This fascinating work of original scholarship makes the precise and detailed argument that painted illustrations of the Trojan War, both public and private, were a collective visual resource for selected works of Virgil, Horace, and Propertius. Carefully researched and skillfully reasoned, the author's claims are bold and innovative, offering a strong interpretation of the relationship between Roman visual culture and literature that will deepen modern readings of Augustan poets. The Museum of Augustus first provides a comprehensive reconstruction of paintings from the remaining fragments of the cycle of Trojan frescoes that once decorated the Temple of Apollo in Pompeii. It then finds the echoes of these paintings in the Augustan-dated Portico of Philippius, now destroyed, which was itself a renovation of Rome's de facto temple of the Muses—in other words, a museum, both in displaying art and offering a meeting place for poets. It next examines the responses of the Augustan poets to the decorative program of this monument that was intimately connected with their own literary aspirations. The book concludes by looking at the way Horace in the Odes and Virgil in the Georgics both conceptualized their poetic projects as temples to rival the museum of Augustus.
