Thomas Mann's The Magic Mountain Rodney Symington,2011-09-22 Thomas Mann's novel The Magic Mountain presents a panorama of European society in the first two decades of the 20th century and depicts the philosophical and metaphysical dilemmas facing people in the modern age. In the years leading up to the First World War, the fundamental elements of human nature were thrown into sharp relief by the political tensions that resulted in the ultimate metaphor for the innate destructiveness of humankind: the War itself. If such a war is the true expression of human tendencies, what hope is there for the future? Through the figure of the main character of the novel, Thomas Mann explores the alternative philosophies of life available to human beings in the modern age, and invites the reader to undertake a personal odyssey of discovery, with a view to adopting a positive approach in an era that seems to offer no clear-cut answers. This book is a comprehensive commentary on Thomas Mann's seminal novel, one of the key literary artefacts of the 20th century. The author has taken upon himself the task of explaining all the references and allusions contained in the novel, and of providing readers who know little or no German with enough explanatory comment to enable them to understand the novel and extract the maximum reading pleasure from it.

,2009-05-05 Seeing with Different Eyes: Essays in Astrology and Divination represents the cutting-edge of contemporary thought and research on divination. The thirteen authors come from a variety of academic disciplines, ranging from anthropology and classics to English literature and religious studies, and all address the question of divination, astrology and oracles in a spirit of critical but sympathetic inquiry. The emphasis is on a participatory and reflexive approach which is firmly post-positivist, seeking to understand the divinatory act on its own terms within widely varying contexts – ancient Greek and Chaldean philosophy and theurgy, Theravadan Buddhism, Biblical studies, Elizabethan Hermeticism, Jacobean drama, Heideggerian philosophy, Medieval scholasticism, 19th century occultism, contemporary Guatemalan divination and Western medical practice. The authors are all teachers or researchers in the area of divination and symbolism, which is a new disciplinary focus developing at the University of Kent, Canterbury under the aegis of the MA programme in the Cultural Study of Cosmology and Divination. The essays in this volume originally contributed to an international conference of the same name held there in April 2006.

*Swing to Bop* Ira Gitler,1985-11-07 This indispensable book brings us face to face with some of the most memorable figures in jazz history and charts the rise and development of bop in the late 1930s and '40s. Ira Gitler interviewed more than 50 leading jazz figures, over a 10-year period, to preserve for posterity their recollections of the transition in jazz from the big band era to the modern jazz period. The musicians interviewed, including both the acclaimed and the unrecorded, tell in their own words how this renegade music emerged, why it was a turning point in American jazz, and how it influenced their own lives and work. Placing jazz in historical context, Gitler demonstrates how the mood of the nation in its post-Depression years, racial attitudes of the time, and World War II combined to shape the jazz of today.
