**Folding Paper** Meher McArthur, Robert J. Lang, 2013-08-06 This beautiful origami art book is a collection of the best contemporary pieces from some of the world's most renowned papercraft artists. Thanks to pioneering masters such as Dr. Robert J. Lang, origami has transcended its humble roots as a traditional Japanese papercraft to take its place among the global fine arts. In *Folding Paper: The*

Infinite Possibilities of Origami, Dr. Lang and Asian art curator Meher McArthur chronicle origami's remarkable evolution and showcases the widespread applications of paper folding solutions in the fields of contemporary mathematics, engineering, design, and the international peace movement. Based around a groundbreaking museum show by the same name, Folding Paper features the work of more than forty leading origami artists from around the world. It traces the development of paper folding in both the East and the West, recognizing the global influences on this international art form. Now in the early twenty-first century, origami is a sophisticated fine art form consisting of many different styles, from representational to geometric, abstract, and even conceptual. It has become a symbol of peace, an inspiration for engineers, and a conduit for scientific advancement. Featured origami artists include: Brian Chan Erik Joisel Erik and Martin Demaine Tomoko Fuse Daniel Kwan Michael LaFosse Jeannine Moseley Akira Yoshizawa Combining Dr. Lang's and McArthur's illuminating narrative history with lavish color photographs of more than sixty breathtaking works—from Joel Cooper's haunting Cyrus mask to Linda Tomoko Mihara's delicate Crane Cube to Eric Joisel's lifelike

Pangolin model—Folding Paper is an enthralling introduction to the contemporary art of paper folding.

*Folding Paper* Meher McArthur, Robert James Lang, 2012 *Folding Paper* is the first major exhibition to explore the rich tradition of paper folding in Japan and Europe, its evolution from children's craft to fine art, and its inventive applications in science, design, and the global peace movement. Approximately 140 spectacular works by more than 50 artists from 15 different countries demonstrate that origami has become such a refined form of artistic, scientific, and spiritual expression there is almost nothing a square sheet of paper cannot be folded into. The works range from lifelike and representational to mathematical and computer-generated to lyrical and abstract to social and political. The exhibition also includes origami-related woodblock prints, murals, books, wall projections, videos,

and a unique interactive origami-making component. The exhibition is organized into 4 sections: 1) The History of Origami; 2) Animals and Angels: Representations of Real and Imagined Realms; 3) Angles and Abstractions: Geometric Forms and Conceptual Constructions; and 4) Inspirational Origami: Impact on Science, Industry, Fashion, and Beyond. Folding Paper was developed by independent curator, author, and educator Meher McArthur, former curator of East Asian Art at Pacific Asia Museum in Pasadena, California. The exhibition will debut in Los Angeles at the Japanese American National Museum in March 2012. The award-winning documentary film, *Between the Folds*, features 18 of the artists in the exhibition and would correlate wonderfully with exhibition programming. Folding Paper is a dynamic exhibition with a compelling message: origami is an international fine art form that is also at the cutting edge of math, science, and design. The exhibition was generously supported by the E. Rhodes & Leona B. Carpenter Foundation.

Folding Paper Dona Herweck Rice, 2019-05-31 Paper is paper, no matter how it is folded. It can be a paper airplane. It can be a paper boat. Learn about the fun shapes that paper can be folded into

with this STEAM book. Created in collaboration with Smithsonian, this book makes it easy for parents and teachers to introduce STEAM to their youngest learners.
