Anti-Story Philip Stevick,1971 The Anti-Story is an anthology of experimental fiction. It is edited by Philip Stevick. From Simon & Schuster comes a selection of the best experimental fiction in recent decades. Curated and edited by Philip Stevick, Anti-Story: An Anthology of Experimental Fiction is a collection perfect for any lover of creative fiction.

Experimental Fiction Julie Armstrong,2014-08-28 Ever since Ezra Pound's exhortation to 'make it new', experimentation has been a hallmark of contemporary literature. Ranging from the modernists, through the Beats to postmodernism and contemporary 'hyperfiction', this is a unique introduction to experimental fiction. Creative exercises throughout the book help students grapple with the many varieties of experimental fiction for themselves, deepening their understanding of these many forms and developing their own writing skills. In addition, the book examines the historical contexts and major themes of 20th-century experimental fiction and new directions for the novel offered by writers such as David Shields and Zadie Smith. Making often difficult works accessible for the first time reader and with extensive further reading guides, Experimental Fiction is an essential practical guidebook for students of creative writing and contemporary fiction. Writers covered include: James Joyce, Virginia Woolf, Franz Kafka, Marcel Proust, Ralph Ellison, Allen Ginsberg, Jack Kerouac, William Gibson, Italo Calvino, Jeanette Winterson, Don DeLillo, Caitlin Fisher, Geoff Ryman, Xiaolu Guo, Tom McCarthy, James Frey and David Mitchell.

Experimental Archaeology: Making, Understanding, Story-telling Christina Souyoudzoglou-Haywood,Aidan O'Sullivan,2019-09-30 In this book, based on the proceedings of a two-day workshop on experimental archaeology at the Irish Institute of Hellenic Studies at Athens in 2017, scholars, artists and craftspeople explore how people in the past made things, used and discarded them, from prehistory to the Middle Ages.

Untold Night and Day Bae Suah,2020-05-05 The acclaimed Korean author weaves a “disturbing, beautifully controlled” metaphysical detective story “of doubles, shadows, and parallel worlds” (Financial Times). It’s Ayami’s final day working the box-office at Seoul’s only audio theater for the blind. Her last shift completed, she walks the streets with her former boss, searching for a missing friend. Their conversations take in art, love, food, and the inaccessible country to the north. The next day, Ayami acts as a guide for a detective novelist visiting from abroad. But as they contend with the summer heat, the edges of reality start to fray. Ayami enters a world of increasingly tangled threads, and the past intrudes upon the present as overlapping realities repeat, collide, change, and reassert themselves. Blisteringly original, Untold Night and Day upends the very structure of narrative storytelling. By one of the boldest and most innovative voices in contemporary Korean literature, and masterfully realized in English by Man Booker International Prize-winning translator Deborah Smith, Bae Suah’s hypnotic novel asks whether more than one version of ourselves can exist at once.

Georgia's Terrific, Colorific Experiment Zoe Persico,2019-04-02 Science and art come together in this colorful and empowering picture book about a strong minded girl scientist and her artist family. Is it possible for science and art to really mix? Georgia wants to be a scientist, and a great one at that. But in order become a great scientist, she must first create her own, unique experiment. Her mother, father, grandma, and brother all want to help, but they're artists. How could they possibly help her with science? Everyone knows art and science just don't go together! As Georgia struggles to create her unique experiment, she eventually learns that sometimes science, too, can be a work of art.

The Story Smuggler Georgi Gospodinov,2024-02-15 'Some smuggle cigarettes, others alcohol - or weapons. Our contraband, being invisible, is more dangerous. Our contraband is undetectable by scanners. What we carry as concealed excess baggage is stories.' In this exquisite literary gem, Georgi Gospodinov, winner of the International Booker Prize, invites the reader on a winding journey through his own memories. He shows us a childhood under Communism, a particularly Bulgarian variety of melancholy, the freedom and thrills found in reading and writing, and the coming of age of one extraordinary writer. Ultimately, this profound, playful and deeply moving autobiographical text offers resounding proof of the power and importance of storytelling. TRANSLATED FROM THE BULGARIAN BY KRISTINA KOVACHEVA AND DAN GUNN

British Experimental Women's Fiction, 1945—1975 Andrew Radford,Hannah Van Hove,2021-08-23 This book scrutinizes a range of relatively overlooked post-WWII British women writers who sought to demonstrate that narrative prose fiction offered rich possibilities for aesthetic innovation. What unites all the primary authors in this volume is a commitment to challenging the tenets of British mimetic realism as a literary and historical phenomenon. This collection reassesses how British female novelists operated in relation to transnational vanguard networking clusters, debates and tendencies, both political and artistic. The chapters collected in this volume enquire, for example, whether there is something fundamentally different (or politically dissident) about female experimental procedures and perspectives. This book also investigates the processes of canon formation, asking why, in one way or another, these authors have been sidelined or misconstrued by recent scholarship. Ultimately, it seeks to refine a new research archive on mid-century British fiction by female novelists at least as diverse as recent and longer established work in the domain of modernist studies.

Experimental Animals Thalia Field,2016 Fiction. Stemming from a through-line of marital discord in the household of the great French vivisector, Claude Bernard, Thalia Field has discovered a number of voices, some famous, some forgotten, and allowed them all a moment in which to be heard again. This compelling tale is made up largely of excerpts and quotations, pieced together with great artistry. A beautiful and thought-provoking collage of a tale of rescued history and a sobering tribute to some of its victims. --Karen Joy Fowler Advancing what she started twenty years ago with her earliest explorations of essayistic fiction, Thalia Field has now composed what very well might be her life's work--a tragic, comical, and utterly fascinating tale of a marriage that vividly encapsulates not only the origins of experimental medicine, but an entire age that spirited experiments in literature, science, engineering, film, etc. It's nothing less than a history--gorgeously fictional, purposefully essayistic--of how we got where we are. -- John D'Agata

Edinburgh Companion to the Short Story in English Paul Delaney,2018-11-27 This collection explores the history and development of the anglophone short story since the beginning of the nineteenth century.

The Terminal Experiment Robert J. Sawyer,2011-08-30 Dr. Peter Hobson has created three electronic simulations of his own personality. But they all have escaped from Hobson's computer into the web-and one of them is a killer.

The Routledge Companion to Experimental Literature Joe Bray,Alison Gibbons,Brian McHale,2012-07-26 What is experimental literature? How has experimentation affected the course of literary history, and how is it shaping literary expression today? Literary experiment has always been diverse and challenging, but never more so than in our age of digital media and social networking, when the very category of the literary is coming under intense pressure. How will literature reconfigure itself in the future? The Routledge Companion to Experimental Literature maps this expansive and multifaceted field, with essays on: the history of literary experiment from the beginning of the twentieth century to the present the impact of new media on literature, including multimodal literature, digital fiction and code poetry the development of experimental genres from graphic narratives and found poetry through to gaming and interactive fiction experimental movements from Futurism and Surrealism to Postmodernism, Avant-Pop and Flarf. Shedding new light on often critically neglected terrain, the contributors introduce this vibrant area, define its current state, and offer exciting new perspectives on its future. This volume is the ideal introduction for those approaching the study of experimental literature for the first time or looking to further their knowledge.

Hermes Experiment, The: A Personal Story Richard Milner,Erhard Steffens,2021-03-15 This book describes the story of how a collaboration of several hundred physicists from Europe and North America formed in 1988 to design, construct, install, commission and operate, for the years 1995-2007 the technically innovative HERMES experiment at the DESY laboratory in Hamburg, Germany to study the spin structure of the fundamental structure of matter. The authors begin by introducing the fascinating world of subatomic physics and relate their personal story of how the HERMES experiment came about. Guided by the exciting idea to use a new type of target internal to an electron storage ring, the HERMES collaboration was born to realize this innovative experimental approach at the new HERA accelerator at DESY. The book describes the technical design of HERMES; the successful effort to secure the necessary funds to construct the experiment in different countries; the fabrication of the

different components by the different HERMES institutes; and the story of the installation and commissioning of HERMES in the East Hall of HERA in the hot summer of 1995. Until 2007, when the operation of HERA ceased, the collider ran typically about 9 months per year continuously, during which HERMES data taking shifts were manned to ensure that data of the highest quality were acquired. The book describes the HERMES scientific results, their considerable impact, how HERMES shaped an entire generation of young people into scientific leaders, and ends with a description of the twenty-first century picture of the proton that has subsequently been developed. The authors played a leading role within the HERMES collaboration. They describe, using non-technical language, the various phases of the thirteen years of running, the social life in such an international collaboration, and their personal reminiscences over several decades.

Sphinx Anne Garreta, 2015-04-21 A landmark literary event: the first novel by a female member of Oulipo in English, a sexy genderless love story.

The Nightmare Feast Andrew Klavan, 2020-03-03 “As screenwriter Austin Lively plunges back and forth between two dark, strange places—the fantasy kingdom of Galiana and the weirdness of contemporary Los Angeles—I turned the pages faster, faster, with growing delight. Scary, suspenseful, funny, wonderfully imaginative, *Another Kingdom* is pure, unadulterated fun.” — Dean Koontz, #1 New York Times Bestselling author This is a journey you won't want to miss. Gregg Hurwitz, New York Times Bestselling author of the Orphan X series Austin Lively, once just an out-of-luck Hollywood screenwriter, is now a chosen hero caught between two worlds and dual quests in both Los Angeles, California, and the magical medieval world of Galiana. Tasked with taking a talisman across the Eleven Lands to restore the rightful queen to her throne, Austin must evade a murderous, vengeance-seeking wizard who seems to have the Eleven Lands under his control. But just how far does his influence reach, and how can Austin defeat him if the wizard also has access to his darkest memories? Austin's only hope is to find a missing manuscript by the title, *Another Kingdom*, but his sister Riley, the one person who may hold the key has gone missing too. With a deranged billionaire set on creating a “utopia” of anarchy and death also on the hunt for the manuscript, Austin must get to Riley before the billionaire's assassins. Trapped in a house of horrors in one world and a game of cat and mouse in the other, time is running out in both of Austin's realities as he struggles to piece together the clues and find *Another Kingdom*. With higher stakes, darker secrets, and bigger monsters, there is no going back for Austin Lively and no guarantee he will escape the nightmare feast.

Experimental Film Gemma Files, 2020-10-13 The award-winning author of the Hexslinger Series “explores the world of film and horror in a way that will leave you reeling” (Jeff VanderMeer, author of the Southern Reach Trilogy). Former film teacher Lois Cairns is struggling to raise her autistic son while freelancing as a critic when, at a screening, she happens upon a sampled piece of silver nitrate silent footage. She is able to connect it to the early work of Mrs. Iris Dunlopp Whitcomb, the spiritualist and collector of fairy tales who mysteriously disappeared from a train compartment in 1918. Hoping to make her own mark on the film world, Lois embarks on a project to prove that Whitcomb was Canada's first female filmmaker. But her research takes her down a path not of darkness but of light—the blinding and searing light of a fairy tale made flesh, a noontime demon who demands that duty must be paid. As Lois discovers terrifying parallels between her own life and that of Mrs. Whitcomb, she begins to fear not just for herself, but for those closest to her heart. Winner of the Shirley Jackson Award for Best Novel “One of the standout horror novels of 2015 . . . From an author who has already established herself as one of the genre's most original and innovative voices, *Experimental Film* is a remarkable achievement.” —Los Angeles Review of Books “*Experimental Film* represents the next, significant contribution to what is emerging as one of the most interesting and exciting bodies of work currently being produced in the horror field. Every film, Lois Cairns writes, is an experiment. The same might be said of every novel. This one succeeds, wildly.” —Locus “*Experimental Film* is sensational. When we speak of the best in contemporary horror and weird fiction, we must speak of Gemma Files.” —Laird Barron “[*Experimental Film* is] truly unnerving. This is a too-often overlooked postmodern gem.” —Esquire, “The 50 Best Horror Books of All Time”

The Shenzhen Experiment Juan Du, 2020-01-07 A rural borderland just forty years ago, today Shenzhen is a city of twenty million and a technology hub. This success is attributed to its status as a Special Economic Zone, but no other SEZs compare. Juan Du looks to the past to understand why. It turns out that Shenzhen is no prefab “instant city,” but a place influenced by deep local history.

Atlas: A 25-year Insider Story Of The Lhc Experiment Peter Jenni, Fridolin Dittus, 2019-05-21 This book is written by the ATLAS Collaboration at CERN's Large Hadron Collider (LHC), to document and reflect on its more than 25 years of history. It covers all aspects of this global science project at the forefront of particle physics. The historical part recalls first the early stages of discussions in the community leading to the formation of the collaboration in 1992. In a unique approach, the second part documents the evolution from early detector concepts to the final instrument, covering the technical, financial and human aspects. This includes the phases of construction of detector components in the various institutes around the world as well as their installation and commissioning in the underground cavern at CERN. An important part is devoted to the operation of the whole experiment. The book highlights the capabilities and physics accomplishments so far, including the Higgs boson discovery (jointly announced with CMS). It features the various aspects of a broad spectrum of activities needed to arrive at the physics results. The book includes also an outlook to the detector upgrade activities preparing the experiment for the high-luminosity LHC phase of the next decades. Last but not least, it reveals the human aspects of the large ATLAS community working together pursuing common physics goals. The book is aimed at a broad readership with interest in large science projects and their history, as well as in the human endeavour of a worldwide collaboration.

Incarnate Thalia Field, 2004 An enthralling new work by one of America's foremost experimental writers. Thalia Field's inventive new book explores the very condition of being incarnate: how, invested with human form, we experience both suffering and ecstasy from childhood to adulthood to death. As with her previous book published by New Directions, *Point and Line* (2000), *Incarnate* defies categorization: it industriously works the sparsely populated and as yet underdeveloped borderlands between poetry, fiction, theater, and contemporary classical music (Review of Contemporary Fiction). In *Incarnate: Story Material*, she continues to reach beyond borders, examining how, trapped in our own stories, we act and react in a world of solidity, perceiving something other close at hand. With its amazing variety of poetic and prose-like forms, driven by a fierce and playful intelligence, *Incarnate: Story Material* challenges and moves us.

Behind the Shock Machine Gina Perry, 2013-09-03 When social psychologist Stanley Milgram invited volunteers to take part in an experiment at Yale in the summer of 1961, none of the participants could have foreseen the worldwide sensation that the published results would cause. Milgram reported that fully 65 percent of the volunteers had repeatedly administered electric shocks of increasing strength to a man they believed to be in severe pain, even suffering a life-threatening heart condition, simply because an authority figure had told them to do so. Such behavior was linked to atrocities committed by ordinary people under the Nazi regime and immediately gripped the public imagination. The experiments remain a source of controversy and fascination more than fifty years later. In *Behind the Shock Machine*, psychologist and author Gina Perry unearths for the first time the full story of this controversial experiment and its startling repercussions. Interviewing the original participants—many of whom remain haunted to this day about what they did—and delving deep into Milgram's personal archive, she pieces together a more complex picture and much more troubling picture of these experiments than was originally presented by Milgram. Uncovering the details of the experiments leads her to question the validity of that 65 percent statistic and the claims that it revealed something essential about human nature. Fleshed out with dramatic transcripts of the tests themselves, the book puts a human face on the unwitting people who faced the moral test of the shock machine and offers a gripping, unforgettable tale of one man's ambition and an experiment that defined a generation.
