**Pots & Plays** Oliver Taplin, 2007-10-15 This interdisciplinary study opens up a fascinating interaction between art and theater. It shows how the mythological vase-paintings of fourth-century B.C. Greeks, especially those settled in southern Italy, are more meaningful for those who had seen the myths enacted in the popular new medium of tragedy. Of some 300 relevant vases, 109 are reproduced and accompanied by a picture-by-picture discussion. This book supplies a rich and unprecedented resource from a neglected treasury of painting.

**Plato's 'Republic': An Introduction** Sean

McAleer, 2020-11-09 It is an excellent book – highly intelligent, interesting and original. Expressing high philosophy in a readable form without trivialising it is a very difficult task and McAleer manages the task admirably. Plato is, yet again, intensely topical in the chaotic and confused world in which we are now living. Philip Allott, Professor Emeritus of International Public Law at Cambridge University This book is a lucid and accessible companion to Plato's Republic, throwing light upon the text's arguments and main themes, placing them in the wider context of the text's structure. In its illumination of the philosophical ideas underpinning the work, it provides readers with an understanding and appreciation of the complexity and literary artistry of Plato's Republic. McAleer not only unpacks the key overarching questions of the text – What is justice? And Is a just life happier than an unjust life? – but also highlights some fascinating, overlooked passages which contribute to our understanding of Plato's philosophical thought. Plato's 'Republic': An Introduction offers a rigorous and thought-provoking analysis of the text, helping readers navigate one of the world's most influential works of philosophy and political theory. With its approachable tone and clear presentation, it constitutes a welcome contribution to the field, and will be an indispensable resource for philosophy students and teachers, as well as general readers new to, or returning to,

the text.

**India's Ad Hoc Arsenal** Chris Smith,1994 Chris Smith explores the evolution of Indian defence policy since 1947. He looks carefully at the domestic dynamics of Indian defence policy. This includes an in-depth analysis of the period 1947-62, which is often ignored by Indian defence analysts, and the performance of the defence industrial base. He concludes that India's defence policy is designed more as one aspect of the quest for great power status than as an attempt to acquire security at an affordable price.

**The History and Geography of Human Genes** L L Cavalli-sforza,Paolo Menozzi,Alberto Piazza,2018-06-05 Hailed as a breakthrough in the understanding of human evolution, The History and Geography of Human Genes offers the first full-scale reconstruction of where human populations originated and the paths by which they spread throughout the world. By mapping the worldwide geographic distribution of genes for over 110 traits in over 1800 primarily aboriginal populations, the authors charted migrations and devised a clock by which to date evolutionary history. This monumental work is now available in a more affordable paperback edition without the myriad illustrations and maps, but containing the full text and partial appendices of the authors' pathbreaking endeavor.

*Guiding Young Children* Patricia F. Hearron, Verna Hildebrand, 2005 The seventh edition of this popular book supports the authors' belief that guidance is more than getting children to do what you want them to do now; it is helping them to become

everything they can become for all of their tomorrows. The book provides an overview, followed by discussion of core concepts, strategies for applying those concepts, and, finally, the broader perspective of professionalism and human resource development. Its approach focuses on the need to consider a child's developmental level as well as family and cultural context when planning environments and activities for young children. Unlike others in the field, it offers concrete suggestions on how to guide children while they are involved in specific activities such as playing, eating, napping, etc. For teachers and parents of young children.

**Advances in Digital Forensics XII** Gilbert Peterson, Sujeet Sheno, 2016-09-19  
Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance -- investigations of security breaches yield valuable information that can be used to design more secure systems. *Advances in Digital Forensics XII* describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Mobile Device Forensics, Network Forensics, Cloud Forensics, Social Media Forensics, Image Forensics, Forensic Techniques, and Forensic Tools. This book is the twelfth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a

selection of twenty edited papers from the Twelfth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in New Delhi, India in the winter of 2016. *Advances in Digital Forensics XII* is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Gilbert Peterson, Chair, IFIP WG 11.9 on Digital Forensics, is a Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. *African Footballers in Europe* Ernest Yeboah

Acheampong, Malek Bouhaouala, Michel Raspaud, 2019-09-30  
*African Footballers in Europe* traces the social and economic evolution of African football and examines the strategies and resources that players mobilise in their migrations, with a particular focus on 'Give Back Behaviours' (how players contribute to their countries or communities of origin). It shines new light on contemporary migrations, labour markets in sport, and processes of development in Africa. Using a multidisciplinary approach and Weberian methodology to analyse players' 'Give Back' behaviour, the book highlights the complex rationale behind this behaviour, based on a combination of social, cultural, and economic elements. It features interviews with former and current African professional players, providing a vivid picture of the role of communities in players' migration projects, the allure of the European football market, and investment initiatives that can contribute to local and regional development. This is a vital read for academics, researchers, and students of sport sciences, sociology of sport, sport management, sociology, geography, political sciences, management, sociology of Africa, migration studies, sociology of the labour market, and economic sociology. It is also an important resource for professional organisations, NGOs,

football agents, football administrators, federations, confederations, and governments.

**Visual Information Communication** Mao Lin Huang, Quang Vinh Nguyen, Kang Zhang, 2009-10-20 Visual communication through graphical and sign languages has long been conducted among human beings of different backgrounds and cultures, and in recent decades between human and machine. In today's digital world, visual information is typically encoded with various metaphors commonly used in daily life to facilitate rapid comprehension and easy analysis during the communication process. Visual information communication generally encompasses information visualization, graphical user-interfaces, visual analytics, visual languages and multi-media processing. It has been successfully employed in knowledge discovery, end-user programming, modeling, rapid systems prototyping, education, and design activities by people of many disciplines including architects, artists, children, engineers, and scientists. In addition, visual information is increasingly being used to facilitate human-human communication through the Internet and Web technology, and electronic mobile devices. This manuscript provides the cutting-edge techniques, approaches and the latest ongoing researches in the context of visual information communication. It is a collection of 24 chapters selected from more than 60 submissions to the VINCI'09 - 2009 Visual Information Communications International Conference, that is held in Sydney Australia, September 2009. These chapters were selected through a stringent review process to ensure their high standard in quality, significance and relevance. Each chapter was reviewed by at least two international Program Committee members of VINCI'09. The book covers a broad range of contents in five key sub-areas of visual information communication, including.
