Hornet Orr Kelly, 2014-06-24 The fascinating true story of the controversial development and deployment of the supersonic fighter jet that changed aerial warfare forever The McDonnell Douglas F/A-18 Hornet was born in 1978, a state-of-the-art supersonic fighter and attack aircraft with a top speed of Mach 1.8, more than one thousand miles per hour. It was versatile, fast, and reliable, and no war machine in the air could match it. The marines adopted it first, followed by the navy, impressed by its incomparable ability to engage in close aerial combat while at the same time efficiently delivering explosive payloads to designated enemy targets. It became the aircraft of choice for the US Navy's famous Blue Angels flight demonstration squadron in 1986 and served ably in combat from its first mission—America's launched air strike against Libya that same year—through 1991's Operation Desert Storm and well beyond. Yet the Hornet has always been shrouded in controversy, and while still in its planning stages, it sparked an unprecedented political battle that nearly doomed the miraculous machine before it could take flight. Orr Kelly, the acclaimed military author who has notably chronicled the remarkable histories of the US Navy SEALs and other branches of America's Special Forces, tells the fascinating true story of the F/A-18 Hornet—how it came to be, how it almost wasn't, and how it forever altered the way our nation's wars are fought.

Curtiss Fighter Aircraft Francis H. Dean, 2006-11 Making use of primary Curtiss documents, as well as the combined resources of the world's leading historians of the subject, the authors have skillfully resolved myths and woven a comprehensive study of the often very confusing story of these classic airplanes. Making use of previously unpublished documents and photographs, this massive, life-long work will stand as a legacy to the memory of those wonderful shapes, the men and women who built them, flew them and took them to war, and the lasting contributions they have made, collectively, to aviation history and the defense of

democracy.

The Spirit of Attack Bruce Gordon, 2014 SCRAMBLE! In a couple of minutes my wingman and I would be airborne on another adventure. Sometimes we intercepted an airliner, sometimes a misplaced B-52 bomber, and sometimes Russian bombers probing our defenses; Russian warships; MIG fighters; or troops in contact in Vietnam, calling for napalm only yards from their positions. Twice it was UFOs - Unidentified Flying Objects! This book is a series of short stories, supported by more than 90 photographs. The first part has my own stories; later stories were contributed by my fellow pilots. The last story is from WW II of our P-38 fighters attacking the Romanian oil fields and getting badly mauled by defending Romanian fighters - and a Romanian pilot's view of the battle! Only the spirit of attack borne in a brave heart will bring success to any fighter aircraft, to matter how highly developed the aircraft may be. That quote from Adolf Galland, an Ace of the German Luftwaffe in WW II, was the motto of our 317th Fighter Interceptor Squadron in Alaska. The fighter pilot is a hunter, and his quarry is the most dangerous in the world - men who want to kill him! The best defense is a good offense - ATTACK! The US Air Force had a program called Every Man a Tiger. A tiger does not kill impulsively or in anger, but plans his attack carefully and strikes with cool ferocity. We were tigers! Fighter pilots tell stories around the bar, but they seldom write them down. These stories were written by the fighter pilots themselves! Come with me and hear of the beauty of flight, the mortal danger of electrical power failure at night in a snowstorm, and the thrill of attack with 20mm cannons firing right under your feet!

The World's Great Fighter Aircraft William Green, 1981
Outlines the history of the use of airplanes in battle and provides descriptions and specifications for fighter planes ranging from the 1916 Sopwith Camel to the 1978 Mirage

Sierra Sue II John Christgau, 2000-02-09 During World War

II, 15,000 P-51 Mustang fighter planes were produced by North American Aviation. Arguably the best fighter plane ever made, today there are less than a hundred left flying in the world. Of those, only a handful saw combat. Sierra Sue: The Story of a P-51 Mustang is the story of one of those survivors. The backdrop for the story is Sierra Sue II's appearance at the huge Offutt Air Force Base Open House in 1989. There, we go behind-the-scenes for glimpses of warbird pilots and jet jockeys alike, preparing for their air show acts. We also go six stories underground for a rare, chilling visit to our nuclear command post. But the real story is the history of Sierra Sue II, and the remarkable pilots who flew and loved her: from 1st Lt. Bob Bohna who flew her in combat during World War II and nearly became a reverse ace, to Sten Soderquist who flew her in Sweden in the early 50s when more than thirty Swedish pilots died in Mustang crashes, to Nicaragua where she was involved in several of dictator Luis Somoza's military adventures in the late 50s, to California where Dave Allender modified her with the intent of setting a new world speed record for piston aircraft. Almost forty years after her combat missions in the war, Sierra Sue II is bought by a hard-flying Minnesota physician known on the air show circuit simply as Doc. His romance with Sierra Sue II continues where Bohna and Soderquist and Allender leave off. But Doc is more than just another ardent admirer in her long history. While an Air Force jet pilot in the 50s, Doc crashed and suffered major injuries that ended his Air Force career. During his long recuperation, he took up a study of medicine that led to a general practice in Minneapolis. Now, he is determined to restore Sierra Sue II to her World War II condition and take her on the Midwest air show circuit. We follow that restoration in California by a mechanical genius named Jack Cochrane, and then Doc's cross-country flight to Minnesota, ending in a harrowing landing at nightfall on a remote airstrip on the Minnesota prairie. Millions of air show fans have enjoyed the sight of Sierra Sue II's ageless beauty. Now,

here is her story.

The World's Greatest Military Aircraft Thomas Newdick, 2015-07-15 Military Aircraft features 52 of the most important military aircraft, from biplane fighters to tactical bombers, transports, multirole fighters and stealth bombers. Packed with over 200 illustrations, each entry includes a description of the model's development and history, a profile view, key features and specifications.

Flying High S. Melvin Rines, S. M. Rines, 2005 As a young boy growing up in the Great Depression, the author discovers learning is important, college is possible, but his dream of flying is impossible. Suddenly, Pearl Harbor explodes! The world at war, a desire to serve, a chance to fly he enlists in the navy's flight training program, arguably the finest ever devised. Come fly with him in open-cockpit biplanes, low-wing trainers, dive bombers and fighters as he wins the coveted wings of gold', an officer's stripes and qualifies as a carrier-based fighter pilot---when a bomb is dropped and the war ends. The lights go on again, the nation celebrates, euphoric homecomings. The author joins the naval reserves, completes college, the Korean War erupts and he receives orders to active duty. Come aboard a massive aircraft carrier and share the heart-stopping exploits of a jet fighter pilot racking up fifty-five combat missions over Korea. Catapult launches, shooting and being shot at, and landings (and crashes) on a rolling and pitching flight deck are vividly recounted. The fury subsides, the author returns to devise and teach new procedures and flight patterns for the emerging jet age, while cavorting with stars in Hollywood and Palm Springs. Then he returns to civilian life, marries, and pursues another kind of combat a career in international investment banking.

Lost Fighters William Holder, 2006-12-06 This book, by Bill Holder, discusses the Lost Fighter turbojet and turboprop propulsion systems of the exciting jet fighter era in the United States since the mid-1940s. Until now, very little has been

published about these fascinating fighter activities that, for a variety of reasons, did not reach fruition. Covering fighters that did not reach beyond an artist's concept stage, to those that were cancelled after an evaluation of flight capabilities, to others that were cast aside after losing a fly-off competition, this book makes use of previously unpublished, primary-source material. It provides a coherent picture of U.S. jet fighter development and evolution. This book also includes hundreds of photos, drawings, and illustrations of the many Lost Fighters.

Inside Fighter Planes Chris Oxlade, 2017-08-01 Follow the powerful story of fighter aircraft—from the earliest six-winged inventions used during World War I right up to modern supersonic stealth fighters. Along the way, explore inside the cockpit of a Supermarine Spitfire, the engine of the jet-powered Messerschmitt Me 262, and the inner workings of the Lockheed Martin F-35 Lightning. From dogfight tricks to ejector seats, learn how fighter plane technology and strategy have developed throughout military history, and see life through the eyes of a fighter pilot.

Aircraft Versus Aircraft Norman L. R. Franks, 1986 Outlines the history of aerial combat, describes the characteristics of famous fighters from biplanes to jets, and shares the experiences of fighter pilots.

Hitler's Jet Plane Mano Ziegler, 2014-07-19 An expert account with new research of how the Luftwaffe's first ever military jet plane failed to make its mark on World War II. The first operational military jet in the world, towards the end of the Second World War the ME 262 was to be the German "miracle weapon." Mano Ziegler was involved from its inception and contributed to the design, testing, and training and even served in it operationally. Could the ME 262 have broken the Allied supremacy in the air? Why did it take so long to come into service and why were hundreds of German pilots sacrificed in developing it? Why did the ME 262 prove not to be the unparalleled success

claimed by Goering and why were German cities left dangerously exposed against Allied bombing campaigns? These are only some of the important questions this new book answers. Mano Ziegler, born 7 June 1908, had a lifetime fascination with flight. At the age of eight, he wrote to Manfred Freiherr von Richthofen, the famous “Red Baron,” asking to be allowed to fly with him. Richthofen even replied, telling him, “Yes, we’ll fly together!” When war broke out in 1939 he became a pilot in the Luftwaffe, and from 1943 until the war’s end, he flew the Me 163. After the war he escaped from Russian captivity and—having returned to Berlin—continued to fly and write newspaper articles. He eventually became editor-in-chief of the *Flug-Revue* aviation monthly in Stuttgart. “Superb . . . the histories of these planes are a major milestone in the development of aeronautical technology.” —Military Archive Research

The Spitfire Story Alfred Price, 1999 A complete history of the design and production of the Spitfire from its pre-war origins right through to the final variant post-war, some 20,400 aircraft later. Price records each stage of Spitfire development, accompanied by a collection of contemporary photographs.

The Spitfire Story Peter R. March, 2020-07-10 Probably the most famous fighter aircraft of all time, the Supermarine Spitfire reigned supreme and unsurpassed from the biplane era to the dawn of the jet age, a period that included the Second World War. Here is the incredible story of this legendary aircraft, from its genesis in the 1930s to its continued presence at airshows and museums today.

Bleeding Sky Joey Maddox, 2009-09-11 This is the true story of Captain Fletcher E. Adams and the famous 357th Fighter Group. Known collectively as the “Yoxford Boys” the 357th was the first P-51 Mustang fighter group in the history of the “Mighty” 8th Air Force. Although active for less than two years during World War II, the group set many records and became one of the greatest fighter outfits the U. S. Air Force would ever send into

combat. Between February 1944 and April 1945 the 357th produced more aces than any other American fighter group. They also shot down more German jets than any other group in the Army Air Corps during the Second World War. On January 14, 1945, a day that will forever be known as "The Great Rat Race" and "The Big Day", the 357th Fighter Group shot down 55 1/2 German fighters in just over two hours setting a record in military aviation that has never and probably will never be broken. Among the members of this amazing group of fighter pilots were: Chuck Yeager, Bud Anderson, Kit Carson, John England, and others destined for fame. So was Captain Fletcher E. Adams, a native son of the small village of Ida, Louisiana. Then, on May 30, 1944, Adams, the leading ace of the 357th Fighter Group with 9 kills to his credit, was shot down over Tiddische, Germany and murdered by civilians on the ground. This is their story as told by the pilots through their books, diaries, and interviews with the author. Theirs was an adventure never to be matched again in the annals of aviation history. Find out what it was really like to go "to war with the Yoxford Boys"! "This book gives us the best insight into a tragic causality of WW II and the mystery of what happened to Captain Fletcher E. Adams. Joey Maddox's use of other voices, quotes and investigative interviews make the story interesting. You'll not only learn about Fletcher Adams but also the history of the 357th Fighter Group. I found the use of Adams' personal diary, an illegal practice in wartime, particularly interesting to learn of his personal feelings during his training and combat." Clarence E. "Bud" Anderson Colonel, USAF Ret.

A Century of Triumph Christopher Chant, 2002 On December 17, 1903, on the windswept beaches of Kitty Hawk, North Carolina, Orville Wright piloted the world's first powered flight, in one of the most famous moments in history. Within a few short years, airplanes of various designs were lifting into the air over Europe and America. Soon, the entire world was caught up in the fevered advance of flight and airplanes, Zeppelins,

autogyros and helicopters were making the world a much smaller place. To celebrate the first full century of powered flight premier aviation historian Christopher Chant and world-famous illustrator John Batchelor have joined forces to showcase an astonishing march of progress. From the early experiments of gliderman Otto Lilienthal to the moon walk of Neil Armstrong, it has indeed been A Century of Triumph. From the golden age of Zeppelins to the extreme design experiments of World War II to the fierce modernism of supersonic fighter jets, A CENTURY OF TRIUMPH demonstrates the full richness of mankind's flying craft. In addition to Batchelor's illustrations, the book features never-before-published vintage watercolour posters of pre-World War I aviation races and a treasure trove of photographs. Chant's text combines full histories of the planes themselves with biographical essays on some of the great figures of the twentieth century: the Barnstormers, Igor Sikorsky, Amelia Earhart, Chuck Yeager, and the Apollo XVII astronauts, among others. A CENTURY OF TRIUMPH is a visual and factual feast for anyone who marvels at the majesty of flying.

America's Secret MiG Squadron Gaillard R. Peck, Jr., 2012-07-20 The personal account of the original "Red Eagle" of the establishment, equipment, and training practices of the highly classified MiG squadron of the USAF. America's Secret MiG Squadrons is the story of a group of incredibly brave military pioneers who put their lives on the line to establish a training program that would prepare the US Air Force for a potential Cold War battle with Soviet aircraft. As a F-4 Phantom II pilot in Vietnam, Col. Peck had been shocked by the technological abilities of Soviet-built aircraft, and at the poor level of training available to US pilots to aid them in their battles with Soviet MiGs in the skies over Vietnam. Working with the support of Gen Hoyt S. Vandenberg, Jr., and under conditions of extreme secrecy, the CONSTANT PEG program was launched with Peck as the original Red Eagle. This is the fascinating history of the men who trained

to fly and maintain covertly obtained MiGs, for the first time providing an insider's perspective, personal anecdotes, and photographs, revealing how Peck battled bureaucracy and scepticism to ultimately establish the premier fighter pilot training center – the real Top Gun.

Breaking the Sound Barrier: The Story of Chuck Yeager

Susan Sales Harkins, 2005-09 Chuck Yeager loved to fly. His determination led him to be a fighter and test pilot. He flew as often as he could in any craft he could. Eventually, he became the expert on military aircraft. He knew just what each plane could do, and more importantly, what it couldn't. As important as knowing how far he could push a plane, he also knew when to pull back. His pioneering efforts in breaking the sound barrier made modern aviation and space exploration possible.

F6F Hellcat at War Cory Graff, 2009-04-15 This guide traces the history of the US Navy's premier WWII fighter plane with archival photos, tech specs and illustrations. F6F Hellcat at War follows the story of this iconic aircraft from its early development to its distinguished combat career in the Pacific. While the F6F was not the fastest or most maneuverable fighter, aviators loved their trusty Hellcats because they were incredibly tough, marvelously powerful, and easy to fly. In the last two years of war, the Hellcat dominated the skies over the Pacific, stopping Japan's once-vaunted A6M Zero and tallying a victory-to-loss ratio of over 19 to 1. Through compelling accounts, never-before-seen photographs, and detailed drawings, F6F Hellcat at War tells the story of one of the war's most successful yet underappreciated fighter aircraft.

Topgun Dan Pedersen, 2019-03-05 NATIONAL BESTSELLER If you loved the movie, you will love the real story in the book. -- Fox & Friends On the 50th anniversary of the creation of the Topgun Navy Fighter School, its founder shares the remarkable inside story of how he and eight other risk-takers revolutionized

the art of aerial combat. When American fighter jets were being downed at an unprecedented rate during the Vietnam War, the U.S. Navy turned to a young lieutenant commander, Dan Pedersen, to figure out a way to reverse their dark fortune. On a shoestring budget and with little support, Pedersen picked eight of the finest pilots to help train a new generation to bend jets like the F-4 Phantom to their will and learn how to dogfight all over again. What resulted was nothing short of a revolution -- one that took young American pilots from the crucible of combat training in the California desert to the blistering skies of Vietnam, in the process raising America's Navy combat kill ratio from two enemy planes downed for every American plane lost to more than 22 to 1. Topgun emerged not only as an icon of America's military dominance immortalized by Hollywood but as a vital institution that would shape the nation's military strategy for generations to come. Pedersen takes readers on a colorful and thrilling ride -- from Miramar to Area 51 to the decks of aircraft carriers in war and peace-through a historic moment in air warfare. He helped establish a legacy that was built by him and his Original Eight -- the best of the best -- and carried on for six decades by some of America's greatest leaders. Topgun is a heartfelt and personal testimony to patriotism, sacrifice, and American innovation and daring.
