Essentials of Executive Functions Assessment George McCloskey,Lisa A. Perkins,2012-11-30 Written by experts in the area of executive functioning, Essentials of Executive Functions Assessment equips mental health practitioners (school, clinical, developmental/pediatric, neuropsychologists, educational diagnosticians, and educational therapists) with all the information they need to administer, score, and interpret assessment instruments that test for executive functions deficits associated with a number of psychiatric and developmental disorders.

Assessment and Intervention for Executive Function Difficulties George McCloskey,Lisa A. Perkins,Bob Van Diviner,2008-12-05 In Assessment and Intervention for Executive Function Difficulties, McCloskey, Perkins, and Diviner provide a unique blend of theory, research, and practice that offers clinicians an overarching framework for the concept of executive functions (EFs) in educational settings. The conceptual model of executive functions is detailed, including their role in behavior, learning, and production across all settings. The heart of the book focus on the practical issues involved in the use of assessment tools, tests, report writing, and the implementation and follow-up of targeted interventions using the EF model. Six case studies are introduced in Chapter 1 and followed throughout the book, building understanding of the executive function difficulties of each child, assessment for identifying the difficulties, and interventions for dealing with the difficulties. An additional case study is discussed in detail in one of the concluding chapters, and downloadable resources will provide the practitioner with a wealth of assessment forms, parent and teacher handouts, behavior tracking charts, and report/documentation forms.

Comprehensive Evaluations Nancy Mather,Lynne E. Jaffe,2010-11-11 An invaluable collection of sample case reports from experts in child and adolescent assessment With contributions from authorities in the fields of psychology and special education-including Dawn Flanagan, Elaine Fletcher-Janzen, Randy Kamphaus, Nadeen Kaufman, George McCloskey, Jack Naglieri, Cecil Reynolds, and Gale Roid—Comprehensive Evaluations provides over fifty sample case reports to help you draft carefully planned, goal-directed, and comprehensive evaluations that clearly explain the reasons for a student's school-related difficulties, from preschool to postsecondary level. A wellspring of information for educational professionals, Comprehensive Evaluations provides models for writing diagnostic reports to accompany the tests most frequently administered in the evaluation of children, adolescents, and adults, including the BASC-2, KABC-II, WAIS-IV, WISC-IV, and WJ III. The reports reflect various disciplines within psychology and education, different theoretical perspectives and paradigms, and span a broad spectrum of disabilities. The diagnostic reports found within Comprehensive Evaluations will help: Expand your familiarity with widely used test instruments Enhance your understanding of the interpretation of test scores Improve your ability to tailor written reports to the purposes of the evaluation Translate assessment results into meaningful treatment recommendations Recognize the differences in what evaluators from various school districts, agencies, and private practices consider to be a comprehensive evaluation Appreciate how your theoretical perspective and choice of tests can influence diagnostic conclusions Determine a report writing style that meets your needs Comprehensive Evaluations deftly illustrates how thorough assessments help empirically pinpoint the reasons a student is struggling in school, which then allows an evaluator to select the most appropriate accommodations and interventions to help the student succeed.

Treating Explosive Kids Ross W. Greene,J. Stuart Ablon,2005-10-18 The first comprehensive presentation for clinicians of the groundbreaking approach popularized in Ross Greene's acclaimed parenting guide, The Explosive Child, this book provides a detailed framework for effective, individualized intervention with highly oppositional children and their families. Many vivid examples and Q&A sections show how to identify the specific cognitive factors that contribute to explosive and noncompliant behavior, remediate these factors, and teach children and their adult caregivers how to solve problems collaboratively. The book also describes challenges that may arise in implementing the model and provides clear and practical solutions. Two special chapters focus on intervention in schools and in therapeutic/restrictive facilities.
