Sort of Super Eric Gapstur,2022-03-22 Awkward by Svetlana Chmakova meets the HiLo series in this first book in a funny, lighthearted new middle grade graphic novel series about a boy struggling with new superpowers—and middle school. Eleven-year-old Wyatt Flynn had something amazing happen to him: he got superpowers! Good ones too, like super-flight, super-strength, and super-speed. The only problem? Wyatt got his superpowers totally by mistake, and his dad—who's been overprotective since Wyatt's mom disappeared—thinks he's too young for them and worries what would happen if everyone found out. So he makes Wyatt hide his powers. Keeping such a huge secret from his best friends Beto and Nara is bad enough, but not being able to use his new abilities to defend them from the biggest bully at school makes Wyatt feel useless and frustrated. But his little sister thinks the good his powers could do is more important than following Dad's rules. Slowly, the two of them become a dynamic crime-fighting duo right under their dad's nose. Lying to his dad isn't much easier than lying to his friends. But Wyatt might be able to make a real difference in the community...and maybe even find Mom. That makes it all worth it—right?

A Step-by-Step ABA Curriculum for Young Learners with Autism Spectrum Disorders (Age 3-10) Lindsay Hilsen,2013-01-15 This curriculum uses the proven principles of applied behavior analysis (ABA) as a way to monitor the progress of children on the autism spectrum and make sure they reach their full potential. It gives adults a clear outline on what to teach and how to teach it, in order to ensure children are reaching developmental goals at this crucial stage. The book's three sections, Assessment, Curriculum and Mastered, each include built-in data collection, which is reproduced on the accompanying online downloadable content so it can be printed off. All three sections cover ten pivotal areas of progress for this age group, including reading, writing, math, conversation and social skills. The Assessment section records the child's initial level of learning and then tracks their progress over time. The Curriculum section provides the lesson plans for the skills which need to be developed, and the Mastered section is a tool for checking that learnt skills are being retained over time. It is also possible to record whether the child has adapted to using the skills in a variety of settings. This curriculum provides everything that an adult working with a child with an autism spectrum disorder would need to ensure a thorough and appropriate ABA program for the young learner.
