**The Exchange Stabilization Fund** C. Randall Henning, 1999 The Exchange Stabilization Fund (ESF) holds more than \$40 billion that is at the disposal of the US Secretary of the Treasury for use in foreign exchange intervention and international financial support operations. Its use in the Mexican rescue package of 1995 brought the ESF into the public spotlight for the first time in recent years, and it has been deployed in Brazil and several Asian crisis countries as well. Its availability for such packages and its total control by the Treasury secretary have therefore become very controversial. Randall Henning's study maintains that the Fund is an important element of US foreign policy and economic policy and that it should remain under the exclusive control of the Treasury, but that Congress should exercise effective oversight. Henning also covers the legislative history of the ESF and outlines the principles by which the Fund should be administered.

**The European Nitrogen Assessment** Mark A. Sutton, Clare M. Howard, Jan Willem Erisman, Gilles Billen, Albert Bleeker, Perine Grennfelt, Hans van Grinsven, Bruna Grizzetti, 2011-04-14 Presenting the first continental-scale assessment of reactive nitrogen in the environment, this book sets the related environmental problems in context by providing a multidisciplinary introduction to the nitrogen cycle processes. Issues of upscaling from farm plot and city to national and continental scales are addressed in detail with emphasis on opportunities for better management at local to global levels. The five key societal threats posed by reactive nitrogen are assessed, providing a framework for joined-up management of the nitrogen cycle in Europe, including the first cost-benefit analysis for different reactive nitrogen forms and future scenarios. Incorporating comprehensive maps, a handy technical synopsis and a summary for policy makers, this landmark volume is an essential reference for academic researchers across a wide range of disciplines, as well as stakeholders and policy makers. It is also a valuable tool in communicating the key environmental issues and future challenges to the wider public.
