Real Food/Fake Food Larry Olmsted,2017-10-03 “Olmsted makes you insanely hungry and steaming mad--a must-read for anyone who cares deeply about the safety of our food and the welfare of our planet.” —Steven Raichlen, author of the Barbecue! Bible series “The world is full of delicious, lovingly crafted foods that embody the terrain, weather, and culture of their origins. Unfortunately, it’s also full of brazen impostors. In this entertaining and important book, Olmsted helps us fall in love with the real stuff and steer clear of the fraudsters.” —Kirk Kardashian, author of Milk Money: Cash, Cows, and the Death of the American Dairy Farm You’ve seen the headlines: Parmesan cheese made from wood pulp. Lobster rolls containing no lobster at all. Extra-virgin olive oil that isn’t. So many fake foods are in our supermarkets, our restaurants, and our kitchen cabinets that it’s hard to know what we’re eating anymore. In Real Food / Fake Food, award-winning journalist Larry Olmsted convinces us why real food matters and empowers consumers to make smarter choices. Olmsted brings readers into the unregulated food industry, revealing the shocking deception that extends from high-end foods like olive oil, wine, and Kobe beef to everyday staples such as coffee, honey, juice, and cheese. It’s a massive bait and switch in which counterfeiting is rampant and in which the consumer ultimately pays the price. But Olmsted does more than show us what foods to avoid. A bona fide gourmand, he travels to the sources of the real stuff to help us recognize what to look for, eat, and savor: genuine Parmigiano-Reggiano from Italy, fresh-caught grouper from Florida, authentic port from Portugal. Real foods that are grown, raised, produced, and prepared with care by masters of their craft. Part cautionary tale, part culinary crusade, Real Food / Fake Food is addictively readable, mouthwateringly enjoyable, and utterly relevant.

Sorting the Beef from the Bull Richard Evershed,Nicola Temple,2016-02-25 Horsemeat in burgers was hard to swallow, but there are far more sinister culinary crimes afoot... Chicken eggs that haven't come from chickens, melamine in infant's milk in China, nut shells in spices – these are just some examples of the food fraud that has occurred in recent years. As our urban lifestyle takes us further and further away from our food sources, there are increasing opportunities for dishonesty, duplicity and profit-making short-cuts. Food adulteration, motivated by money, is an issue that has spanned the globe throughout human history. Whether it's a matter of making a good quality oil stretch a bit further by adding a little extra 'something' or labelling a food falsely to appeal to current consumer trends – it's all food fraud, and it costs the food industry billions of dollars each year. The price to consumers may be even higher, with some paying for these crimes with their health and, in some cases, their lives. Sorting the Beef from the Bull is a collection of food fraud tales from around the world. It explains the role of science in uncovering some of the century's biggest food scams, and explores the arms race between food forensics and fraudsters as new methods of detection spur more creative and sophisticated means of committing the crimes. This book equips us with the knowledge of what is possible in the world of food fraud and shines a light on the shady areas of our food supply system where these criminals lurk.

David specializes in reducing or eliminating causes to help his patients and students improve their health. Drugs are generally suppressors of symptoms while the condition gets worse.

In Defence of Food Michael Pollan,2008-01-31 'A must-read ... satisfying, rich ... loaded with flavour' Sunday Telegraph This book is a celebration of food. By food, Michael Pollan means real, proper, simple food - not the kind that comes in a packet, or has lists of unpronounceable ingredients, or that makes nutritional claims about how healthy it is. More like the kind of food your great-grandmother would recognize. In Defence of Food is a simple invitation to junk the science, ditch the diet and instead rediscover the joys of eating well. By following a few pieces of advice (Eat at a table - a desk doesn't count. Don't buy food where you'd buy your petrol!), you will enrich your life and your palate, and enlarge your sense of what it means to be healthy and happy. It's time to fall in love with food again. For the past twenty years, Michael Pollan has been writing about the places where the human and natural worlds intersect: food, agriculture, gardens, drugs, and architecture. His most recent book, about the ethics and ecology of eating, is The Omnivore's Dilemma, named one of the ten best books of 2006 by the New York Times and the Washington Post. He is also the author of The Botany of Desire, A Place of My Own and Second Nature.

Treasure Baskets and Heuristic Play Sally Featherstone,2013-04-11 Heuristic Play is a tightly described, but freely accessed activity, using a specific range of 'found' or everyday objects, and, in its pure sense, is only really applicable to a specific age range (from 12 months to about two and a half). However, there is now plenty of evidence that heuristic play has continuing value for children throughout the Foundation Stage and well into the primary years. Collections of objects, carefully selected and offered in both adult-led and child-initiated sessions, indoors and outside, can build on the experience of treasure baskets In this informative and helpful book you will find further information on the process of using both treasure baskets and heuristic play with babies and young children. You will also find chapters which explore the benefits of heuristic play with objects for children throughout the early years from six months to seven years. Of course, the materials, the provision and the adult role will develop and change as children mature, so this book also gives guidance on how heuristic play itself should change to meet the needs of children at different stages of development.

Food Adulteration and Food Fraud Jonathan Rees,2020-02-10 What do we really know about the food we eat? A firestorm of recent food-fraud cases, from the US honey-laundering scandal to the forty-year-old frozen “zombie” meat smuggled into China, to horse-meat episodes in the United Kingdom, suggests fraudulent and intentional acts of food adulteration are on the rise. While often harmless, some incidents have resulted in serious public health consequences. At the heart of these dubious practices are everyone from large food processors to small-time criminals, while many consumers are becoming increasingly concerned about this malfeasance. In this book, Jonathan Rees examines the complex causes and surprising effects of adulteration and fraud across the global food chain. Covering comestibles of all kinds from around the globe, Rees describes the different types of contamination, the role and effectiveness of government regulation, and our willingness to ignore deception if the groceries we purchase are cheap or convenient. Pithy, punchy, and cogent, *Food Adulteration and Food Fraud* offers important insight into this vital problem of human consumption.
