Isaac's Storm Erik Larson, 2000-07-11 From the bestselling author of *The Devil in the White City*, here is the true story of the deadliest hurricane in history. National Bestseller September 8, 1900, began innocently in the seaside town of Galveston, Texas. Even Isaac Cline, resident meteorologist for the U.S. Weather Bureau failed to grasp the true meaning of the strange deep-sea swells and peculiar winds that greeted the city that morning. Mere hours later, Galveston found itself submerged in a monster hurricane that completely destroyed the town and killed over six thousand people in what remains the greatest natural disaster in American history--and Isaac Cline found himself the victim of a devastating personal tragedy. Using Cline's own telegrams, letters, and reports, the testimony of scores of survivors, and our latest understanding of the science of hurricanes, Erik Larson builds a chronicle of one man's heroic struggle and fatal miscalculation in the face of a storm of unimaginable magnitude. Riveting, powerful, and unbearably suspenseful, *Isaac's Storm* is the story of what can happen when human arrogance meets the great uncontrollable force of nature.

The Man Who Caught the Storm Brantley Hargrove, 2019-04-02 The saga of the greatest tornado chaser who ever lived: a tale of obsession and daring and an extraordinary account of humanity's high-stakes race to understand nature's fiercest phenomenon from Brantley Hargrove, "one of today's great science writers" (The Washington Post). At the turn of the twenty-first century, the tornado was one of the last true mysteries of the modern world. It was a monster that ravaged the American heartland a thousand times each year, yet science's every effort to divine its inner workings had ended in failure. Researchers all but gave up, until the arrival of an outsider. In a field of PhDs, Tim Samaras didn't attend a day of college in his life. He chased storms with brilliant tools of his own invention and pushed closer to the tornado than anyone else ever dared. When he achieved what meteorologists had deemed impossible, it was as if he had snatched the fire of the gods. Yet even as he transformed the field, Samaras kept on pushing. As his ambitions grew, so did the risks. And when he finally met his match—in a faceoff against the largest tornado ever recorded—it upended everything he thought he knew. Brantley Hargrove delivers a "cinematically thrilling and scientifically wonky" (Outside) tale, chronicling the life of Tim Samaras in all its triumph and tragedy. Hargrove takes readers inside the thrill of the chase, the captivating science of tornadoes, and the remarkable character of a man who walked the line between life and death in pursuit of knowledge. *The Man Who Caught the Storm* is an "adrenaline rush of a tornado chase...Readers from all across the spectrum will enjoy this" (Library Journal, starred review) unforgettable exploration of obsession and the extremes of the natural world.

Wild Storm Richard Castle, 2014-05-13 Derrick Storm, the guy the CIA calls on when it wants something investigated domestically, is thirty-three thousand feet in the air, returning from a rock climbing vacation in the Swiss Alps, when the plane spirals into a nose-dive. Storm uses his climbing gear to tether himself to the wing and heroically save the plane and all the people on board. Sadly, Storm is not available to come to the aid of the three other planes that have crashed under similar circumstances, killing everyone on board. Interestingly, many of the victims are powerful people in politics, business and religious groups. The always elusive Jedidiah Jones,

leader of the National Clandestine Service that has no name, calls on Storm to investigate. Storm determines that an unknown extremist has secured enough of the rare earth element promethium to create a laser with the power to shoot down planes from the ground. The problem swiftly becomes a global one as four more planes crash in the Arabia Desert. Details, intuition and courage lead Storm to Monaco, Panama City and Egypt as he meets beautiful women, rides angry camels and rescues innocent victims in his valiant effort to track down the maniacal mind behind the terrorism.

Barrett depicts the heartbreaking yet humorous chaos in her household as her philandering father seeks a replacement wife and mother for his daughters. At age seventeen, disowned by her dad and feeling wildly un-mothered, Marsha flees her home in North Toronto to be independent. Storm Orphan is about a strong-spirited daughter and her domineering father. It's about living through tragedy yet finding hilarity. It's about grief and joy. It's about losing and discovering love, but ultimately it's a story about finding home.

Storm Chasers Paul Quarrington, 2013-12-24 Few people seek out the tiny Caribbean island of Dampier Cay—visitors usually wash up there by accident. But this weekend, three people are flying to the island, not for a tan or fun in the sun, but because they have reason to believe that they might encounter something there that most people take great measures to avoid—a hurricane. A lottery windfall and a few hours of selfishness have robbed Caldwell of all that was precious to him, while Beverly, haunted by tragedy and screwed by fate since birth, has given up on life. Also on the flight is Jimmy Newton, a professional storm chaser and videographer who will do anything for the perfect shot. Waiting for them at Dampier is the manager of the Water's Edge Hotel, Maywell Hope, a descendant of the pirates who sailed the Caribbean hundreds of years ago. As their stories unfold, the tragic underpinnings of Beverly and Caldwell's lives are revealed, a storyline that builds just as the hurricane looms ever-closer on the horizon. Cinematic and harrowing, Paul Quarrington's Storm Chasers is a tale of love and loss—and finding redemption in the eye of a hurricane.

The Storm Ivor van Heerden, Mike Bryan, 2006-05-18 The ultimate inside story of the Katrina tragedy—from the cofounder of the LSU Hurricane Center After warning for years about the looming threat of catastrophic flooding in New Orleans, Ivor van Heerden was one of the highest-profile media experts during the Katrina disaster. Over the following eighteen months, he was even more prominent as he challenged the official version of those events and campaigned for an engineering plan that would protect all of southeastern Louisiana, once and for all. In The Storm, van Heerden lays out in full detail the stunning incompetence among the bureaucrats, the politicians, and the Army Corps of Engineers that culminated in the catastrophe that crippled, perhaps forever, a great American city.

From Ben Franklin's early experiments, to the great storm debates of the nineteenth century, to heartland life in the early twentieth century, Sandlin shows how tornado chasing helped foster the birth of meteorology, recreating with vivid descriptions some of the most devastating storms in America's history. Drawing on memoirs, letters, eyewitness testimonies, and numerous archives, Sandlin brings to life the forgotten characters and scientists that changed a nation and how successive generations came to understand and finally coexist with the spiraling menace that could erase lives and whole towns in an instant.

This Contentious Storm: An Ecocritical and Performance History of King Lear Jennifer Mae Hamilton, 2017-08-24 From providential apocalypticism to climate change, this ground-breaking ecocritical study traces the performance history of the storm scene in *King Lear* to explore our shifting, fraught and deeply ideological relationship with stormy weather across time. *This Contentious Storm* offers a new ecocritical reading of Shakespeare's classic play, illustrating how the storm has been read as a sign of the providential, cosmological, meteorological, psychological, neurological, emotional, political, sublime, maternal, feminine, heroic and chaotic at different points in history. The big ecocritical history charted here reveals the unstable significance of the weather and mobilises details of the play's dramatic narrative to figure the weather as a force within self, society and planet.

Fastnet, Force 10: The Deadliest Storm in the History of Modern Sailing (New Edition) John Rousmaniere, 2000-04-17 In August 1979, 303 yachts began the 600-mile Fastnet Race from the Isle of Wight off the southwest coast of England to Fastnet Rock off the Irish coast and back. It began in fine weather, then suddenly became a terrifying ordeal. A Force 10, sixty-knot storm swept across the North Atlantic with a speed that confounded forecasters, slamming into the fleet with epic fury. For twenty hours, 2,500 men and women were smashed by forty-foot breaking waves, while rescue helicopters and lifeboats struggled to save them. By the time the race was over, fifteen people had died, twenty-four crews had abandoned ship, five yachts had sunk, 136 sailors had been rescued, and only 85 boats had finished the race. John Rousmaniere was there, and he tells the tragic story of the greatest disaster in the history of yachting as only one who has sailed through the teeth of a killer storm
