Digital Video Surveillance and Security Anthony C. Caputo, 2010-02-23 Digital Video Surveillance and Security provides a blueprint for the IP-based electronic security system clients need, allowing security professionals to protect their client's place of business or home. The author gives detailed plans on the best camera position, areas of coverage, and hardware and software to select to maximize the effectiveness of newer lower-cost networked technologies. Clear, step-by-step descriptions and detailed illustrations describe the integration of such components as the current or new security system, door and window sensors, or other access controls, offering the capability of instantly launching a video of the area under surveillance on a computer or HDTV. Today's digital video surveillance solutions are networked, digitally archived, offering granular, managed accessibility from anywhere (any office, home, PDA, or smart phone), and providing interoperability and simple scalability. With recent advances in technology, DVS is economically attainable for most businesses. Security consultants can use this information to guide their clients in making budget-friendly choices of design and equipment and assembling the optimal system for their needs. Systems installers can use this step-by-step illustrated guide to master this crucial new technology. Vendor-neutral comparisons of camera equipment and recording options Common sense approach Highly visual presentation Case studies and descriptions of best practices Step-by-step guides Easy to read diagrams and schematics

Physics and Video Analysis Rhett Allain, 2016-04-01 We currently live in a world filled with videos. There are videos on YouTube, feature movies and even videos recorded with our own cameras and smartphones. These videos present an excellent opportunity to not only explore physical concepts, but also inspire others to investigate physics ideas. With video analysis, we can explore the fantasy world in science-fiction films. We can also look at online videos to determine if they are genuine or fake. Video analysis can be used in the introductory physics lab and it can even be used to explore the make-believe physics embedded in video games. This book covers the basic ideas behind video analysis along with the fundamental physics principles used in video analysis. The book also includes several examples of the unique situations in which video analysis can be used.

Reasonable Expectations of Privacy? Sjaak Nouwt, Berend R. de Vries, Corien Prins, 2005-07-28 In 1967, Justice John Marshall Harlan introduced the litmus test of 'a reasonable expectation of privacy' in his concurring opinion in the US Supreme Court case of *Katz v. United States*. Privacy, regulations to protect privacy, and data protection have been legal and social issues in many Western countries for a number of decades. However, recent measures to combat terrorism, to fight crime, and to increase security, together with the growing social acceptance of privacy-invasive technologies can be considered a serious threat to the fundamental right to privacy. What is the purport of 'reasonable expectations of privacy'? Reasonable expectations of privacy and the reality of data protection is the title of a research project being carried out by TILT, the Tilburg Institute for Law, Technology, and Society at Tilburg University, The Netherlands. The project is aimed at developing an international research network of privacy experts (professionals, academics, policymakers) and to carry out research on the practice, meaning, and legal performance of privacy and data protection in an international perspective. Part of the research project was to analyse the concept of privacy and the reality of data protection in case law, with video surveillance and workplace privacy as two focal points. The eleven country reports regarding case law on video surveillance and workplace privacy are the core of the present book. The conclusions drawn by the editors are intended to trigger and stimulate an international debate on the use and possible drawbacks of the 'reasonable expectations of privacy' concept. The editors are all affiliated to TILT - Tilburg Institute for Law, Technology, and Society, Tilburg University, The Netherlands. This is Volume 7 in the Information Technology and Law (IT&Law) Series

Languages of Resistance, Transformation, and Futurity in Mediterranean Crisis-Scapes Maria Boletsis, Janna Houwen, Liesbeth Minnaard, 2020-09-01 This collection rethinks crisis in relation to critique through the prism of various declared 'crises' in the Mediterranean: the refugee crisis, the

Eurozone crisis, the Greek debt crisis, the Arab Spring, the Palestinian question, and others. With contributions from cultural, literary, film, and migration studies and sociology, this book shifts attention from Europe to the Mediterranean as a site not only of intersecting crises, but a breeding ground for new cultures of critique, visions of futurity, and radical imaginaries shaped through or against frameworks of crisis. If crisis rhetoric today serves populist, xenophobic or anti-democratic agendas, can the concept crisis still do the work of critique or partake in transformative languages by scholars, artists, and activists? Or should we forge different vocabularies to understand present realities? This collection explores alternative mobilizations of crisis and forms of art, cinema, literature, and cultural practices across the Mediterranean that disengage from dominant crisis narratives. Video Revolutions Michael Z. Newman, 2014-04-01 Since the days of early television, video has been an indispensable part of culture, society, and moving-image media industries. Over the decades, it has been an avant-garde artistic medium, a high-tech consumer gadget, a format for watching movies at home, a force for democracy, and the ultimate, ubiquitous means of documenting reality. In the twenty-first century, video is the name we give all kinds of moving images. We know it as an adaptable medium that bridges analog and digital, amateur and professional, broadcasting and recording, television and cinema, art and commercial culture, and old media and new digital networks. In this history, Michael Z. Newman casts video as a medium of shifting value and legitimacy in relation to other media and technologies, particularly film and television. Video has been imagined as more or less authentic or artistic than movies or television, as more or less democratic and participatory, as more or less capable of capturing the real. Techno-utopian rhetoric has repeatedly represented video as a revolutionary medium, promising to solve the problems of the past and the present—often the very problems associated with television and the society shaped by it—and to deliver a better future. Video has also been seen more negatively, particularly as a threat to movies and their culture. This study considers video as an object of these hopes and fears and builds an approach to thinking about the concept of the medium in terms of cultural status.

Hospital and Healthcare Security Tony W York, Don MacAlister, 2015-02-19 Building on the foundation of the previous five editions, *Hospital and Healthcare Security*, 6th Edition includes new and updated chapters to reflect the current state of healthcare security, particularly in data security and patient privacy, patient-generated violence, and emergency preparedness and management. The recognized leading text in the healthcare security industry, *Hospital and Healthcare Security*, 6th Edition explains the basics as well as higher expertise concerns, such as the roles of design, emergency management, and policy. Conveying a wide spectrum of topics in an easy to comprehend format, *Hospital and Healthcare Security*, 6th Edition provides a fresh perspective for healthcare security professionals to better prepare for security issue before they occur. Offers a quick-start section for hospital administrators who need an overview of security issues and best practices Includes a sample request for proposals (RFP) for healthcare security services and incident report classifications General principles clearly laid out so readers can apply internationally recognized industry standards most appropriate to their own environment The new edition includes materials that address the latest issues of concern to healthcare security professionals, including security design, emergency management, off-campus programs and services, and best practices in mitigating patient-generated violence

Video Verification in the Fake News Era Vasileios Mezaris, Lyndon Nixon, Symeon Papadopoulos, Denis Teyssou, 2019-09-17 This book presents the latest technological advances and practical tools for discovering, verifying and visualizing social media video content, and managing related rights. The digital media revolution is bringing breaking news to online video platforms, and news organizations often rely on user-generated recordings of new and developing events shared in social media to illustrate the story. However, in video, there is also deception. In today's fake news era, access to increasingly sophisticated editing and content management tools and the ease with

which fake information spreads in electronic networks, require the entire news and media industries to carefully verify third-party content before publishing it. As such, this book is of interest to computer scientists and researchers, news and media professionals, as well as policymakers and data-savvy media consumers.

Blockchain and Trustworthy Systems Zibin Zheng, Hong-Ning Dai, Xiaodong Fu, Benhui Chen, 2020-11-11 This book constitutes the thoroughly refereed post conference papers of the Second International Conference on Blockchain and Trustworthy Systems, Blocksys 2020, held in Dali, China*, in August 2020. The 42 full papers and the 11 short papers were carefully reviewed and selected from 100 submissions. The papers are organized in topical sections: theories and algorithms for blockchain, performance optimization of blockchain, blockchain security and privacy, blockchain and cloud computing, blockchain and internet of things, blockchain and mobile edge computing, blockchain and smart contracts, blockchain and data mining, blockchain services and applications, trustworthy system development. *The conference was held virtually due to the COVID-19 pandemic.

Digital-Forensics and Watermarking Yun-Qing Shi, Hyoung Joong Kim, Fernando Pérez-González, Isao Echizen, 2016-03-30 This book constitutes revised selected papers from the 14th International Workshop on Digital-Forensics and Watermarking, IWDW 2015, held in Tokyo, Japan, in October 2015. The 35 papers presented in this volume were carefully reviewed and selected from 54 submissions. The contributions are organized in topical sections named: digital forensics; steganography and steganalysis; digital watermarking; reversible data hiding; and visual cryptography.

Performance, Transparency, and the Cultures of Surveillance James M. Harding, 2018-01-23 Placing the disciplines of performance studies and surveillance studies in a timely critical dialogue, *Performance, Transparency, and the Cultures of Surveillance* not only theorizes how surveillance performs but also how the technologies and corresponding cultures of surveillance alter the performance of everyday life. This exploration draws upon a rich array of examples from theatre, performance, and the arts, all of which provide vivid illustration of the book's central argument: that the rise of the surveillance society coincides with a profound collapse of democratic oversight and transparency—a collapse that, in turn, demands a radical rethinking of how performance practitioners conceptualize art and its political efficacy. The book thus makes the case that artists and critics must reexamine—indeed, must radically redefine—their notions of performance if they are to mount any meaningful counter to the increasingly invasive surveillance society.

Fake Accounts Lauren Oyler, 2021-02-02 A NATIONAL BESTSELLER * A NEW YORK TIMES BOOK REVIEW EDITORS' CHOICE * A WASHINGTON POST BEST BOOK OF THE YEAR An invigorating work, deadly precise in its skewering of people, places and things . . . Stylish, despairing and very funny, *Fake Accounts* . . . adroitly maps the dwindling gap between the individual and the world. —Katie Kitamura, *The New York Times Book Review* A woman in a tailspin discovers that her boyfriend is an anonymous online conspiracy theorist in this “absolutely brilliant take on the bizarre and despicable ways the internet has warped our perception of reality” (*Elle*, One of the Most Anticipated Books of the Year). On the eve of Donald Trump's inauguration, a young woman snoops through her boyfriend's phone and makes a startling discovery: he's an anonymous internet conspiracy theorist, and a popular one at that. Already fluent in internet fakery, irony, and outrage, she's not exactly shocked by the revelation. Actually, she's relieved—he was always a little distant—and she plots to end their floundering relationship while on a trip to the Women's March in DC. But this is only the first in a series of bizarre twists that expose a world whose truths are shaped by online lies. Suddenly left with no reason to stay in New York and increasingly alienated from her friends and colleagues, our unnamed narrator flees to Berlin, embarking on her own cycles of manipulation in the deceptive spaces of her daily life, from dating apps to expat meetups, open-plan offices to bureaucratic waiting rooms. She begins to think she can't trust anyone—shouldn't the feeling be mutual? Narrated with seductive confidence and subversive wit, *Fake Accounts*

challenges the way current conversations about the self and community, delusions and gaslighting, and fiction and reality play out in the internet age.

Mining Intelligence and Knowledge Exploration Rajendra Prasath,T.

Kathirvalavakumar,2013-12-16 This book constitutes the proceedings of the First International Conference on Mining Intelligence and Knowledge Exploration, MIKE 2013, held in Tamil Nadu, India on December 2013. The 82 papers presented were carefully reviewed and selected from 334 submissions. The papers cover the topics such as feature selection, classification, clustering, image processing, network security, speech processing, machine learning, information retrieval, recommender systems, natural language processing, language, cognition and computation and other certain problems in dynamical systems.

Thai Horse William Diehl,1989-01-13 It's enough to make Ludlum seem humdrum. ATLANTA JOURNAL & CONSTITUTION Christian Hatcher, the licensed killer they call the Shadow Warrior, is out of jail and looking for the betrayer that got him there. With his body wasted and his spirit nearly crushed, Hatcher returns to Hong Kong and Bangkok--deadly stops on the heroine pipeline--and comes closer to a solution that he fears to discover . . . Diehl knows how to tell a story, and his novel moves. THE NEW YORK TIMES BOOK REVIEW

Multi-Camera Networks Hamid Aghajan, Andrea Cavallaro,2009-04-25 The first book, by the leading experts, on this rapidly developing field with applications to security, smart homes, multimedia, and environmental monitoring Comprehensive coverage of fundamentals, algorithms, design methodologies, system implementation issues, architectures, and applications Presents in detail the latest developments in multi-camera calibration, active and heterogeneous camera networks, multi-camera object and event detection, tracking, coding, smart camera architecture and middleware This book is the definitive reference in multi-camera networks. It gives clear guidance on the conceptual and implementation issues involved in the design and operation of multi-camera networks, as well as presenting the state-of-the-art in hardware, algorithms and system development. The book is broad in scope, covering smart camera architectures, embedded processing, sensor fusion and middleware, calibration and topology, network-based detection and tracking, and applications in distributed and collaborative methods in camera networks. This book will be an ideal reference for university researchers, R&D engineers, computer engineers, and graduate students working in signal and video processing, computer vision, and sensor networks. Hamid Aghajan is a Professor of Electrical Engineering (consulting) at Stanford University. His research is on multi-camera networks for smart environments with application to smart homes, assisted living and well being, meeting rooms, and avatar-based communication and social interactions. He is Editor-in-Chief of Journal of Ambient Intelligence and Smart Environments, and was general chair of ACM/IEEE ICDSC 2008. Andrea Cavallaro is Reader (Associate Professor) at Queen Mary, University of London (QMUL). His research is on target tracking and audiovisual content analysis for advanced surveillance and multi-sensor systems. He serves as Associate Editor of the IEEE Signal Processing Magazine and the IEEE Trans. on Multimedia, and has been general chair of IEEE AVSS 2007, ACM/IEEE ICDSC 2009 and BMVC 2009. The first book, by the leading experts, on this rapidly developing field with applications to security, smart homes, multimedia, and environmental monitoring Comprehensive coverage of fundamentals, algorithms, design methodologies, system implementation issues, architectures, and applications Presents in detail the latest developments in multi-camera calibration, active and heterogeneous camera networks, multi-camera object and event detection, tracking, coding, smart camera architecture and middleware

The Mammoth Book Of Weird Records Jim Theobald, 2015-09-17 Everyone's heard of Usain Bolt, but how many people know about Dineka Maguire? Like Bolt, the Irish woman is a world record holder but in the rather lesser known sport of bog snorkelling. She is just one of the hundreds of unsung heroes featured in this book chronicling the people who go to bizarre lengths to break world records in the weirdest categories; people who devote hours of intense training to spitting dung, eating cockroaches, sniffing feet or tossing tuna in the hope of one day being recognised as the best in the world. This astonishing compendium of the weirdest, wackiest and most disgusting world records will amuse and astound in equal measure. Entries include: Longest ear hair Fastest marathon while wearing a deep-sea diving suit Fastest bog snorkeller Farthest distance skateboarding by a goat Most bees on body Most milk crates balanced on head Fastest 5-km run while dressed as a penguin and juggling Heaviest airplane pulled with teeth Fastest shopping trolley Longest backwards motorcycle ride Most stairs climbed by bicycle Fastest 30 metres on a scooter by a dog First water-skiing squirrel

The World's 100 Weirdest Museums Geoff Tibballs, 2016-10-20 When we think of the world's great museums, we tend to think of the Louvre, the Guggenheim or the Victoria and Albert. We do not immediately think of the Dog Collar Museum, the Kansas Barbed Wire Museum, the Museum of Broken Relationships or Barney Smith's Toilet Seat Art Museum. Yet scattered across the globe are museums dedicated to every conceivable subject, from bananas to Bigfoot, lawnmowers to leprechauns, teapots to tapeworms, mustard to moist towelettes, and pencils to penises. Many are serious collections housed in grand buildings, others are located in tiny premises and are open to visitors by appointment only, often the result of one person's crazy lifetime obsession. This book lists the world's 100 weirdest museums in order of quirkiness, encompassing such delights as The Museum of Witchcraft in Cornwall, a museum in Kentucky that houses 800 ventriloquists' dolls, the Museum of Bad Art in Massachusetts, the Paris Sewer Museum, the French Fry Museum in Bruges, the Museum of Contraception and Abortion in Vienna, the Salt and Pepper Shaker Museum in Tennessee, Japan's Momofuku Ando Instant Ramen Museum (quite possibly the world's only museum devoted to instant noodles), and the Kunstkamera in St Petersburg, home to Peter the Great's collection of oddities including deformed fetuses and the decapitated head of a love rival preserved in vinegar. After all, what holiday is complete until you have seen a 300-year-old decapitated human head in a jar? Each entry will include address, contact and admission details, so the next time you are in Berlin there is no excuse for missing out on a visit to the Currywurst Museum, the world's leading museum dedicated to sausages in hot ketchup.

Introduction to Cyberdeception Neil C. Rowe, Julian Rrushi, 2016-09-23 This book is an introduction to both offensive and defensive techniques of cyberdeception. Unlike most books on cyberdeception, this book focuses on methods rather than detection. It treats cyberdeception techniques that are current, novel, and practical, and that go well beyond traditional honeypots. It contains features friendly for classroom use: (1) minimal use of programming details and mathematics, (2) modular chapters that can be covered in many orders, (3) exercises with each chapter, and (4) an extensive reference list. Cyberattacks have grown serious enough that understanding and using deception is essential to safe operation in cyberspace. The deception techniques covered are impersonation, delays, fakes, camouflage, false excuses, and social engineering. Special attention is devoted to cyberdeception in industrial control systems and within operating systems. This material is supported by a detailed discussion of how to plan deceptions and calculate their detectability and effectiveness. Some of the chapters provide further technical details of specific deception techniques and their application. Cyberdeception can be conducted ethically and efficiently when necessary by following a few basic principles. This book is intended for

advanced undergraduate students and graduate students, as well as computer professionals learning on their own. It will be especially useful for anyone who helps run important and essential computer systems such as critical-infrastructure and military systems.
