Odyssey in International Markets Christian Volpe Martincus,2010-01-01 Despite progress in communication technologies, lack of information still severely handicaps companies seeking to operate in international markets. Furthermore, the investments that these companies must make to gather the information required to trade with foreign markets may yield reduced returns and may consequently be low from a social point of view as third parties may derive benefits from this same information. Thus, lack of information may negatively affect trade, and thereby productivity and economic growth. For these reasons, firms carrying out export projects may require support to overcome information barriers. This is precisely the service that export promotion organizations provide. But, there is little evidence on how well these organizations perform this task. Export promotion is costly, and the resources used might be better employed elsewhere. In order to ascertain that these resources are, in fact, being well invested, it must be first determined whether the policy initiatives they finance have an impact on those variables that are supposed to affect, in this case, exports. Making this determination is the aim of this report. This study first makes a comprehensive analysis of export promotion organizations in some three dozens of countries and regions; and second, it provides robust evaluations, using state-of-the-art econometrics and original data sets purposely compiled, of the impacts that policies have had on export outcomes of countries and firms. Findings reported in this study suggest that trade promotion has been effective in facilitating export expansion, especially along the extensive margin. At the same time, the report points the need for further research to gain deeper insights into its relative merits.

Managing Exports Frank Reynolds,2003-03-14 Provides practical easy-to-implement advice on how to comply with the latest rules and regulations. Shows how to recoup money spent on duty drawbacks. Shows how to get around trade barriers in foreign countries. Shows how to use the internet and other technologies to reduce the cost of exporting. Provides insights into reducing export risk exposures.

Particular emphasis is placed on the challenges posed by export controls to the US-European Community partnership, and to the effects of European unity following unity in 1993. Contributors: Bill Richardson, John Harvey, Michael Elleman, Matthias Dembinski, Benoit Morel, David Fischer, Jeff Bingaman, Jan Hoekema, Harald Muller, William Burns, Richard Kauzlarich, and Reinhard Rode.

Building an Import/Export Business Kenneth D. Weiss,1987-03-04 Foreign trade is one of the most lucrative areas for any business. But whether you're a manufacturer exporting a fleet of trucks or a small entrepreneur importing a shipment of native art, the maze of regulations, the piles of documentation, and the sheer differences in international business practices can create a world of confusion. From Kenneth D. Weiss, a leading specialist in world trade, here is a highly informative guide that unravels these secrets. Explains international business--including international transactions, import/export credit and payment, international shipping and insurance, regulatory agencies, documentation and customs clearance. Weiss also covers the finer points, such as who can and should go into importing and exporting, how the company should be set up, selecting suppliers, finding customers, and choosing target markets.
