Garbage Collection Richard Jones,Rafael Lins,1996-08-16 Eliminating unwanted or invalid information from a computer's memory can dramatically improve the speed and efficiency of the program. this reference presents full descriptions of the most important algorithms used for this eliminatino, called garbage collection. Each algorithm is explained in detail with examples illustrating different results.

The Garbage Collection Handbook Richard Jones,Antony Hosking,Eliot Moss,2023-06-01 Universally acclaimed as the book on garbage collection. A complete and up-to-date revision of the 2012 Garbage Collection Handbook. Thorough coverage of parallel, concurrent and real-time garbage collection algortithms including C4, Garbage First, LXR, Shenandoah, Transactional Sapphire and ZGC, and garbage collection on the GPU. Clear explanation of the trickier aspects of garbage collection, including the interface to the run-time system, handling of finalisation and weak references, and support for dynamic languages. New chapters on energy aware garbage collection, and persistence and garbage collection. The e-book includes more than 40,000 hyperlinks to algorithms, figures, glossary entries, indexed items, original research papers and much more. Backed by a comprehensive online database of over 3,400 garbage collection-related publications

Advances in Energy, Environment and Chemical Engineering Volume 1 Ahmad Zuhairi Abdullah,Azlin Fazlina Osman,2022-12-21 Advances in Energy, Environment and Chemical Engineering collects papers resulting from the conference on Energy, Environment and Chemical Engineering (AEECE 2022), Dali, China, 24-26 June, 2022. The primary goal is to promote research and developmental activities in energy technology, environment engineering and chemical engineering. Moreover, it aims to promote scientific information interchange between scholars from the top universities, business associations, research centers and high-tech enterprises working all around the world. The conference conducts in-depth exchanges and discussions on relevant topics such as energy engineering, environment technology and advanced chemical technology, aiming to provide an academic and technical communication platform for scholars and engineers engaged in scientific research and engineering practice in the field of saving technologies, environmental chemistry, clean production and so on. By sharing the research status of scientific research achievements and cutting-edge technologies, it helps scholars and engineers all over the world comprehend the academic development trend and broaden research ideas. So as to strengthen international academic research, academic topics exchange and discussion, and promote the industrialization cooperation of academic achievements.

Proceedings of 2021 Chinese Intelligent Systems Conference Yingmin Jia,Weicun Zhang,Yongling Fu,Zhiyuan Yu,Song Zheng,2021-10-07 This book presents the proceedings of the 17th Chinese Intelligent Systems Conference, held in Fuzhou, China, on Oct 16-17, 2021. It focuses on new theoretical results and techniques in the field of intelligent systems and control. This is achieved by providing in-depth study on a number of major topics such as Multi-Agent Systems, Complex Networks, Intelligent Robots, Complex System Theory and Swarm Behavior, Event-Triggered Control and Data-Driven Control, Robust and Adaptive Control, Big Data and Brain Science, Process Control, Intelligent Sensor and Detection Technology, Deep learning and Learning Control Guidance, Navigation and Control of Flight Vehicles and so on. The book is particularly suited for readers who are interested in learning intelligent system and control and artificial intelligence. The book can benefit researchers, engineers, and graduate students.

The Ethics of Waste Gay Hawkins, 2006 Gay Hawkins explores the ethical significance of waste in everyday life—from the broadest conceptions of waste and loss to how the environmental movement has affected the ways we think about garbage. Do we feel virtuous for reusing plastic bags and disdain those who don't? At what point does personal waste become public responsibility? How does this 'public conscience' affect policy? Placing these ideas into historical, social, and cultural perspective, this thoughtful book seeks ways to change ecologically destructive practices without recourse to guilt, moralism, or despair.

Fly Guy Presents: Garbage and Recycling (Scholastic Reader, Level 2) Tedd Arnold, 2019-02-26 Fly Guy is buzzing over to a landfill to learn more about garbage and recycling! Fly Guy and Buzz visit a landfill to discover where their garbage goes. They learn all about garbage trucks, trash sorting, bacteria, and how landfills can be more environmentally friendly. They also visit a recycling plant to learn about how recycling programs get started, the recycling cycle, and what happens when trash isn't properly disposed of. There are even tips for how readers can help keep our planet healthy! Award-winning author-illustrator Tedd Arnold brings nonfiction to life for beginning readers. There are humorous illustrations and engaging photographs throughout. The front cover features eye-catching holographic foil!

Garbology Edward Humes, 2013-03-05 A Pulitzer Prize-winning journalist takes readers on a surprising tour of America's biggest export, our most prodigious product, and our greatest legacy: our trash. The average American produces 102 tons of garbage across a lifetime and \$50 billion in squandered riches are rolled to the curb each year. But our bins are just the starting point for a strange, impressive, mysterious, and costly journey that may also represent the greatest untapped opportunity of the century. In *Garbology*, Edward Humes investigates trash—what's in it; how much we pay for it; how we manage to create so much of it; and how some families, communities, and even nations are finding a way back from waste to discover a new kind of prosperity. Along the way, he introduces a collection of garbage denizens unlike anyone you've ever met: the trash-tracking detectives of MIT, the bulldozer-driving sanitation workers building Los Angeles' Garbage Mountain landfill, the artists residing in San Francisco's dump, and the family whose annual trash output fills not a dumpster or a trash can, but a single mason jar. *Garbology* reveals not just what we throw away, but who we are and where our society is headed. Waste is the one environmental and economic harm that ordinary working Americans have the power to change—and prosper in the process. *Garbology* is raising awareness of trash consumption and is sparking community-wide action through One City One Book programs around the country. It is becoming an increasingly popular addition to high school and college syllabi and is being adopted by many colleges and universities for First Year Experience programs.

Biohydrogen Production and Hybrid Process Development Zhao Youcal, Zhou Tao, 2020-10-07 *Biohydrogen Production and Hybrid Process Development: Energy and Resource Recovery from Food Waste* explores the production of biohydrogen from food waste via anaerobic fermentation, focusing on effect factors, control methods and optimization. The book introduces food waste treatment and disposal technologies, including operational principles and process control. The authors discuss the use of aged refuse, the effect of several key factors on anaerobic gas production rate, process parameters optimization for enhancing biohydrogen yield, key factors in biohydrogen production from sewage sludge fermentation, and new developments in nutrition recovery from food waste. This book spans the entire production cycle, from waste recovery to its conversion processes, end-product, and by-product utilization, providing engineering researchers, PhD students, and industry practitioners in the field of biohydrogen

production, biogas production, biomass conversion, and food waste management with a thorough background on the production of hydrogen via anaerobic fermentation. Covers the fundamentals and applications of the use of food waste for biohydrogen production through anaerobic digestion Explores core challenges of biohydrogen production operations, including details on process optimization and control, and multiple case studies grounded in current industrial practice Includes methodological perspectives comparing and contrasting approaches to biohydrogen production using anaerobic digestion with optimization techniques for production efficiency

East Asian Social Movements Jeffrey Broadbent, Vicky Brockman, 2011-01-07 In the study of civil society and social movements, most cases are based in Western Europe and North America. These two areas of the world have similar histories and political ideals and structures in common which in turn, affect the structure of its civil society. In studying civil society in Asia, a different understanding of history, politics, and society is needed. The region's long traditions of centralized, authoritarian states buttressed by Confucian and in some cases Communist ideologies may render this concept irrelevant. The chapters in this international volume cover most of the areas and countries traditionally defined as belonging to East Asia: Japan, Taiwan, South Korea, Hong Kong, Singapore and China. The case studies included in this volume confront the utility of using the Western concept of civil society, represented in its most active form - social movements - to think about East Asia popular politics. Along with providing an array of important case studies of social movements in East Asia, the introduction, chapters and conclusion in the book take up three major theoretical questions: the effect of the East Asian cultural, social and institutional context upon the mobilization, activities and outcomes of social movements in that region, the role of social movements in larger transformative processes, utility of Western social movement concepts in explaining social movements in East Asia. This book will be of interest to two major groups of readers, those who study East Asia and those who pursue social movements and civil society, as well as politics more generally.

Management of Urban Biodegradable Wastes Jens Aage Hansen, 1996 Biological treatment of urban biodegradable wastes is on the increase in Europe. Future growth looks certain, with pressures to provide an alternative to landfill in managing our cities' wastes. This book deals with urban biodegradables from households, trade, light industry, gardens and parks. It examines legislation and regulation, methods of composting and collection, management systems, occupational health, anaerobic and other processes, biodegradability, product quality, marketing, and end-user demands. Sections on: * existing and emerging legislation and regulation * local composting and collection * systems, cases and collection * occupational health * anaerobic processing * biodegradability * aerobic and other processing * product quality, marketing and end-user demands * urban biodegradable wastes status and opinion The book reflects up-to-date theory and practice and will be particularly valuable reading for university graduate schools, consulting engineering companies and managers in biological waste treatment.

Working in Trash and Recycling Collection Carol Hand, 2018-12-15 A career in trash and recycling is often dirty, exhausting, and overlooked by many career seekers, but those who enjoy working hard and spending time outside might find this to be a rewarding career path to follow. This engaging guide allows readers to explore entry-level jobs in both trash and recycling, including collectors or drivers, landfill workers, recycling sorters, and more. It covers duties, required skills and education, and advancement possible in both fields, including positions in both management and science and technology to give readers the tools to turn a job into a career.

Hazardous Trash Melissa Raé Shofner, 2017-07-15 People have accumulated a frightening and environmentally devastating amount of garbage, even in outer space. This book rips from the headlines the powerful stories of some of the world's worst dumps, including Mumbai in India, Dandora in Kenya, and more. Fact boxes chronicle the legal changes made, and not made, in each place with regard to waste management. Statistics presented in sidebars on each spread illuminate the problem for readers using frighteningly true numbers. This book reinforces lessons on recycling, littering, and community activism, and concludes with instructions on how to help with Earth's garbage problem.

Biotech in China Rolf Schmid, Xin Xiong, 2021-07-15 In her quest for global leadership in science and technology, the People's Republic of China has attained top ranks in the number of scientific publications, hot papers, or national and international patent applications. However, analysis of the underlying structures and mechanisms is hindered by the sheer flood of data, stringent government control of all media, and ambiguities inherent in translation from Chinese. This book overcomes these difficulties and provides a concise picture of biotechnology-related research and development in China. It begins with brief accounts of China's geography, people, political and administrative structure, economy, finance, infrastructure related to science and technology, and educational system. It presents succinct accounts on structures and developments in biomedicine, diagnostics, agriculture, fermented food, bioindustry, and environmental biotechnology, with reference to government, industry, and academia. Finally, it predicts the next steps in Chinese biotechnology for the national agenda and, in view of China's ambitious global development strategy, the Belt and Road Initiative.

Recycling Charlotte Wilcox, 2007-01-01 Soda bottles turn into swanky shirts, and billboards become trendy tote bags. Chicken droppings make electricity, and elephant poop becomes writing paper. Rubber tires change into rubber roads. Garbage turns to fuel oil. What's going on here? Is it magic? Science fiction? No it's recycling! Recycling turns dirty, stinky, germey, dangerous trash into useful stuff. Recycling also keeps garbage from piling up and polluting our planet. This book explains the many amazing ways people use science to recycle garbage into great things.

Advances in Urban Engineering and Management Science Volume 2 Rashwan Khalil, Jun Yang, 2022-12-12 *Advances in Urban Engineering and Management Science* contains the selected papers resulting from the 2022 3rd International Conference on Urban Engineering and Management Science (ICUEMS 2022). Covering a wide range of topics, the Proceedings of ICUEMS 2022 presents the latest developments in: (i) Architecture and Urban Planning (Architectural design and its theory, Urban planning and design, Building technology science, Urban protection and regeneration,

Urban development strategy, Ecological construction and intelligent control, Sustainable infrastructure); (ii) Logistics and supply chain management (Warehousing and distribution, Logistics outsourcing, Logistics automation, Production and material flow, Supply chain management technology, Supply chain risk management, Global service supply chain management, Supply Chain Planning and Inventory Management, Coordination and collaboration of supply chain networks, Governance and regulatory aspects affecting supply chain management); (iii) Urban traffic management (Smart grid management, Belt and Road Development, Intelligent traffic analysis and planning management, Big data and transportation management). The Proceedings of ICUEMS 2022 will be useful to professionals, academics, and Ph.D. students interested in the above-mentioned fields. Emphasis was put on basic methodologies, scientific development and engineering applications. ICUEMS 2022 is to provide a platform for experts, scholars, engineers and technical researchers engaged in the related fields of urban engineering management to share scientific research achievements and cutting-edge technologies, understand academic development trends, broaden research ideas, strengthen academic research and discussion, and promote the industrialization cooperation of academic achievements. Experts, scholars, business people and other relevant personnel from universities and research institutions at home and abroad are cordially invited to attend and exchange.
