In Defence of Food Michael Pollan, 2008-01-31 'A must-read ... satisfying, rich ... loaded with flavour' Sunday Telegraph This book is a celebration of food. By food, Michael Pollan means real, proper, simple food - not the kind that comes in a packet, or has lists of unpronounceable ingredients, or that makes nutritional claims about how healthy it is. More like the kind of food your great-grandmother would recognize. In Defence of Food is a simple invitation to junk the science, ditch the diet and instead rediscover the joys of eating well. By following a few pieces of advice (Eat at a table - a desk doesn't count. Don't buy food where you'd buy your petrol!), you will enrich your life and your palate, and enlarge your sense of what it means to be healthy and happy. It's time to fall in love with food again. For the past twenty years, Michael Pollan has been writing about the places where the human and natural worlds intersect: food, agriculture, gardens, drugs, and architecture. His most recent book, about the ethics and ecology of eating, is The Omnivore's Dilemma, named one of the ten best books of 2006 by the New York Times and the Washington Post. He is also the author of The Botany of Desire, A Place of My Own and Second Nature.

Food Folklore, 1999-01-01 Separate food facts from fiction with this handy guide from America's nutrition experts. Do carbohydrates cause weight gain? Will taking zinc help you recover faster from a cold? Does extra protein make muscles stronger? As long as people want quick and easy solutions to health concerns, food folklore will continue to be a part of our culture. But what are the facts, and what are the tall tales? In this fun and informative book, The American Dietetic Association reveals which commonly-held beliefs about food can be supported by science, and which are just

myths. You'll find out about foods that really do have health benefits, and learn which popular practices might actually be harmful. Before you accept the latest health or nutrition advice or spend money on ineffective remedies, consult this unique resource from the experts at the ADA.

We Are What We Eat Alice Waters, 2022-06-07 From chef and food activist Alice Waters, an impassioned plea for a radical reconsideration of the way each and every one of us cooks and eats In *We Are What We Eat*, Alice Waters urges us to take up the mantle of slow food culture, the philosophy at the core of her life's work. When Waters first opened Chez Panisse in 1971, she did so with the intention of feeding people good food during a time of political turmoil. Customers responded to the locally sourced organic ingredients, to the dishes made by hand, and to the welcoming hospitality that infused the small space—human qualities that were disappearing from a country increasingly seduced by takeout, frozen dinners, and prepackaged ingredients. Waters came to see that the phenomenon of fast food culture, which prioritized cheapness, availability, and speed, was not only ruining our health, but also dehumanizing the ways we live and relate to one another. Over years of working with regional farmers, Waters and her partners learned how geography and seasonal fluctuations affect the ingredients on the menu, as well as about the dangers of pesticides, the plight of fieldworkers, and the social, economic, and environmental threats posed by industrial farming and food distribution. So many of the serious problems we face in the world today—from illness, to social unrest, to economic disparity, and environmental degradation—are all, at their core, connected to food. Fortunately, there is an antidote. Waters argues that by eating in a “slow food way,” each of us—like the community around her restaurant—can be empowered to prioritize and nurture a different kind of culture, one that champions values such as biodiversity, seasonality, stewardship, and pleasure in work. This is a declaration of action against fast food values, and a working theory about what we can do to change the course. As Waters makes clear, every decision we make about what we put in our mouths affects not only our bodies but also the world at large—our families, our communities, and our environment. We have the power to choose what we eat, and we have the potential for individual and global transformation—simply by shifting our relationship to food. All it takes is a taste.
