Israeli F-15 Eagle Units in Combat Shlomo Aloni,2013-01-20 Post-Yom Kippur War, Israel purchased the F-15 Eagle, the then world's best air-to-air fighter, in an effort to

prevent another surprise attack from the air. For the first time in its history the IDF/AF operated a fighter that was a full generation ahead of opposing interceptors in the region. The first 'kill' F-15 Baz (Buzzard) arrived in Israel in 1976 and soon proved its worth in combat. Israeli Baz pilots were credited with 12.5 kills between 1979 and 1981, with 33 victories following during the June 1982 Lebanon War. Despite substantial combat, no Israeli F-15 has ever been lost to enemy action. In the 1990s the US government supplied the IDF/AF with the F-15I Ra'am (Thunder) to fulfill the long-range surface-to-surface missile mission post-Desert Storm. From A to I, the extremely capable, and combat-tested, Israeli F-15 force will continue to deter potential enemies well into the foreseeable future. This book examines the history and development of these units.

Boeing (MD) F-15 Eagle A. M. Thornborough, 2011-08-01 The F-15 Eagle is the Western world's air defense supreme. An all-weather, agile, tactical fighter, it is designed to gain and maintain air superiority in combat, achieved by a mixture of maneuverability, acceleration, range, weapons and avionics. The F-15 has electronic systems and weaponry that can detect, acquire, track and attack enemy aircraft while operating in friendly or

enemy-controlled airspace and its weapons and flight control systems are designed so one person can safely and effectively perform air-to-air combat. Thus far the F-15 remains undefeated in aerial combat and author Anthony M. Thornborough brings every detail of this superb aircraft to the SAM Publications MDF series. This new book will chart the development of the F-15, though to its combat debut, its war roles and victories at the hands of the Israeli Air Force, where it forms the backbone of that country's aerial defence strategy.

F-15C Eagle vs MiG-23/25 Douglas C. Dildy, Tom Cooper, 2016-04-21 Designed following the relatively poor performance of America's multi-role fighters during the Vietnam War, the F-15 Eagle was conceived as a dedicated air superiority fighter. But, having trained for 15 years in the Eagle it wasn't Eastern Bloc operated MiGs that the F-15 eventually came up against, but pilots of Saddam Hussein's Iraqi airforce. This book analyses the combat between the American and Soviet 'Cold War fighters' in a balanced manner, examining how the technical abilities of the aircraft combined with the different levels of training available to opposing pilots and groundcrews allowed the F-15s to destroy the Iraqi offensive abilities within weeks of the First Gulf War starting. Packed with artwork, illustrations and photographs, this book places the reader in the cockpit during one of the last major dogfighting air wars in modern history.
